JM2 WEBDESIGNERS EXPANDS IN VALPARAISO INDIANA

Today, JM2 Webdesigners CEO John Marx unveiled “Project Coffee Pot”. This project has been in the works since March 2016 when demand to serve customers was starting to require more space. The overall goal of the company was to only stay in the Zoseco Co-working space for two years. JM2 Webdesigners felt that if they stayed any longer they would be hindering other individuals that wanted to move into the business world on their own.

“We are taking some bold steps to grow and help small businesses focus on their businesses while JM2 Webdesigners helps these businesses with their digital marketing needs,” Marx said. This move will give room for growth for individualized on premise seminars, a dedicated photography room, and grow the Find Business Directory at <http://FindBiz.Directory/> to name just a few. The Find Business Directory is a free business listing service for any business large or small.

JM2 Webdesigners will move into a 2,000+ square feet at 403 East Lincolnway, Valparaiso, IN 46383. This move comes after careful study and review of the company’s future operating needs in light of its growth prospects.

###
