

SHARKPRO PROJECTS™

Project and Portfolio Management
for the Mid-size Business

Powered by
Microsoft®
Project Server 2010

SharkPro Projects™ is a preconfigured implementation of Microsoft® Project Server 2010 and SharePoint 2010 that can be deployed in just hours.

“Ready to go” rapid installation and configuration with built-in roles, dashboards, project templates, workflows, workspaces, and reports.

Project collaboration instantly available, improving productivity with collaboration through collaborative workspaces that include request generation, time management, calendar, task timer, and social media.

Easy adoption and enhanced user experience for team members and non-technical users with an intuitive web interface, web-based project editing, and integration with Microsoft Project Professional 2010.

“Ready to grow” with a running start and scalable growth path for organizations new to Project and Portfolio Management. SharkPro Projects makes it easy to start with Project Server 2010 and expose more powerful features as the organization matures.

Manage requests, resources, and plan projects to align with business objectives.

Better visibility and control of projects with a portfolio status overview, upcoming tasks, milestones, issues and risks, and alerts.

Lower and predictable IT costs with SharkPro Projects On Demand™, a hosted service for SharkPro Projects.

SharkPro Projects is ideal for your mid-sized businesses, department, pilot project, or new PMO.

***Deployed in hours on-premise,
or in minutes from the cloud.***
