THE ENOSIX DIFFERENCE

enosix helps the next generation of sales leaders turn complex SAP integration into opportunities. It's time to evolve with the speed of business.

Build a 360° view of your customer

Sell faster and close your deals now!

Increase selling time by 8+ hours/wk per sales rep

SAP® REAL-TIME BUSINESS PROCESS INTEGRATOR

Real-time SAP Business Processes in less than a day

Drag and drop enosix Lightning page components with real-time SAP data into native Salesforce pages.

Salesforce Administrators can toggle specific SAP fields on or off without any prior SAP experience.

Give your users access to search and display critical SAP transactional and master data such as:

- Customer details (with Sales Area and Company Code views)
- Quotes and Orders (with header and line item details)
- Deliveries and Invoices
- Pricing
- Contacts and Business Partner records
- and many more

No additional hardware

No middleware = no syncing of data elements and no mapping.

No additional resources

No monitoring of data interfaces and no maintenance required.

Start integrating now

Start interacting with SAP in real-time from Salesforce in a day, not months, with our 15+ pre-built integrations.

READY FOR THE FUTURE

Upgrade to the Enterprise Edition with 40+ pre-built scenarios and CPQ with Variant Configuration. Full CRUD capabilities
