The Advantage of

Data-Aware Cloud Storage
for Law Firms

Simplify Your Firm's eDiscovery Practice with the Cloud

Unstructured data is expensive to store, manage, and protect. Law firms that retain customer data as part of their eDiscovery practice are storing this low-touch, high-risk data on expensive primary storage arrays which are prone to ransomware, costly to operate, and have no chargeback and data management capabilities.

HubStor is the world's first data-aware cloud storage for businesses that require a Fort Knox high-security data storage solution that is low-cost, searchable, and integrates with their existing infrastructure and security, and includes data governance in the cloud.

☑ Safeguards client data against malware and ransomware.

☑ Reduces storage costs by 76-87%.

☑ Offloads primary storage; to avoid or defer buying new storage.

☑ Simplifies and augments backup and disaster recovery.

☑ Streamlines litigation and investigation scenarios.

☑ Satisfies contractual requirements for data retention.

☑ Enables chargeback and retention.

DEDICATED HUBSTOR TENANT IN AZURE

Self-service Data Governance

☑ Analytics
☑ Auditing
☑ Search
☑ Retention
☑ Tagging
☑ Litigation Hold
☑ Chargeback
☑ System Monitoring
☑ Data Leak Prevention

Fully-managed Cloud Infrastructure

☑ Redundancy
☑ Hot / Cool Storage
☑ Search Cluster
☑ Scale Up
☑ Scale Down
☑ Pay As You Go

Enhance Security and Perform Chargeback

Hackers now realize that most law firms store their client's litigation data. This makes you a target. With data-aware cloud storage, you can reduce costs, mitigate risk, and perform chargeback on your customer data.
