

# Wealthium

Make investment intelligence accessible and empower people to grow their wealth

## The Decentralized Investment Intelligence Platform

The Wealthium team aims to build a decentralized platform to exchange investment intelligence on Blockchain through smart contract. On this platform anyone can publish their portfolio strategies and investors can subscribe to them based on their preferences.

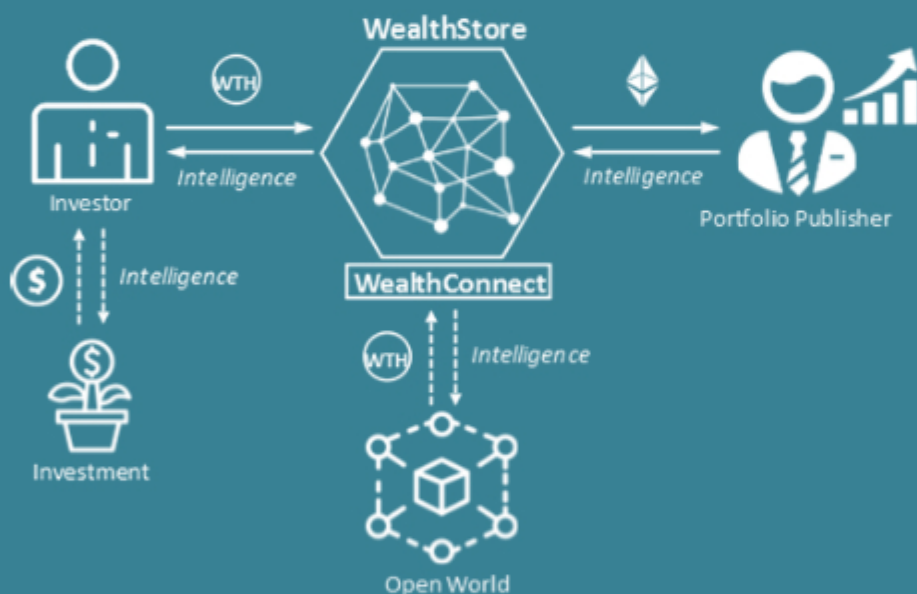

## Why do we create Wealthium?

We see the inefficiency and unfairness in the traditional asset management industry. Asset managers earn large amount of money but do not provide satisfying return to investors. Investors are suffer from high & complex fees, lack of transparency and limited choices of funds. It is time for a change.

We create a platform for people to exchange their portfolio strategies in a low cost, efficient and transparent way. With the faith of the wisdom of crowds and sharing of ideas of economy, we believe people can grow their wealth through knowledge exchange.

## How does Wealthium work?

Wealthium works by creating a marketplace, **WealthStore**, on Blockchain for individuals publish their portfolio strategies. Anyone can subscribe those strategies based on their preferences by paying subscription fees. Subscription fees go directly to portfolio publisher by smart contract.

We also create **WealthConnect** to promote an open wealth network. WealthConnect is an application framework uses Smart Contracts and API to connect the WealthStore within the Blockchain and interface external networks. It enables third parties to communicate Wealthium seamlessly from both on-chain and off-chain.

## What is Wealthium Token (WTH)?

The **Wealthium Token (WTH)** is an ERC-20 Ethereum utility token created for the Wealthium platform. The WTH token is used as the utility token to pay for services and subscribing to portfolio strategies on Wealthium.

WTH token also provides following functions:

- There is a service charge when using either Ether (ETH) or Bitcoin (BTC) on the Wealthium platform. However, the WTH token can be spent without incurring a service charge.
- When using WTH, we will waive deposit fees for publishing portfolio.
- Using WTH will be able to enjoy platform discount promotion provided from Wealthium.

**Total Tokens:**  
50,000,000 WTH

**Token Distribution:**

- Token Sale 80%
- Team 15%
- Bounty & Others 15%

**Pre-Sale Period:**  
16 Oct 2017 - 30 Oct 2017

**Pre-Sale Tokens Cap:**  
5,000,000 WTH

**Pre-Sale Rate & Bonus:**  
350 WTH/ETH (40%)

**Token Sale Period:**  
3 Nov 2017 - 3 Dec 2017

**Tokens for Sale:**  
40,000,000 WTH

**Rate & Bonus:**

- Week 1 - 325 WTH/ETH (30%)
- Week 2 - 300 WTH/ETH (20%)
- Week 3 - 275 WTH/ETH (10%)
- Week 4 - 250 WTH/ETH
