

TouchSource Taos

Future Proof Wellness Solutions

The TouchSource Taos combines robust digital directory software with a complete wellness package including infrared temperature sensing and contactless hand sanitizer. This turnkey solution is an attractive addition to any lobby or entrance as you re-open your building and public spaces after the pandemic.

Balance Wellness and Functionality

During these times of economic and public health uncertainty, the TouchSource Taos solves for both immediate and future needs with a fully functionality digital kiosk that also incorporates wellness features. The combination enables you to deploy a highly versatile digital display with wayfinding options, temperature checking capability and hand sanitizer during the current public health crisis.

As things change in the future, the temperature functions can be easily repurposed as proximity sensors for dynamic content experiences—for a future proof, long-term asset that serves every public space.

Educate, Engage, and Protect Your Environment

The TouchSource Taos together with the TouchSource Contactless Suite of solutions provides safe, easy-to-use capabilities that protect your tenants and visitors while also providing useful and engaging content. Features of the Taos wellness kiosk include:

Temperature Sensors & Discrete Notifications

- Sensor-based infrared temperature thermometer utilizes FDA guidelines for 3-second average benchmark sensing and is accurate to 0.5 degrees
- Integrated ambient temperature and proximity sensors reduce false positive readings from the temperature sensors
- Discreet notification of temperature thresholds that exceed pre-defined levels

Elegantly Designed Hand Sanitizer Stations

- Sensor-based contactless hand sanitizer with integrated notifications when refills are necessary
- Cost-effectively deploy these stations to all entrances and public spaces using exciting digital content to drive usage

Adaptable & Relevant Digital Content Display

- Touch and non-touch HD display with options for 22" or 32" sizes
- Options to display contactless yet interactive digital directory, wayfinding and safety messaging
- Enable visitor and vendor acknowledgement of public health procedures and mobile compliance capture
- Easy-to-use solution for real-time guest, patient, student, citizen or tenant communication
- Leverage TouchSource digital designers to align the experience and kiosk look to your brand and messaging

FEATURES

- Elegant architectural-grade kiosks
- Integrated infrared temperature sensors
- Integrated contactless hand sanitizer
- Incorporate directory and listings on the digital display
- Present safety or facility content
- Source localized content
- Easy-to-update content keeps pace with rapid change
- Simple, customizable designs for offices, clinics, hospitals, schools, public sector, and retail
- Available in a variety of colors with optional vinyl wraps
