LogPoint ranked #1 and named Leader in the 2019 SoftwareReviews SIEM Data Quadrant

LogPoint is emerging as the SIEM industry Leader in the 2019 SoftwareReviews Data Quadrant Report. Based on Peer Reviews by Cybersecurity professionals, LogPoint ranks as #1 out of 13 vendors, based on an impressive breadth of features and second-to-none customer support

COPENHAGEN, DENMARK & BOSTON, US – Oct. 9, 2019 – LogPoint, the Modern SIEM and UEBA company, has been named a Gold Medalist in the 2019 Data Quadrant Report for Security Incident and Event Management (SIEM) by SoftwareReviews, a division of Info-Tech Research Group, as the #1 SIEM solution preferred by customers.

 "We're extremely honored to be named a Gold Medalist in the 2019 Data Quadrant. I'm particularly proud that we are ranked as #1 when it comes to creating business value for our customers, and the fact that 93% of our customers are likely to recommend LogPoint to their peers," said Jesper Zerlang, CEO of LogPoint.

With an overall score of 9.1 out of 10, LogPoint emerges as a clear leader among the 13 SIEM vendors evaluated in the report. LogPoint is ranked as #1 in 13 out of 22 evaluation criteria in two main categories:

Product features and satisfaction	Vendor experience and capabilities
#1 Business value created	#1 Big data analytics
#1 Breadth of features	#1 Correlation
#1 Usability and intuitiveness	#1 Data enrichment
#1 Vendor support	#1 Data security and retention
#1 Ease of data integration	#1 Security threat visibility
#1 Ease of IT administration	#1 Threat intelligence
#1 Ease of customization

The advanced analytical capabilities of the LogPoint SIEM solution are highlighted by scores in evaluation criteria such as correlation, data enrichment,

and security threat visibility. LogPoint prepares data for correlation and enrichment by translating it to a unique, common taxonomy in real-time at ingestion.

This enables analytics and UEBA aided by advanced machine learning across all data sources, providing unprecedented security threat visibility. Despite the advanced capabilities, LogPoint focuses on providing market-leading time-to-value, emphasized by excellent evaluations in usability and intuitiveness, ease of data integration and customization.

"While providing great SIEM and UEBA technology is our key objective, LogPoint never loses sight of the business value objective. Consequently, we are providing our customers a licensing model that offers real predictive pricing, making sure they have full transparency of their SIEM cost years ahead," said Zerlang.

At the core of LogPoint, true predictive pricing is a node-based licensing model, rather than one based on volume (EPS/GB). This drastically improves the customer's ability to predict and control the total cost of ownership for their LogPoint SIEM - whether it is on-premise or delivered as a service.

About LogPoint
LogPoint is committed to creating the best SIEM in the world. We enable organizations to convert data into actionable intelligence: supporting cybersecurity, compliance, IT operations, and business analytics. LogPoint's Modern SIEM with UEBA provides advanced analytics and AI-driven automation capabilities that enable our customers to securely build-, manage, and transform their businesses. Our flat licensing model, based on nodes rather than data volume, drastically reduces the cost of deploying a SIEM solution on-premise, in the cloud or as an MSSP. LogPoint is easy to implement and offers unparalleled time-to-value. And Don't just take our word for it. 1,000+ customers agree, our service is consistently receiving a 98% customer satisfaction rating, and we are recognized by leading independent industry analysts.
