# daminion®

The leading DAM solution

The easiest way to organize all your digital assets

The Digital Asset Management solution that increases productivity of marketing, design and sales teams by 30% on average

Reduce the time and cost of asset retrieval and content production

More than 750 companies use Daminion

## 50,000+ users across the globe

Who needs Daminion:

Daminion is universaly usefull:

1 **Designers** can improve their creative workflow and save 100s of hours per month to take on new projects.

2 **Marketers** can achieve end-to-end brand consistency across all channels and regions. Approve, comment, and distribute marketing materials centrally.

3 **Sales Managers** can work faster and smarter. Quickly find and present the best product shots, most relevant to the clients.

4 **GIS Specialists** can use Daminion to recognize GPS metadata in the images and automatically display them on a map.

5 **Photographers and Videographers** can speed up the file search. Find the right videos quickly by using tags, and having quality thumbnails.

# Stamp photos with GPS coordinates and display them on a map
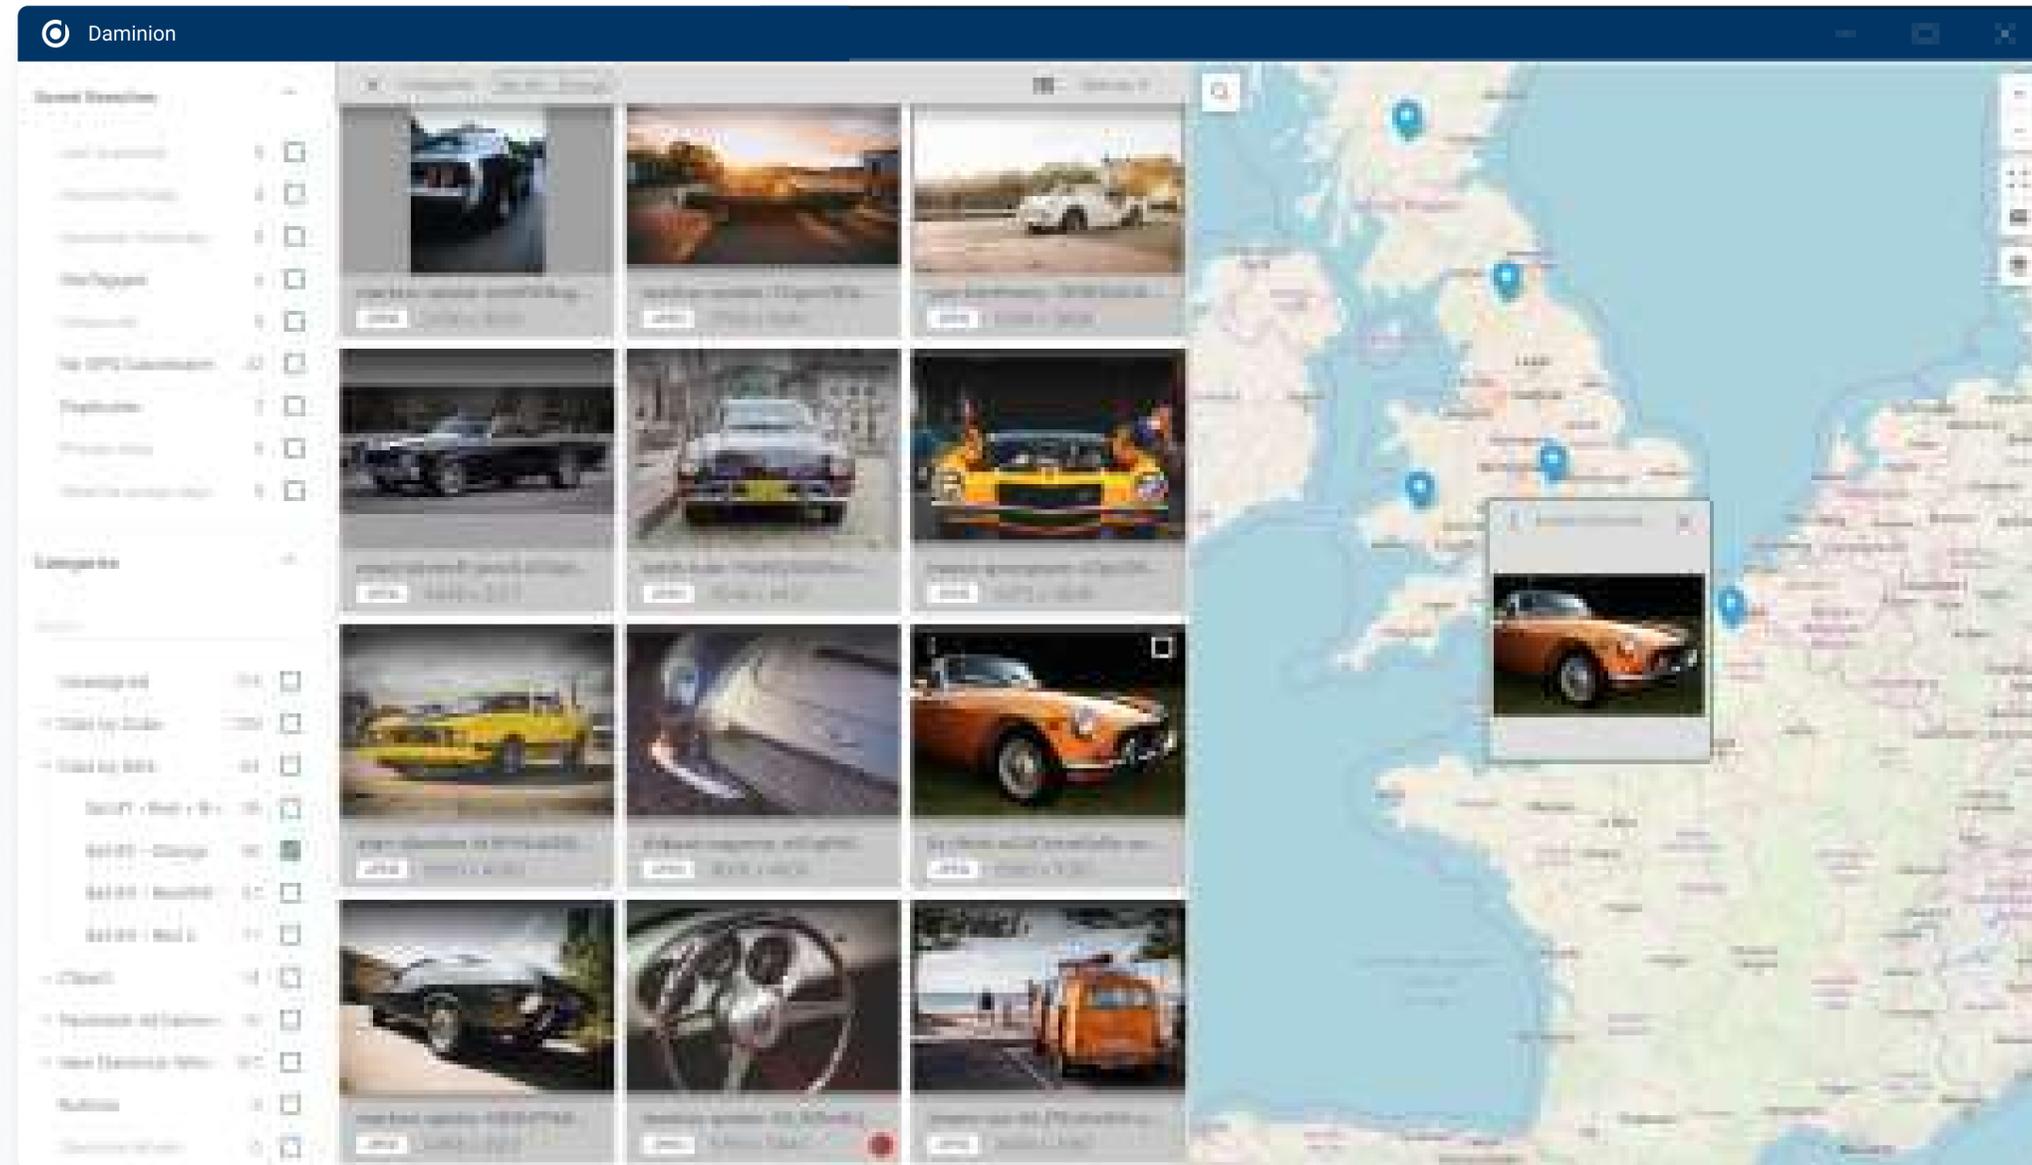

Cut Costs

Use your existing digital assets without having to recreate them every time. You don't need to create new designs from scratch just because you can't find them.

Organize

Daminion helps you to organize and keep track of all your digital media by using tags and having a built-in versioning tool. It will improve your working process, increase your productivity and keep your sanity.

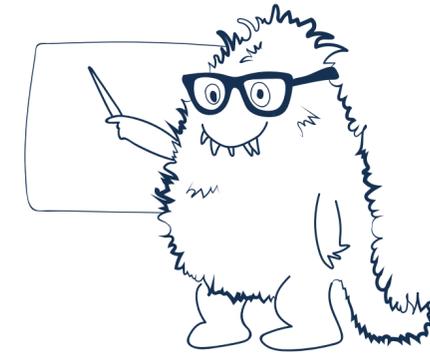

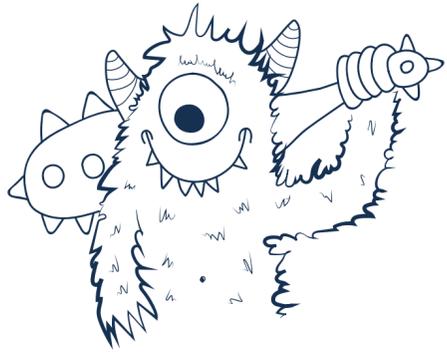

Save Time

Save 100s of hours per month by reusing existing assets stored in an easily searchable media archive. Create client presentations and marketing collateral 5 times faster.

Using asset versioning in Daminion ensures you're always working with the most current assets
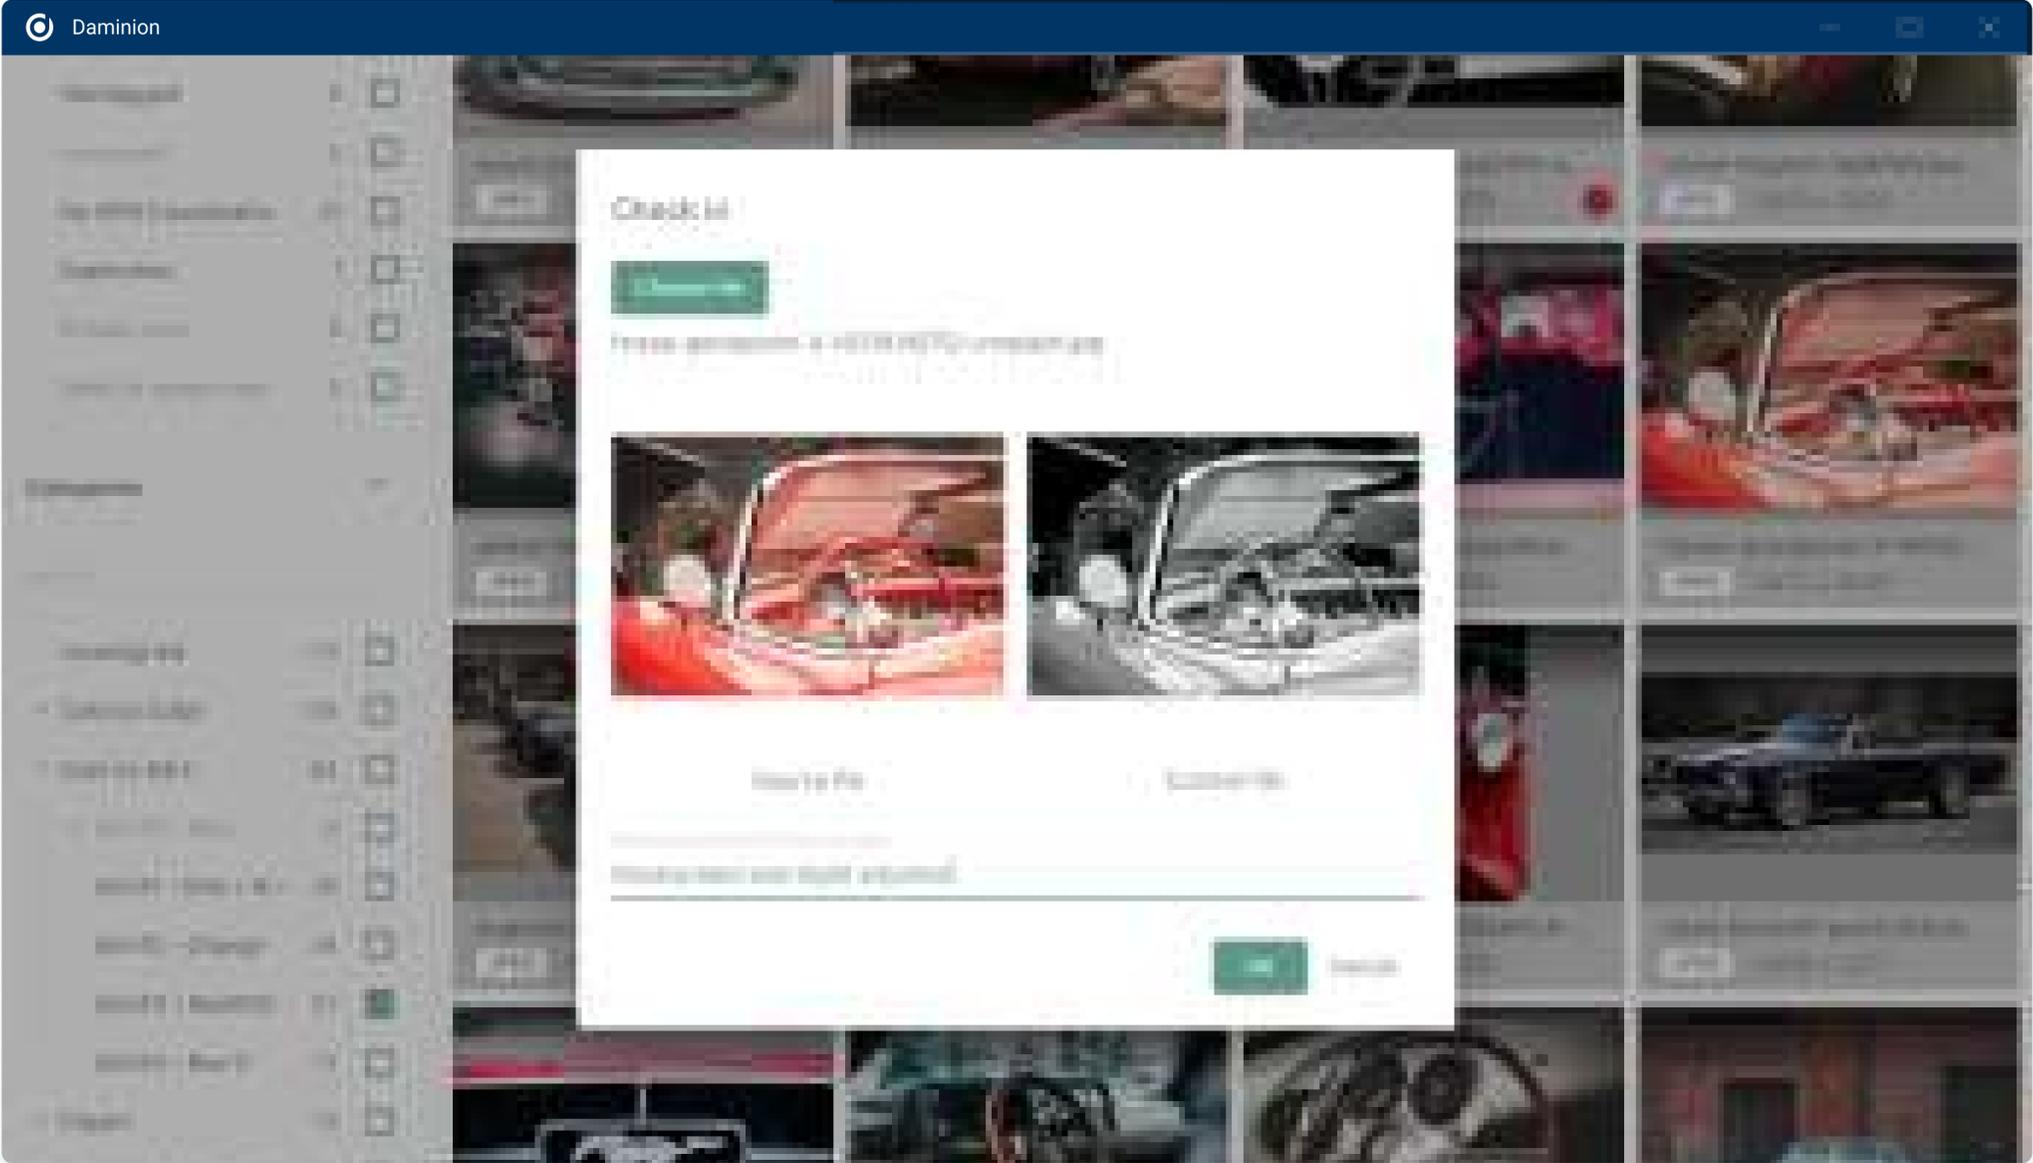

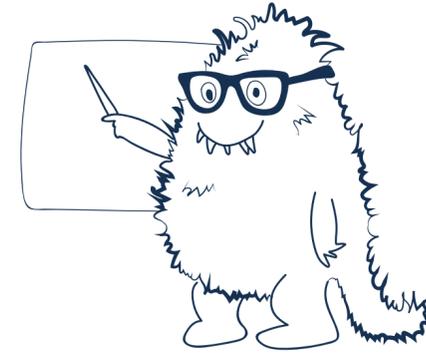

Data Security

Daminion protects access to your data by letting you configure the user roles. Be as granular as you like because Daminion's role structure is very flexible.

Geotagging

Daminion is capable of recognizing geodata and visualizing your assets on the map.

If geodata is missing, just drag and drop images onto the map to add the right geotag.

Collaborate

Marketers and designers can collaborate 10 times faster by using Daminion. It has a lot of built-in tools to manage document versions, comment and annotate your work, and even cross-collaborate across departments or externally.

The leading DAM solution
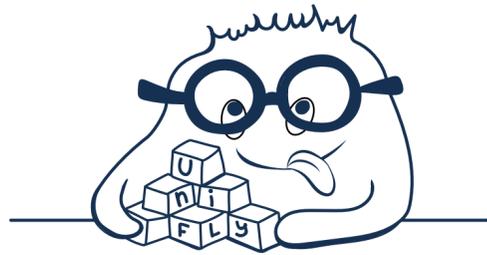

Unify

Daminion unifies all your media scattered across different computers, servers, and other locations by centralizing it in one access point.
All your team members, can now get access to the files they need in an instant.
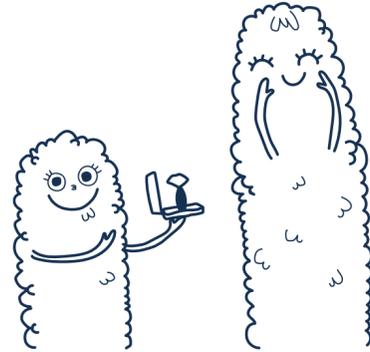

Forget seeing double

No more document collisions or confusion among your colleagues. Daminion prevents file re-importing, so no duplicates are created, ever. It also finds and lets you eliminate existing duplicates.
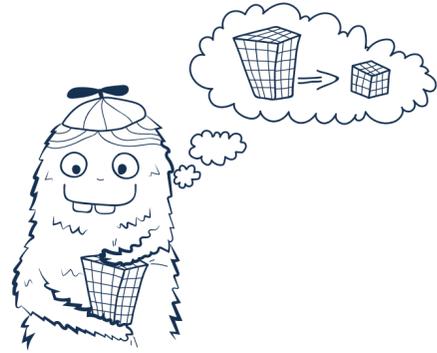

Integrations

Daminion can be easily integrated with your local and cloud solutions, for example corporate CMS, Adobe Creative Suite, Dropbox, MS Office, etc.

One-click sharing

Old-school sharing methods (eg. email) have severe file size limitations. Share your digital assets via a personalized link with Daminion, without any size limits, instantly.

Resize on-the-fly

You don't need to install Photoshop on all your company computers just to download a resized image copy.

With Daminion you can download a JPG resized to your custom presets. Optimize file size for Retina displays; remove metadata; apply watermark; add your copyright; and more.
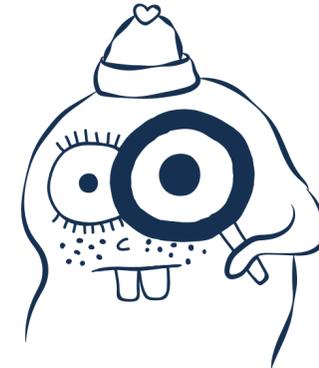

Preview all media formats

Daminion lets you instantly preview 100+ media formats including all photos, videos, vector images, office documents, PDFs, audio, CAD formats, etc.

You no longer need to open each file with a generic icon (using Adobe Illustrator, InDesign or alike) just to see what's in it.

Supported media formats

Daminion supports a large number of media formats including raster, vector, RAW images, video, music, documents, audio files.

Vector Image Formats

AI, EPS/PS, InDesign, WMF, EMF, PDF, SVG
