About Myant

Myant has created the world's first textile computing platform that continuously and ambiently connects people to their bodies, to each other, and to the world around them. Using connected textiles that can sense and react to the human body and a platform that enables machine learning driven health and performance outcomes, Myant is on a mission to transform human connectedness. With an extensive patent portfolio, key exclusive relationships within the textile computing industry, a multidisciplinary team of researchers, engineers, data scientists, fashion designers and knitting specialists, and over 80,000 ft² of textile manufacturing capacity, Myant is changing the way people across society connect. Connect with us to find out how we can help you create innovative solutions powered by Skiin and the Myant Platform.

About Skiin

Whether you just want to know if Dad is feeling alright without having to ask or you want to delve deeper into how his daily walks are impacting the health of his heart, Skiin keeps you close to what matters most. Using textiles that can sense and react to the human body and machine learning on the Myant Platform that continuously analyzes and manages your biometric data, Skiin enables a new way of connecting to your loved ones, their health, wellbeing, safety and care regardless of distance, time, or ability.

All of this is possible and it is as simple as changing the clothes you wear.
