

## Beechworth Windows at a Glance

The Beechworth™ System: premium windows that deliver on all aspects of quality.

- Contribute to reduced energy costs.
- Have confidence in the form, function and longevity of Beechworth Windows.
- Be satisfied in the craftsmanship and design integrity of the products and accessories.
- Have peace of mind in our understanding of exterior products and the remodeling industry.

### Fiberglass Explained

Fiberglass is an extremely durable material that has a history across several industries. It's used in everything from aircraft fuselages to bath tubs, and of course our windows, because its performance characteristics enable it to remain reliable despite constant exposure to weather, water, sun, wind and pests.

### The Right Selection

Whether you're looking to increase efficiency, lower noise, replace broken windows...or all of the above, you'll find that Beechworth Windows makes it easy to get precisely what you're looking for.

### Refined Aesthetics

Options have been carefully considered, in order to offer you design flexibility and a complement to the entire exterior of your home—without being overwhelming.

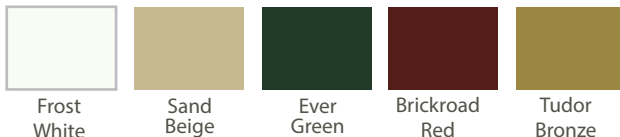

#### Exterior Finishes

- High quality appearance with architectural details
- Finishes perform well in light and dark colors
- Resist peeling, cracking and fading
- Can be professionally repainted
- Complement James Hardie ColorPlus® Technology finishes

#### Interior Finishes

- Provide a truer wood look
- Seal or stain our natural pine to complement the wood finishes in the home
- Provide a warm, authentic look to the interior of a home
- Are crafted from solid wood

## Standard? Or Stand out?

Grilles and grille patterns add depth, dimension and noticeable character to windows in a way that can affect the entire look of the home – from the inside and outside.

SDL (simulated divided lite): achieve the authentic wood look with grilles that adhere to the exterior glass panes.

- Finished to match your interior
- Cuts and patterns
- Permanent or remove-able

GBG (grille between glass): get a look similar to SDLs but with a little less maintenance

- Finished to match your interior

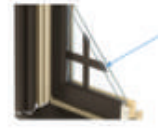

## What is an...SDL and a GBG?

SDL: Simulated Divided Lite (outsides of glass)

GBG: Grille Between the Glass

## Simulated Options

SDL Interior

7/8" Stepped Wood  
Interior SDL bar

SDL Exterior

7/8" Putty fiberglass  
Exterior SDL bar

GBG

5/8"  
Flat Alum.  
Airspace Grille

11/16"  
Sculptured Alum.  
Airspace Grille

## Grilles Patterns

Rectangular

9-Lite Prairie

6-Lite Prairie

## Reliable Performance

Low Maintenance Products

Superior in its dimensional stability to vinyl & wood, as it expands at nearly the same rate of glass. So, less conflicting expansion and contraction forces reduce risk of maintenance costs due to seal failures or difficult functionality.

- Stronger than aluminum, wood and vinyl
- Resist corrosion, splitting or rotting
- Highly resistant to dents & scratches
- Highly resistant to warping or twisting

Energy Efficient Glass

Our glass packages are designed for comfort and engineered for efficiency; select yours based on your need for stable interior temperatures, a comfortable environment and reduction of energy expenses.

- Double paned to increase performance
- Better insulation with composite spacers
- All packages include low-e coatings and argon gas

## Simplicity, by Design

By leveraging our technological capabilities and our network of trusted trade partners, we are able to deliver a select portfolio of quality products to address the replacement window need, and a process that's clean, easy and enjoyable.

We work with a selection of trusted, knowledgeable contractors.
