Gary AI for DoW and Government Agencies - Under \$100K through September 30, 2025

Experience how CORAS' Agentic Decision Intelligence platform featuring **GARY AI** drives 10x-50x productivity and faster, smarter, more transparent decisions with Agentic AI, Intelligent Automation, and Advanced LLMs. This special rate through September 30, which includes enough tokens for 200+ active users

Gary offers speed, security, and real-time execution as an AI-orchestrator and turnkey solution. Built into CORAS, Gary AI is integrated at every layer and is fully embedded with built-in mission tools including readiness models, tradeoff engines, driver trees, and live decision support across IL5, NIPR, SIPR, FedRAMP-High and other trusted DoW environments. The CORAS platform and Gary deliver operational clarity from portfolio to program to execution level.

CORAS delivers the decision intelligence needed to meet agency demands. Up and running in days with no rip and replace, **talk to us about mission-speed decisions right now**. We are happy to connect you with government customer references and offer free trials with a .mil email address. **Go Faster with Gary.ai**.

GARY.AI

The Agentic AI agent for mission-critical execution across the Pentagon and beyond.

www.gary.ai

- GARY is secure, sovereign AI, built with Claude via AWS Bedrock.
- GARY drives dynamic decisions with actionable clarity, AI-orchestrated options, and is context-aware.
- GARY's outputs provide full transparency, resource and logic tracing, and auditability.
- GARY is fast to deploy. Easy to use. No code needed.
- GARY is a digital partner that actively transforms vast streams of data into actionable intelligence, not a bot that merely answers questions.
- GARY teaches and trains its users in how to prompt/query more effectively.
