

ULTRAPURE WATER ASIA

July 6-7, 2011 Suntec Center, Singapore

Co-located at the Singapore International Water Week

This Conference covers world-class, state-of-the-art water treatment technologies for use by the Microelectronics, Biotechnology, Pharmaceutical, Power, and Manufacturing industries of the Asian continent.

Technical papers are presented by technical experts from throughout the industrialized nations. Water treatment technologies that are emphasized include Reverse Osmosis, Ultrafiltration, Nanofiltration, Electrodialysis, Ion Exchange, Electrodeionization, Microfiltration, and Instrumentation technologies. **All technical papers will be presented in English.**

Register early and
save!
Limited space!

Preliminary Program Topics:

- Asian Water Business Issues
- Water for Injection Production
- Raw Water Analysis of Power Plant Makeup
- Using UF Technology to Reclaim Semiconductor Wastewater
- Monitoring for Urea in Municipal Water and High-Purity Water
- Energy Saving RO Elements
- Degassing Membranes for Lowering the Operating Cost of IX Equipment
- Sodium and Silica Trace Measurement in Semiconductor Applications
- Comparison of Boron Rejection Capabilities of RO Membranes
- UV Oxidation with Persulfate for High-Purity Water Applications
- Monitoring and Controlling UPW Organic Nitrogen Contamination
- Preventing the Release of Nano Materials through an On-Line Boron Analyzer
- Micro-Media Column for High-Purity Water Production

Register today and save!

- 2-DAY CONFERENCE** us\$550
(US\$500 if registered before June 1)
- WEDNESDAY ONLY** us\$320
- THURSDAY ONLY** us\$320

(Group Lunch included with registration)

REGISTER ONLINE AT:

www.ultrapurewater.com/zencart

A 15% discount will be given for 3 or more participants from a company registered at the same time.
