

The FELCO 250, a new range of hedge shears

FELCO
introduces
a new range:
FELCO 250
hedge shears

FELCO, world leader in pruning tools, launches a new range of hedge shears.

With the launch of the **FELCO 250**, the Swiss brand meets the needs of demanding landscapers and home gardeners. This quality tool, made to last, has been specifically designed to trim hedges and shrubs.

A TAILORED TOOL DESIGNED WITH AND FOR PROFESSIONALS

These shears have been designed with the direct input of landscaping professionals to ensure that the tool meets their specific needs and requirements. The **FELCO 250** is an essential tool for those who want to keep their hedges and shrubs looking their best. These hedge shears are versatile and precise so you can maintain and shape the hedges easily and efficiently.

*"We heard the requests of our customers loud and clear - they were looking for a high-performance, long-lasting tool for hedge care. This was new territory for us, but our team of technicians were up to the challenge. They conducted extensive research and, with the help of professionals in the field, developed the **FELCO 250**. This tool was designed specifically to meet the needs of our customers." Says Nabil Francis, the CEO of FELCO.*

AN EFFECTIVE AND DURABLE CUTTING HEAD

The blade of the new **FELCO 250** pruning shear is the key element of this professional tool, with a design that prioritizes both performance and user comfort.

The bypass cutting system ensures clean and precise cuts, while the high-quality, hardened steel construction and a serrated section, allow it to easily cut through thicker branches, up to 15mm in diameter. This serrated section can

also be used to cut small wires. The precision ground blades are bent at 13° for improved ergonomics during trimming, making it easier to reach and trim even the most difficult branches.

In addition to its strength and trimming capabilities, the blade edge is chrome coated, for smooth cutting action and corrosion resistance. This coating also reduces the need for edge sharpening, making maintenance of these hedge shears easy.

THE ESSENTIAL TOOL FOR HEDGE AND SHRUB MAINTENANCE

The **FELCO 250** hedge shears are made to create neat lines and angles, and trim overgrown or unruly branches. They are also excellent for creating a uniform or geometric shape useful for topiary art. Their ergonomic design and soft cushioned shock absorbers make for comfortable use over extended periods.

The **FELCO 250** hedge shears are a versatile tool specifically designed for the care and maintenance of hedges and shrubs in a variety of settings such as gardens, parks, and other landscapes, making them an essential tool for any gardener and landscaper.

Products specifications & Unique Features

FELCO 250-57

Hedge shear

15 mm / 0.59 inch

570 mm / 22.4 inch

900 g / 1.98 lb

FELCO 250-63

Hedge shear

15 mm / 0.59 inch

630 mm / 24.8 inch

985 g / 2.17 lb

- Large blades with chrome coating, serrated section on the inner blade for cutting wires and thicker branches, for a clean and efficient trimming
- Chrome coating on the blades prevents corrosion
- High quality, precision ground, hardened steel blades, 15mm cutting diameter, bypass system
- Long-lasting cutting-edge sharpness thanks to chrome blade coating
- Grease bolt for easy maintenance and tool lubrication with out disassembling the tool
- I-Beam extruded aluminium handles for high resistance to physical force while extremely lightweight and durable
- FELCO's precision micro-metric adjustment system provides precise blade setting
- Ergonomic, phthalate-free, non-slip grips for optimal comfort
- Soft cushioned shock absorbers reduce fatigue
- All spare parts are available and can be replaced to extend tool life indefinitely
- Made in Switzerland using 100% green energy

Based in Geneveys-sur-Coffrane (canton of Neuchâtel) Switzerland, FELCO SA is a global leader in professional pruning shears and cable cutters. The Swiss company was founded in 1945 by Félix Fleisch. Today, still in the hands of the founder's family, it employs 200 people and produces more than one million hand-held tools and 200,000 industrial tools every year, 90% of which are exported to more than 100 countries. The company is particularly committed to sustainable development, both internally and externally.
