

Infracore Announces Partnership with Tanaza

Tanaza and Infracore, Tanaza Authorized Partner in Brazil, provide managed networking solutions to restaurants, gyms, and clubs.

CUIABA (MATO GROSSO), BRAZIL — 26/07/2016— Infracore (INFRA|WISE Soluções em Tecnologia da Informação), a Brazilian IT company that offers innovative solutions to SMBs, and Tanaza s.r.l., the leader in multi-vendor Wi-Fi cloud management, announce a partnership that will provide state-of-the-art social Wi-Fi networking services to small and medium businesses throughout Brazil.

"We are proud to partner with Tanaza," said Marcos Reis, CEO at Infracore. "At this time, the Brazilian economy and politics are in crisis and companies are prioritizing their investments, but for our customers, Tanaza is a high-ROI investment that provides very useful insights about their clientele. With its complete set of tools for social hotspots and wifi-based marketing, Tanaza is being very well accepted in restaurants, gyms, clubs, and shops."

With more than 117 million Internet users, Brazil is the seventh country in the world for Internet usage and the sixth most populous. In less than three years. The country's number of Wi-Fi hotspots has rapidly increased from 158.000 to more than 1 million.

"Tanaza is rapidly expanding in Brazil and Latin America countries, thanks to its extremely valuable feature set" said Sebastiano Bertani, Tanaza CEO. "A cloud-based management tool like Tanaza is a must-have for companies that are installing networks in multiple locations, because Tanaza allows MSPs to provision, troubleshoot, configure and monitor their infrastructure remotely."

"Our life became easier thanks to Tanaza" declares Marcos Reis, CEO at Infracore. "We have drastically reduced the need for on-site support and this has made us more efficient and made our job much easier."

Tanaza has now more than 250 authorized partners in over 80 countries and is already being used by more than 19 million users worldwide.

About Tanaza

Tanaza is the unique owner of a cloud-based solution designed to manage Wi-Fi networks of multi-vendor access points. Tanaza Cloud platform is a cost-effective and time-saving solution for ISPs and MSPs.

The key features of Tanaza software are:

- simplicity: zero-touch deployment, easy configuration and remote monitoring of the APs from a single web interface
- scalability: no limits in the number of simultaneous connected clients, splash pages, coupons
- freedom: supports a wide range of brands and models of APs

With Tanaza comes also the hotspot management, which includes:

- Captive portal (redirects to the Tanaza splash page or to another one)

- Branded, fully customizable splash pages
- Social login (Facebook, Twitter, Google+ and many more)
- Dashboard for advanced analytics
- Multi-role Couponing System

Thousands of Tanaza Powered access points are already giving internet access to small and medium businesses, schools, colleges, hotels, hospitals, public venues, offices, shopping malls, shops and many other users worldwide.

The Tanaza partner program is open to ISPs and MSPs and helps them generate recurring revenue streams, save costs and reduce on-site maintenance.
