

FLASHPAS

FlashPAS systems range in speeds from 5 gallons per minute with a dedicated hold time, to 10 - 30 gallons per minute with optional triple hold times and integrated ProCarb inline carbonation technology.

BATCHING & BLENDING

Designed to quickly and easily batch and blend multiple streams of product utilizing our patented injection and dispersion technologies.

PROSERVICE

24/7

Service & Support from highly skilled technicians with a combined 150 years experience.

PERFORMANCE, PACKAGED

TURNKEY BREWERY & BEVERAGE PROCESSING SOLUTIONS

S&P

SYSTEMS &
PROCESS

PROCARB™

Inline carbonation systems allow for 400% faster gasification from tank to packaging with up to 100% CO₂ utilization.

PROCARB PLUS

Patented ProBrew Carbonation & Nitrogenation technology combined with Alfa Laval Centrifugal Separation Technology offers the perfect gasification with perfect beverage clarity.

PROCARB MINI

ProCarb MINI utilizes the same proven carbonation technology in an ultra portable, mobile design. Get faster, more efficient carbonation with repeatable results.

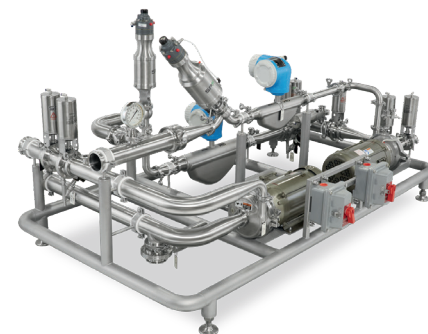

ALCHEMATOR™

N/A? No problem! Proprietary membrane technology separates the alcohol from the beer to easily craft N/A beer or hard seltzer.

ALCOHOL CUT SKID

The Alcohol Cut Skid is designed to allow beverage producers to meet the Class 1, Div 1 regulations by cutting high-proof alcohol/spirits to 20% ABV or less.

MOBILE OPTIONS FOR CARBONATION, DEAERATION, AND CLEAN-IN-PLACE SYSTEMS

ProBrew provides mobile solutions that can upgrade a brewery's processing at the appropriate scale. These mobile solutions also allow for little impact to the buildings footprint.

PROFILL ROTARY CAN FILLER AND SEAMER

ProFill Rotary Can Filler and Seamers run at speeds between 100 - 600 cans per minute and utilize true counter pressure gravity filling technology. The ProFill is able to achieve less than 30 ppb (parts per billion) dissolved oxygen pickup in each can as well as significantly reducing product waste.

The ProFill V Rotary Can Filler and Seamer is our volumetric can filling option. Users can experience up to 3-times the filling accuracy when compared to other standard mechanical filling models.

FERMENTATION AND BRITE TANKS

Stainless steel tanks ranging from 3 bbl - 200 bbl sizes with ProBrew automation to effectively monitor and control brewing processes throughout your facility.
