Direct Components, Inc. Achieves AS9120A Certification

TAMPA, FL., March 4th 2016 - Direct Components, Inc., a stocking distributor of electronic components headquartered in Tampa, Florida, is very proud to announce that after an extensive quality audit by NQA, Direct has achieved registration to AS9120A. AS9120A is an international quality standard that was developed for distributors that supply to the aerospace/military industries. AS9120A provides a foundation for a quality management system focused on continual improvement, record control, counterfeit awareness, quality, conformity, and adherence to all requirements including statutory and regulatory requirements. This certificate is in addition to Direct Components' existing ISO 9001:2008 certification and has significantly enhanced Direct Components overall quality management system to ensure superior quality & customer satisfaction.

In accepting the registration certificate, Sunshine Hubbard, Director of Operations - North America, noted that "This is a reflection of the dedication of all of our employees to provide the highest quality of products and service. Being accredited to this globally recognized standard will create many new opportunities worldwide." Direct Components, Inc. President/CEO, Aaron Nursey, added that, "We are extremely pleased with achieving this important milestone. Direct Components, Inc. takes commitment to quality very seriously and our AS9120A certification is further evidence of this promise to our customers and suppliers. This certification confirms to our aerospace partners that they will receive the highest quality products and services every time."

About Direct Components, Inc.

Direct Components, Inc. is an Independent Stocking Distributor specializing in Obsolete and Hard to Find Board Level Components. Founded in 1998, Direct Components has developed an extensive global network of approved and trusted suppliers. This advantage over the competition has allowed Direct to procure high quality, allocated, obsolete, and hard to find parts at the lowest price and pass those savings on to customers.

In 2015, Direct Components, Inc. added an in-house lab with robust testing capabilities which include: X-Ray, Decapsulation, Electrical Testing, Memory Testing, and much more.

Direct Components is ISO 9001:2008, AS9120A, & FAA AC-00-56B Certified. Memberships include GIDEP, ERAI, SMTA, & BBB.
