MILLION PEOPLE WITH CHRONIC DISEASES BY 2030

Provider Connected

We use technology, innovation, data analytics, and expert care coordination to connect Providers to their patients outside their regular office visits and as they transition between settings of care. Connecting patients to the provider and reducing the time for the provider.

Patient Centered

We put the patient first. Our goal is to advocate, communicate, and remove the complexities of the Patient-Provider relationship. Providers depend on us to communicate with, analyze, educate, and triage their patient population as an extension of their practice.

Personally Coordinated

Our Care Coordinators are committed to patients' well-being. We formulate relationships with patients that strengthen trust and rapport with their Physician. Our rapport with patients enhances the Providers' ability to make informed decisions on care planning and prevention.

Ancillary Services
