Cyngular Difference

Cyngular
Patient Care Management

Function	Cyngular	EMR Patient Portal
Patient Engagement	Interactive/Continuous	Visit Follow-up/Discrete
Vital Alert	Alert based care	No
Medication	Complete Management	Refill request
Engagement by staff	Yes	Only if requested
Engagement by physician	No	Yes
Population Data Build	Continuous	Sporadic
Patient Participation	Continuous	80% or better	On need basis	40% - 55%
Physician Message Overload	None	Possible
Patient Retention	High	N/A

Cyngular is designed to provide continuous and interactive patient engagement with at home patients. The resulting outcome is multi-fold. It generates need for Vital Alert based care need. It is managed and monitored by facility staff with escalation to physician only if warranted. This eliminates Patient Portal Messaging overload from physician. Cyngular aid in generating large Population Data Set due to higher patient enrollment, on-going interactive engagement and effective data points. It is a complementary tool to the EMR based Patient Portal and Messaging.
