Content services to manage your data.
End to end data life cycle solution to modernize your enterprise.

What is Content Cloud?

Content cloud is an all-in-one Content Services platform that enables your organization to seamlessly find, access, and deliver your content with enterprise-level flexibility, scalability, interoperability and efficiency. At Systemware, we believe your success is our success. Our skilled development team built Content Cloud with a native set of capabilities that keeps enterprise needs in mind. By listening to our customers, we provide solutions that solve the business problems of yesterday, today -- and tomorrow.

We partner with our customers to create unique solutions that will provide businesses the ability to make better, smarter decisions by supporting their business-critical content strategies. We know it's not only about connecting the content throughout your enterprise, but also giving you the ability to easily find and access what you want, and delivering it in the exact context you need -- anywhere, anytime and from any stored location. Content Cloud connects legacy and distributed information across your organization, while delivering a personalized experience from behind a robust and flexible user interface.

You are never alone when questions arise. One key difference we pride ourselves in is achieving excellence in the overall customer experience, and that begins with our people. At Systemware, you have the benefit of a real person dedicated to your cause, available 24×7. Our employees believe in our mission and our product, and as a result, our clients see the immediate benefits of business partners empowered to succeed with a shared vision of moving forward.

Put Content Cloud to work for managing the challenges your organization encounters.

Capture content quickly and easily from across your information ecosystem

Manage your data with content rights, roles, regulations, and compliance – end to end

Automate content workflows and business processes

Find the exact content you need with speed and accuracy

Deliver the right content, to the right people, in the proper context

Why Content Cloud?

Content Cloud helps some of the largest companies in the world create information management efficiencies and extract value from their enterprise content. Organizations seeking solutions to transform how they connect their information without compromising usability or business continuity, look to Content Cloud as a content services platform that can solve their unique business problems and evolve with changing industry requirements.

Systemware has built a content services platform that solves your business challenges:

Increase employee collaboration and productivity
Automate business processes with robust scripting and content workflows

Reduce storage and technology costs
Save on storage and infrastructure costs with compression and cloud integration

Enhance content security and meet compliance regulations
Protect content and enhance information governance with controlled access and data masking

Increase the value and usability of your content
Locate and extract the exact content you need and transform it into your desired formats

Find information in multiple files and within legacy or 3rd party systems fast
Search, select, and retrieve content within a document through multiple levels of indexing

Create flexibility in pace with deployment without disrupting your business
Connect your legacy and third-party repositories and immediately enable and deliver historical data wherever it resides

Content Cloud: Innovation Realized

Content Cloud a content services platform that has features and functionality you can't find in any other ECM solution.

Content Migration
Migrate your legacy content to Content Cloud with the unprecedented speed of Systemware's proven Legacy Archive Processor.

Find Engine
Reduce storage space, lower cost, and decrease your reliance on a relational database with Systemware's intelligent metadata storage, the Find Engine.

Advanced Multi-level Indexing
Eliminate the time you spend searching for information with the ability to automatically index metadata down to an individual line within a document.

Segmentation
Dynamically segment your large reports into individual documents or portions of documents and transform and deliver them in the desired format – without altering the original content.

systemware

Who is Systemware?

Systemware is a pioneer in content management services. We help the world's largest and most regulated organizations manage their enterprise content with our content services platform, Content Cloud. For over 40 years, we have helped our customers simplify IT infrastructure, reduce cost-to-serve, create workflow efficiencies, and meet security and compliance requirements.

Systemware takes the time to listen to customer needs and learn about their unique business requirements. We then partner with our customers to modernize their content services platform with Content Cloud – and we pass that innovation on to you.

Systemware builds solutions aligned to business goals and helps our customers:

- Transform into a digital environment
- Breakdown and connect information silos
- Improve access to and use of content
- Optimize IT resources
- Improve workflow efficiency
- Create a better experience for users, customers, and partners

Systemware focuses on these guiding principles to deliver content services to support and deliver intelligent information management to our customers:

MODERNIZE	INTEROPERATE	AUTOMATE	PERSONALIZE	ENABLE
your content services	with disparate systems	business processes	user experience	business outcomes
Evolve to content services with legacy data access	Connect applications and repositories for seamless access	Improve people & process with automated content curation & delivery	Tailor to meet needs of individuals & organizations	Extract and enable data for business intelligence (reports, audits, analysis)
