

- 3', 4', 5' and 6' lengths
- Full strength instant light start up with no buzzing or flickering
- Fast and easy installation
- Environmentally friendly - eliminates the mercury present in fluorescent tubes, fully recyclable, drastically reduces landfill problems caused by fluorescent lights
- **DLC** listed – qualify for all utility and government rebate/incentive programs
- **50,000 hrs rated life**
- **5 Year Warranty**

LED Refrigerator/Cooler Lighting Systems

- Major Power Savings - Compared to fluorescent tubes, more than 50% less power usage dramatically reduces energy costs
- Lower Maintenance - Lasts 50,000 hours resulting in lower costs by reducing re-lamp frequency, especially in difficult to reach areas
- Cool Operation - Remains cool to the touch, fire safe, reduces refrigeration loads significantly
- High efficiency constant current drive system (with heat protection) that can work under unstable voltage conditions
- “V” shaped aluminum PCB aims the light in both directions for superior illumination in the refrigerator/cooler cases
- High shock & vibration resistant body with polycarbonate lens eliminates the hazard of glass tube breakage or the additional expense of light robbing plastic tube guards - a major problem in the food industry, food displays
- No Radiation - No ultraviolet or infrared, No RFI/EMI/HD problems related to fluorescents
- Flexible Ambient Temperatures - Greater performance in the cold or freezer-type applications where fluorescents have very high failure rates
