

## About the speaker

### **Brian Wang**

Co-Founder and Futurist Thought Leader; Board Member of Monte Jade West

[Brian Wang](#), a Co-Founder and Futurist Thought Leader, is a prominent Science blogger whose platform, [Nextbigfuture.com](#), boasts over 1 million monthly readers and is ranked as the #1 Science News Blog. On occasion, [Nextbigfuture.com](#) even surpasses [technologyreview.com](#) in site traffic. The blog covers a wide array of disruptive technologies and trends including Space, Robotics, Artificial Intelligence, Self-driving cars, Global electrification, Medicine, Anti-aging Biotechnology, and Nanotechnology. He is also a current board member of Monte Jade West.

Renowned for his knack for identifying cutting-edge technologies, Brian fundraises for high-potential early-stage companies and serves as the Head of Research for Allocations for deep technology investments. Additionally, he is an Angel Investor and frequently speaks at corporations, TEDx events, Singularity University, and various interviews for radio and podcasts. Brian is open to public speaking and advising engagements.

Media Bias rates [Nextbigfuture](#) as highly credible with no fact-check errors in the past five years. It has been cited by well-known figures such as author Peter Diamandis and marketing guru Seth Godin. Brian's insights have also been referenced in a 2016 US Marines study on Warfare in 2030 and he has advised the City of Hong Kong on innovation strategies.

With over 100 Wikipedia citations and a role as co-lead of the Carnival of Space, Brian's influence extends widely. He has also been recognized by the Aging Analytics Agency as one of the top journalists covering anti-aging and the business of anti-aging.

Brian frequently conducts interviews with CEOs and executives of startups, as well as leading scientists and technologists. His interviews have drawn praise for their depth

and insightfulness from figures such as Christofer Mowry, CEO of General Fusion, and Suzanne Gildert, CEO of Sanctuary AI.

Brian leverages his expertise to make complex technical content accessible to the general public, providing context and highlighting the significance of technological advancements. He has been at the forefront of covering developments in quantum computing and thorium energy, among other areas.

As a disclaimer and disclosure, Brian is an investor with stakes in Tesla, SpaceX, and other stocks, indexes, ETFs, as well as startups, and is actively involved in startup ventures.

### **About Monte Jade Science and Technology Association**

Monte Jade Science and Technology Association is a professional association organized to foster the relationship between technology professionals and corporations on both sides of the Pacific Ocean. Started by Chinese-American professionals based in Silicon Valley in 1989, Monte Jade West provides an opportunity for professionals to share valuable experiences in business investments, opportunities, and management in the technology sector.
