

Epomaker Upgraded TH80 Pro Into V2 - VIA Programmable With a Screen

Following the best-selling TH80 Pro keyboard, Epomaker presents the latest addition to the series, the TH80 Pro V2 VIA.

75% compact mechanical gaming keyboard with a customizable screen and a retro-themed outlook - The Epomaker TH80 Pro V2 VIA, is designed for extreme gaming and typing experience.

75% Compact Layout with a Built-in LCD Screen

79 keys mechanical keyboard - Epomaker TH80 Pro V2 VIA saves more desktop space while retaining the functions of a full keyboard. The Epomaker TH80 Pro V2 VIA boasts a remarkable 1.14-inch customizable RGB screen, offering a new dimension of interaction and personalization. As VIA compatible, the Epomaker TH80 Pro V2 VIA allows users to create macros and remap keys. Equipped with on-board memories, the key changes can be saved in different layers and the keyboard can be easily switched to different layers with a few shortcuts. The TH80 Pro V2 VIA is available in 2 themes, Retro White and Silver Black. In honor of the vintage style, the keycap of the keyboard features a retro white color scheme in the popular cherry profile and is made of PBT materials dye-subbed technique, making it more durable and resistant and staying true to the original color. Compatible Image Tool is available for customization to showcase crucial keyboard stats, system info, or personalized logos and animations.

Gasket Mounted with Hot Swappable PCB

Epomaker TH80 Pro V2 VIA comes in a fully ABS plastic case, making it lighter for carrying around. Featuring the most well-known gasket structure, the keyboard combines the PC plate with the structure, offering a soft and resilient keystroke to users. Resonated with the trends, the TH80 Pro V2 is equipped with a hot-swappable PCB socket that supports both 3-pin and 5-pin switches for users to swap out to different switches and have various typing experiences.

Triple Mode Connectivity with 3000mAh Battery

A keyboard must be convenient enough for multi-device workers and gamers to connect. TH80 Pro V2 VIA is available for three modes of connectivity, including wireless Bluetooth 5.0, 2.4GHz, and wired Type-C Cable. Within the wireless connection, the keyboard can connect three devices at most in Bluetooth and one device in 2.4GHz at the same time. And it can switch to different devices through simple shortcuts. Users can also opt for the wired connection with Type-C cable for a more stable and reliable connection. The cable connection is also for charging the keyboard. Apart from the above, the TH80 Pro V2 VIA also has amazing default RGB light effects that can be easily switched between each other with

simple shortcuts.

Price and Availability

The EPOMAKER TH80 Pro V2 VIA is available on our website, Amazon, and AliExpress now. The price goes to \$99.99 on the official website. The switches are available in five options. Different switches, same price.

About us

Epomaker is short for Epoch of Makers. We are committed to providing feature-packed keyboards with affordable pricing that ships worldwide. Our goals for our keyboards are three things: customizability, affordability, and high standards. We are a team composed of gamers, software engineers, product designers, and mechanical keyboard enthusiasts. We were inspired to create our own line of keyboards to share with the world. We wanted to make mechanical keyboards accessible to everyone. Our company is heavily dedicated to our community-without their feedback and suggestions, this keyboard would not have been a reality.
