

# JOIN THE FUTURE OF ENERGY INVESTING

Access exclusive, private-market energy deals

Enjoy potential lucrative tax deductions against income

Earn 30-100% IRRs, plus periodic distributions

## Why Oil & Gas?

Even as the world increasingly turns to alternative energy sources, oil and gas demand will persist for decades to come. Most analysts agree that the world will demand record volumes of oil and gas in 2022 and beyond.

## About Our CEO

**Laura Pommer** is the **CEO and Chief Geologist** of EnergyFunders. She is one of the many Longhorns on our team, earning her masters in Geology from the University of Texas at Austin. Last year, Laura exited her CEO role at Century Natural Resources to come lead the EnergyFunders team.

## Direct Energy Investments Curated by Industry Experts

We offer the first-of-its-kind platform to deliver direct access cash flow returns from oil and gas projects. Each project passes through a three-stage vetting process, screened by our expert team of geologists and engineers.

## Energy Investing, with Potential for High Returns

Our Wildcat Pioneer Fund is for those willing to take the risks required to pursue the highest potential oil and gas returns we offer. Wildcat wells can offer some of the best returns you'll find in the oilfield. Our team of experts can help shift the odds in your favor, by minimizing risk and targeting prospects with enough upside to justify the downside.

## Fractional Ownership in Bitcoin Mines

If you become an investor in our Bitcoin Discovery Fund, you will be a fractional owner of bitcoin mines. Receive a monthly distribution of partial bitcoin, based on what is mined each month. It's an excellent way to potentially accumulate bitcoin at below-market rates.

A great way to get into oil and gas investing without breaking the bank. Also easy to diversify between projects. Nothing else like it out there."

- David N.

# THE BENEFITS OF INVESTING IN OUR FUNDS

## Attractive Returns

Long-term capital appreciation plus periodic distributions.

## Protection from Inflation

Oil & Gas and bitcoin can offer an excellent hedge against devalued currency.

## Regular Distributions

Targeting first payouts within six months of fund closing.

## Tax Advantages

Enjoy potentially lucrative tax deductions against income.

## Our Current Funds

### Yield Fund

- ✓ Invests into lower-risk proven oil and gas reserves.
- ✓ Receive passive income from monthly distributions.
- ✓ Earn potential lucrative tax deductions.

Coming Mid-2022

### Bitcoin Discovery Fund

- ✓ Receive regular payouts of bitcoin from our off-grid mining.
- ✓ Powered by cost-advantaged wellhead natural gas for lower costs and greater operational control.
- ✓ Targeting triple-digit IRRs at bitcoin prices of \$45,000.

### Wildcat Pioneer Fund

- ✓ Access exclusive, private market oil and gas drilling opportunities.
- ✓ Get exposure to the hidden gems of the oil industry, offering venture capital-like upside.
- ✓ Earn potentially lucrative tax deductions against your active income (i.e. wages and salary).

Oil and Gas investing can be complicated but EnergyFunders provides great communication all the way through the investment process with plenty of updates along the way. I'm glad I found a group that I can trust when it comes to this industry."

- **Garrett C.**
