

The Future of Extraction Technology

## FOR IMMEDIATE RELEASE

### ENTEXS SIGNS DISTRIBUTOR AGREEMENT WITH HEMP HARVEST WORKS

**Sacramento, CA, October 12, 2020** – **ENTEXS**, a Sacramento-based manufacturer of hemp and cannabis extraction equipment, has signed a distributor agreement with design, engineering and sales firm, **Hemp Harvest Works**. The agreement extends **ENTEXS** reach into the hemp grower market by promoting its closed-loop extraction technology to **Hemp Harvest Works** grower database.

Hemp Harvest Works is focused on delivering the latest resources in design, machinery and expertise to growers and producers in effort to improve their yields. The **ENTEXS** collaboration is the first and only hemp extraction technology offered by **Hemp Harvest Works**. This technology was chosen due to its efficiency at extracting CBD from low-CBD content hemp.

“Based on our calculations at current market pricing and production methods, farmers are not able to profit on crops with less than 5-8% CBD content,” says **Andrew Bish, founder of Hemp Harvest Works**. *“If farmers can reduce their seed costs and produce on an agricultural scale, 5% CBD content can make an attractive business model. ENTEXS is an important technology to make this process work.”*

**ENTEXS** was introduced with the intent to create a more efficient extraction process through its fully automated, continuous feed and closed-loop system. The solvent recovery, temperature controls and hands-free operation are key features to its efficiency.

*“Hemp Harvest Works is the place farmers visit to learn about the best machinery, technology and vendors, and we are honored to be included on this list,”* comments, **ENTEXS CEO, Ali Rashid**. *“Our distributor agreement gives us even greater reach into an important market.”*

The **ENTEXS** extraction technology is available now.

*Designed, engineered and manufactured in the USA*

The Future of Extraction Technology

## About ENTEXS

ENTEXS provides first-in-class technology with custom in-house manufacturing to evolve constantly and develop machinery for the hemp and cannabis markets' needs. Its patent-pending technology is a hands-free, continuous-feed, closed-loop system with no winterization necessary and accessible via cloud network raises the productivity, yields and quality of each extraction at high capacity, industrial scale. In addition to its complete systems, ENTEXS offers an extraction component catalog and supports system customers with services such as installation, site review, field verification, permitting, operation and more.

## About Hemp Harvest Works

Hemp Harvest Works is a design, engineering, research, and sales firm that offers large, medium, and smaller scale machines designed to reduce the overall cost of production. In addition to offering machines, we work to connect growers with custom harvesters capable of delivering above average results and provide consulting services for growers and harvesters seeking quality information. If you need a machine for your hemp – we can help. Our services include equipment sales, custom equipment fabrication, and operation consulting services.
