Qualityze is a Next Generation quality management solution provider helping enterprises address their compliance, regulatory, and quality-related challenges. We enable organizations to align their processes with quality objectives and strategic metrics. Our objective is to improve organizations' maturity and prepare them for competitive changes with Smarter Quality Solutions.

The Qualityze Enterprise Quality Management Solution helps meet your quality, compliance, and regulatory requirements by leveraging Industry best practices with standardized, repeatable processes through easy-to-configure, predefined workflow templates. Our integrated design connects all the QMS processes for a complete solution.

Organizations, regardless of their industry focus, can perform quick real-time analysis of their quality data with integrated analytics and reporting capabilities. Immediately notify quality teams of upcoming Reviews, Audits, Training sessions, Follow-up Tasks, Actions, Approvals, and Change Implementations.

Qualityze, built upon the world's most secure and reliable platform, Salesforce.com, which enables your quality teams to manage end-to-end quality processes from anywhere around the globe.

Transform your business with a quality decision-making engine.

Nonconformance Management

Qualityze

Streamlines your Defect and Deviation Management Processes

NC Initiation · Product · Resolution · Containment · Disposition · Investigation · Implementation · References · Closure

- ➔ **Identify the Issue**
- ➔ **Document/Report the Issue**
- ➔ **Evaluate/Review the Issue**
- ➔ **Segregate the Nonconforming Material**
- ➔ **Dispose of the Nonconforming Material**
- ➔ **Investigate the Nonconforming Material for CAPA**

A nonconformance issue arises when a product does not meet the specifications or requirements as required by your compliance targets/goals. Such issues need to be identified, documented, and resolved on an immediate basis, based on compliance and quality standard targets.

Qualityze Nonconformance Management streamlines your defect and deviation management processes by providing closed-loop workflows that document, verify, disposition, and investigate product and process nonconformances, noncompliance, and deviations.
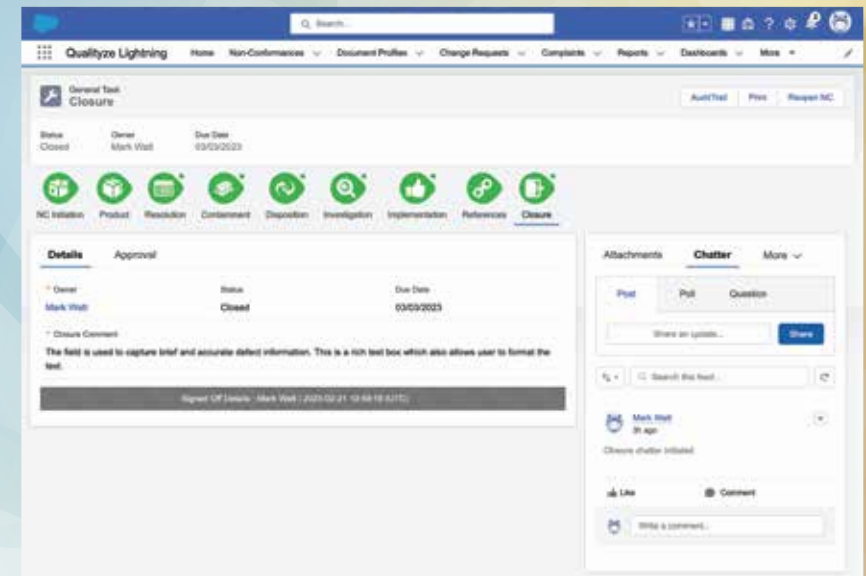

You can further review the impact by assessing the risk threshold to escalate to CAPA or continue the Nonconformance to contain, track, and dispose nonconforming materials or products.

The investigation step allows you to identify the root causes and implement your Risk Based, Corrective, Correction, or Preventive action plans. A product's quality, reliability, and safety depend on its conformance and compliance with internal and external specifications.

CAPA Management

Compliance-Driven CAPA Management Solution to Address Systemic Issues

- Initiate a CAPA with Critical Information
- Plan the Resolution Activity
- Investigate the Risks
- Perform Root Cause Analysis and Risk Assessment
- Define and Implement the Action Plan
- Perform the Verification and Effectiveness Steps
- Resolve the Quality Issues
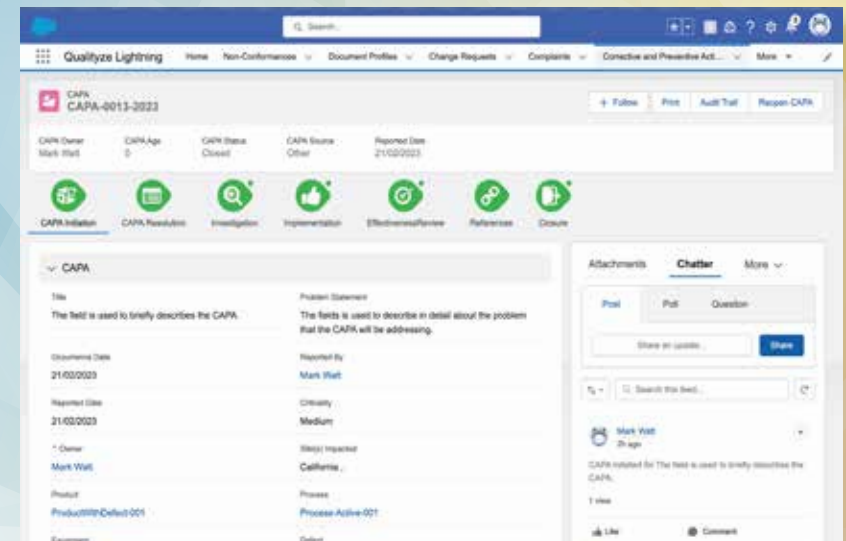

Qualityze CAPA Management enables organizations to develop a risk-based, compliance-driven process for addressing systemic issues to prevent a recurrence. It guides the user with a comprehensive approach to mitigate quality issues while meeting compliance and fostering a culture of continuous improvements. Initiate the CAPA process by documenting critical information such as Problem Statement, Defect, CAPA Source, Product, Process, Criticality, Severity, Initiating Site, Risk Assessment & Immediate action taken. You can perform the investigation with one or more investigation tools to identify potential root causes. Additionally, using risk matrix, risk assessment is performed to determine the visibility of the risk and assist in developing the appropriate action plans. Based on the root causes identified, you can develop and implement the action plans such as Risk Based, Correction, Corrective, and Preventive. Use a holistic approach with risk assessment and root cause analysis to eliminate inconsistencies from your quality system.

The investigation step allows you to identify the root causes and implement your Risk Based, Corrective, Correction, or Preventive action plans.

Document Management

Qualityze

Manages Critical Control Documents Effectively and Efficiently

- Create and Collaborate Critical Documents
- Review and Approve Critical Documents
- Associate Reference Documents
- Setup Training Requirements
- Release Critical Documents
- Obsolete and Archive Critical Documents
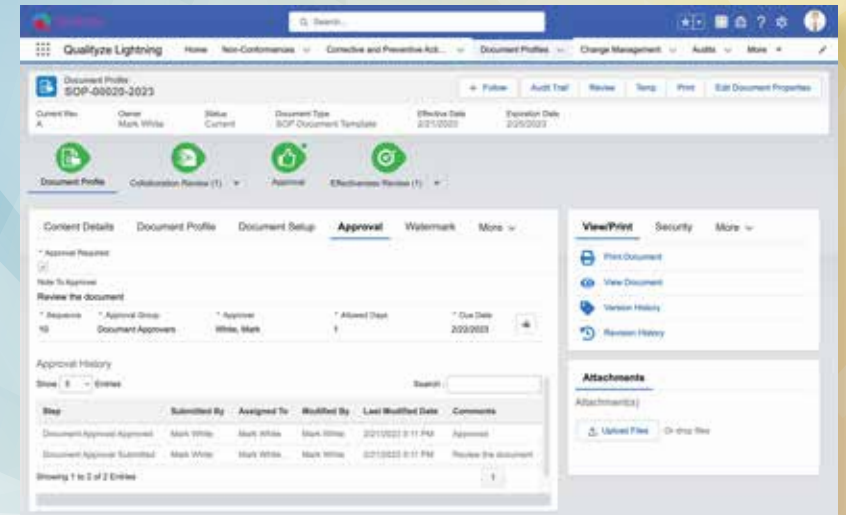

Qualityze Document Management enables organizations to create, collaborate, revise, approve, and train employees, providing a robust framework to meet industry and regulatory requirements. Our Document Management helps you cost-effectively manage, share Critical Control Documents like "SOP's, Work Instructions & Forms" and best practices throughout your entire enterprise. Create Document using standardized document type templates that contain details like Title, Description, Owner, Effective Date, Expiration Date, Site, Department, Product, Process, Supplier, and Security information. Accelerate the document review and approval process with capabilities

such as Email Notification and Approvals, real-time Training requirements, Watermark, Collaboration and Electronic Signatures. You can further review the documents created for the adequacy of the information and approval prior to publishing the same. The industry best practice periodic review can be conducted using the effectiveness review task, to keep the document in current or revise or expire status through an approval process.

A product's quality, reliability, and safety depend on its conformance and compliance with internal and external specifications.

Change Management

Standardizes the Change Management Process to Minimize Change Impact

CR Initiation | Resolution | Document Change | Product Change | References | Closure

- Initiate and Document Change Request
- Review and Approve Change Request
- Notify the Change to Impacted Users
- Reduce Change Implementation Time
- Ensure Compliance with Regulatory Standards
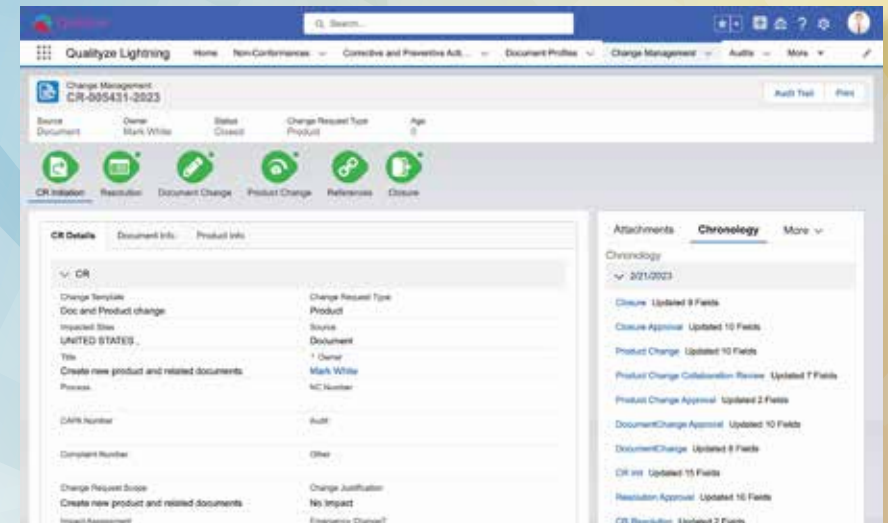

With the emergence of the new regulations and increasing complexity of the existing regulations, the effort to minimize the loss of quality while managing ongoing changes has become more challenging than ever. Qualityze Change Management provides you a standard process to record, review, approve, and implement change. You can minimize the change cycle time and its impact on everyday operations.

Initiate a change by documenting the title, description, scope, justification, department, priority, and more. Additionally, you can perform a preliminary Impact assessment of a document, department, product, process, equipment, infrastructure, or IT. You can review and approve the change request to confirm the validity before the implementation process.

Record the impacted functional areas, documents, assign tasks, and action plans that need to be implemented. Further, you can notify the impacted people about the change with the built-in capability of real-time notifications and dashboard. Early notification accelerates the planning & implementation process.

Training Management

Qualityze

Cloud-Based Training Management Solution to Enhance Your Workforce Competency

- ➲ Perform Document-Based or Instructor-Led Trainings

- ➲ Create Relevant Training Requirements Based on Roles, Departments, and Business Units

- ➲ Centralize and Manage All Training Initiatives

- ➲ Effectively Monitor Training Achievements

- ➲ Get Complete Visibility into Training Performance
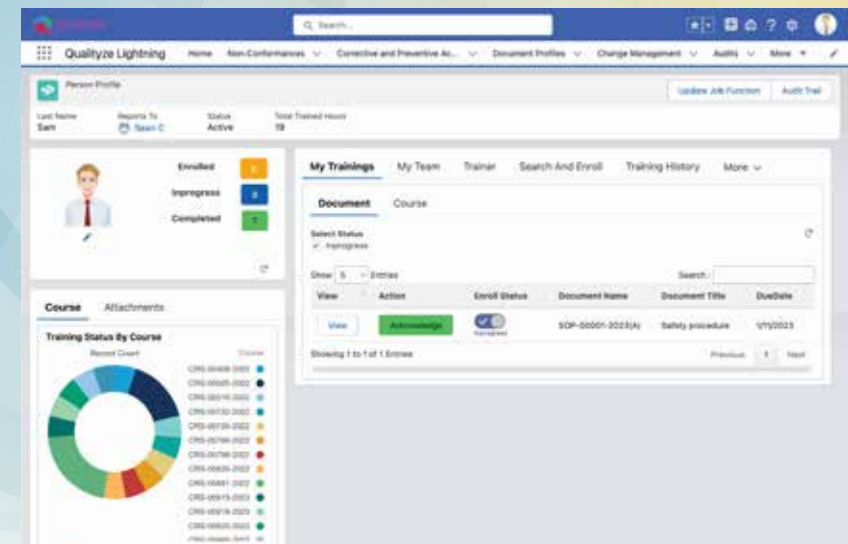

Managing and maintaining employee training records is one of the key parts of quality programs of any company – big or small. Qualityze training management is a cloud-based, intuitive and comprehensive solution designed to manage, execute and maintain training programs of your organization. It allows you to organize all the training essentials that your company's training team requires including certifications, qualifications, and training records in a central repository, to remain compliant with internal and external requirements. You can create specific training requirements by setting up relevant job functions for a department, business unit, process, location, site and/or individual.

Qualityze Training Management is seamlessly integrated with Document Management to further define training requirements of your critical documents such as SOP's, Work Instructions & Forms. Utilize refresher training options and define pre-requisites to enhance training requirement. Qualityze Training Management comes with two types of training processes, document-based training or instructor led training. The Document based training can be Read and Sign off or have employees go through a Read and Sign off with Assessments. Instructor Led Training can help in Class room trainings, Group Trainings and others.

Audit Management

Manages End-To-End Audit Process on Cloud

Initiation   Complete Checklist   Observations   Audit Closure
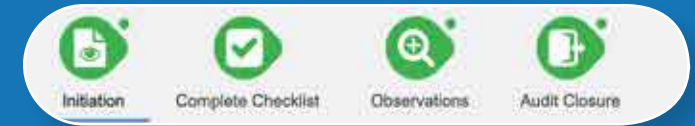

- Create an Audit Plan
- Schedule the Audit
- Prepare for Audit
- Execute the Audit
- Track Audit Findings
- Perform Follow-Up / Closure
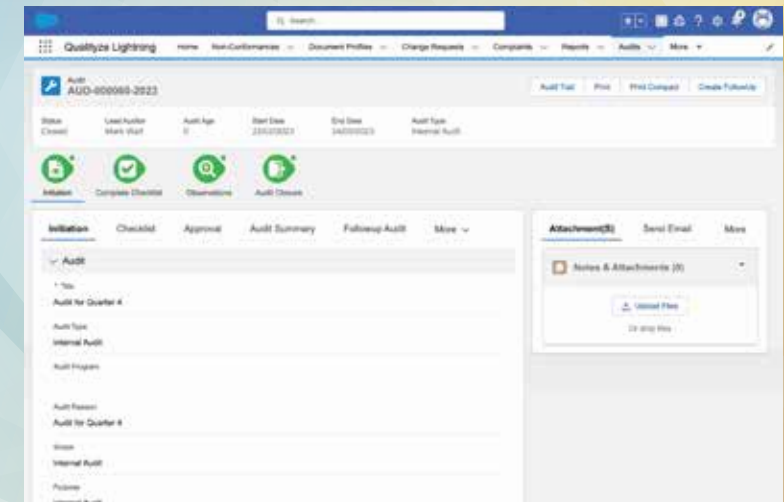

Qualityze Audit Management manages compliance and risk with end-to-end process management of internal and external audits. Qualityze Audit Management enables organizations to:
(a) Implement Industry Best-Practice Audit processes
(b) Improve Audit Efficiency and Reduce Cost
(c) Effectively Manage Audit Findings
(d) Enhance Visibility of Audit Results
(e) Drive Continuous Process Improvement

Effective and timely audits improve product quality and safety while ensuring compliance throughout the supply chain.

Audit Management's configurable workflow streamlines the audit lifecycle, allowing auditors to create, schedule and perform audits more quickly than ever before.

Audit management is crucial to ensuring regulatory compliance and fostering a continuous process improvement. With robust features, intuitive user interface and capabilities such as digital signature, audit trail, audit calendar, pre-defined checklists, audit scheduler, offline capability, and much more, makes Qualityze Audit Management a truly global solution.

Complaints Management

Qualityze

Streamlines Complaints Process to Manage Customer Responses

- Document Customer Issues
- Identify the Type of Compliant
- Perform Risk Assessment
- Review Device History Records
- Conduct Product Evaluation
- Perform Investigation with RCA
- Manage Customer Responses
- Implement Action Plans
- Global Regulatory Reporting and Submissions
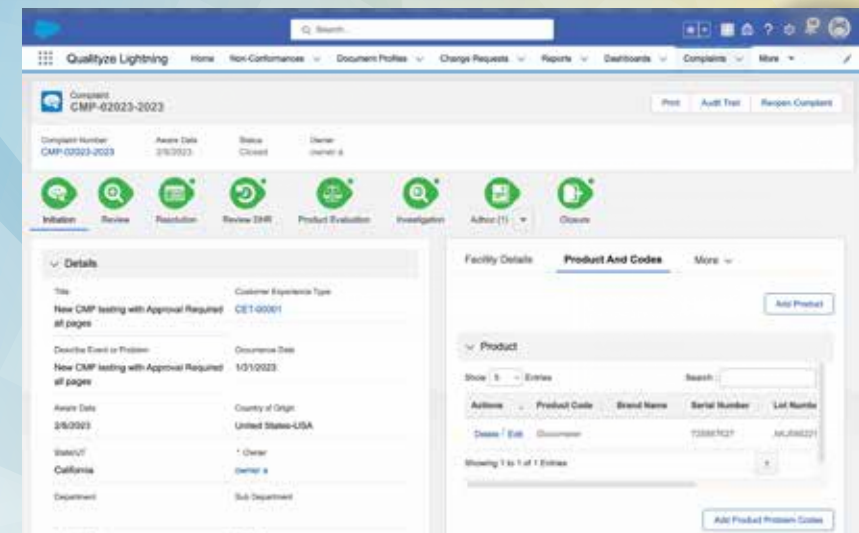

Addressing customer issues and adverse event reporting on time is very important to all industry. A robust complaint handling system is essential to any quality management program. Qualityze Complaint Management provides a closed-loop mechanism to implement effective, timely resolutions to customer issues and adverse event management. It complements your established complaint handling process by enabling you to effectively manage and implement full complaint life-cycle. It helps you to:

(a) Streamline and standardize the complaint management process for a quick resolution.

(b) Increase visibility through the processes to identify and develop better action plans.

(c) Simplify the regulatory submissions, regardless of demographic locations.

(d) Retain customer confidence with improved communication.

(e) Achieve compliance through documentation and reporting.

Effective management of customer complaints and regulatory reporting are an inevitable part of every regulated industry. Hence, creating a standardized complaints management process can help turning customer complaints into amazing opportunities to grow.

Manage the Supplier Qualification Process with a Supplier Scorecard

- **Track and Manage the Qualification Process for Potential Suppliers and Vendors**
- **Maintain Complete Records of all the Evaluated Suppliers**
- **Effective Communication with Suppliers to Provide Feedback**
- **Manage Approved Supplier List (ASL)**
- **Prepare and Share Supplier Scorecard**
- **Integrate with Existing ERP System**
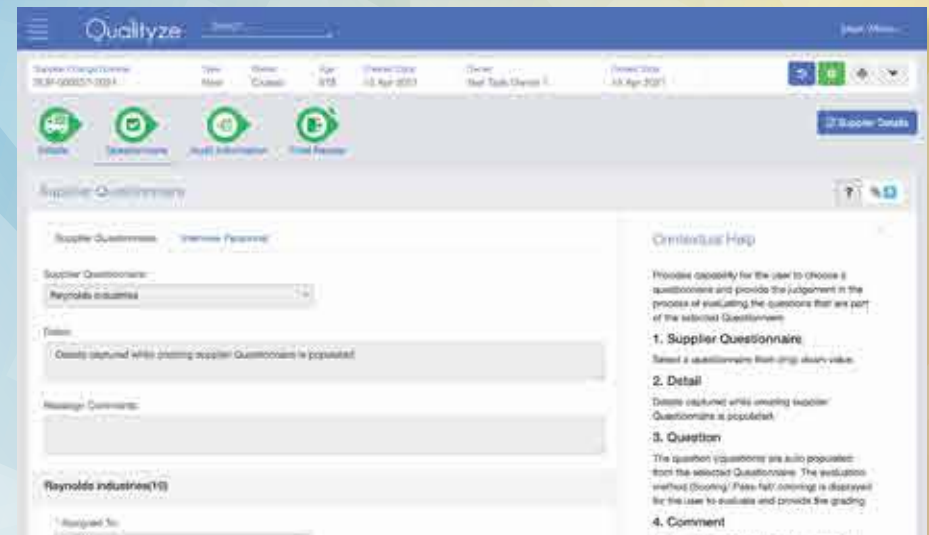

A quality of a product starts at the supplier selection process as the suppliers play a vital role in bringing the product to the market. Qualityze Supplier Quality Management Solution enables organizations to streamline and standardize their supplier-related processes and operational challenges. It allows you to track and manage the supplier qualification process, supplier data, certifications and more.

Initiate supplier qualification process through a supplier change request by capturing details like Supplier Name, Category, Site, Addresses, Contacts, Type, Certifications and more. Using the supplier onboarding questionnaire, you can verify if all the criteria are met. You can utilize the Supplier Part-Location Matrix to create and maintain parts/services the supplier can provide for different locations. You can perform the supplier audit to assess the supplier capabilities and proceed with the supplier approval process to get the supplier onboarded formally. Our Supplier Quality Management Solution can be seamlessly integrated with our Document, Audit, Nonconformance, CAPA and Inspection management system to manage all the supplier related activities with ease and convenience. You can utilize Supplier portal to communicate with your suppliers regularly.

Calibration Management

Qualityze

- Ensure Equipment Accuracy
- Comply with Standard Values
- Control Inconsistencies in Product and Service Quality
- Maintain Your Assets for Longer Time
- Minimize the Downtime and Wastage
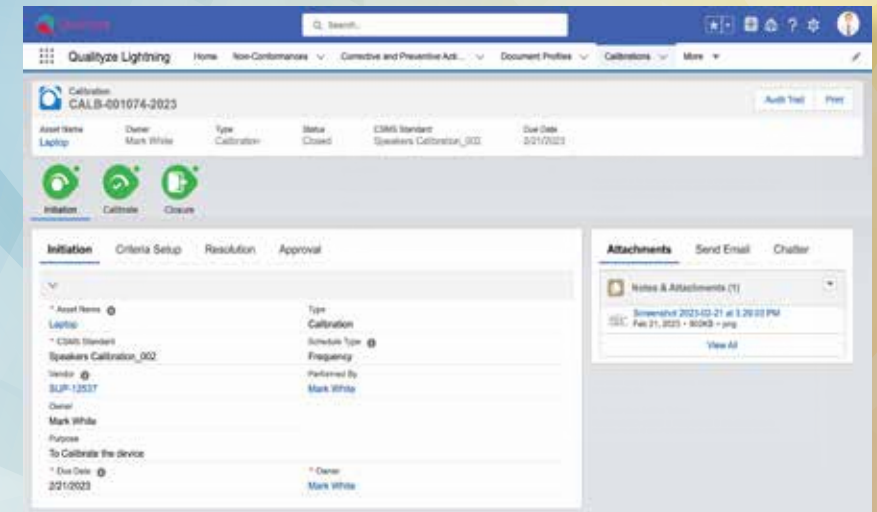

It can be a daunting task for any industry to guarantee a routine calibration of all inspection, measuring, and test equipment for its intended purposes and to demonstrate it can produce valid results.

Qualityze Calibration Management Solution allows organizations to manage their critical assets by streamlining calibration programs while complying with regulatory requirements. It can be seamlessly integrated with existing quality management systems to leverage single- and multi-site calibrations effectively and efficiently.

Initiate the Calibration process by creating the criteria library of attributes and variables, by capturing Criteria Name, Description, Measurement Values, Tolerance (-), Tolerance (+)

You can then create asset profile with details like Asset ID, Name, Type, Status, Location, Physical Location, Owned By, Custodian, Last Calibration Date, Calibration Performed By, and much more for each asset.

Maintenance Management

Qualityze

Ensure Safe Functioning of the Equipment for Hassle-Free Production

Initiation   Maintenance   Closure

- Ensure Good Health of Equipment to Avoid Failures
- Comply with Standard Requirements
- Reduce the Production Costs and Maintenance Costs
- Maintain the Life of Productive Assets
- Make Optimum and Efficient Use of Assets
- Improve safety for the employees
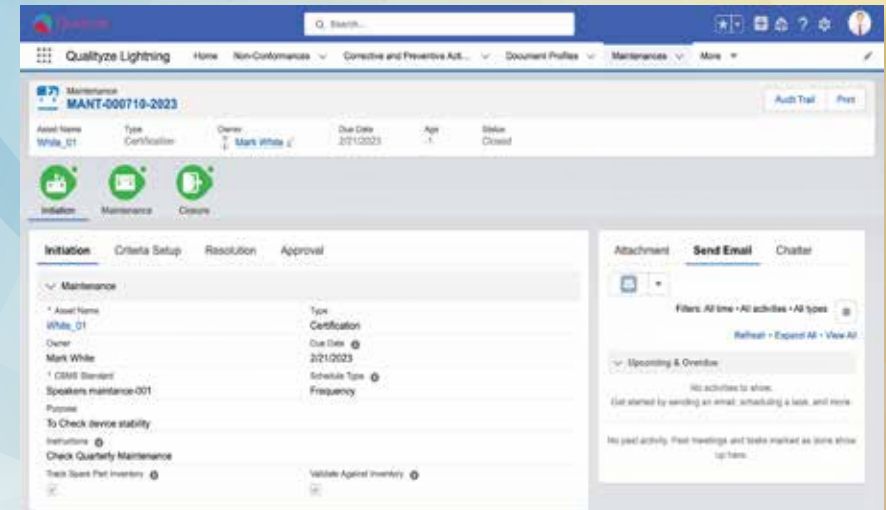

Qualityze Maintenance Management Solution allows organizations to create and manage the maintenance programs to ensure safe functioning of the equipment and hassle-free production. You can integrate Qualityze with existing quality management systems to streamline the maintenance activities more efficiently.

Initiate the maintenance process by creating the criteria library of attributes and variables, by capturing Criteria Name, Measurement Values, Tolerance (-), Tolerance (+) to measure the degree of exactness of every asset.

Further, you can create the spare part library to keep an account of all the spare parts that keep the equipment and devices functioning as designed. You can create the spare part details like Spare Part Name, Part, Quantity on Hand, Threshold Quantity, and the status. Every time the spare part quantity reaches the below Threshold Quantity, the owner will be notified.

Enhance the performance of your assets, including equipment and spare parts, while decreasing the downtime and overall maintenance costs.

Inspection Management

Streamline Inspection Related Processes to Avoid Nonconforming Materials

Initiation Resolution Inspection Reference Closure

- **Create the Inspection Sampling Plan and Purchase Order**

- **Perform Inspections and Adhoc Tasks**

- **Verify Samples' Variables and Attributes**

- **Create NC for the Non-conforming Materials**

- **Evaluate the Material Reinspection Needs**

Inspection is critical to deliver high-quality product, ensuring every material used is conforming to internal and external specifications. It helps measure specifications, sample size, attributes, variables to identify the defective materials and prevent them from entering into production.

Qualityze Inspection Management enables end-to-end process management of incoming, pre-shipment, and production inspections while managing compliance risks. It enables you to reduce the supplier risks with timely inspections.

You can standardize the sampling plan and purchase order using the pre-loaded internationally recognized ANSI/ASQC Z1.4 (ISO 2859-1) statistical sampling standard. The configurable fields and forms enable you to capture all the details about the materials you will be inspecting. It seamlessly integrated with existing IT Eco-system to complement the supply chain process.

Moreover, Qualityze Inspection Management provides you detailed insights on inspection data so you can make informed decisions and take a leap with improvement opportunities.

Permit Management

Qualityze

Track, Monitor, and Manage Permit & Licenses Renewals Efficiently

➡ Create and Print the Records for Permits, Licensing & Certificates for Individual and Facilities

➡ Track and Manage the Review, Approval, And Renewal of The Permits & Licenses

➡ Track and Manage Permit Related Supporting Documents and Applications for Future   References

➡ Perform Timely Audits to Track Permit & License Status, Cost, And Other Details

➡ Notify Users of The Licenses and Permit Due for Renewals

➡ Integrate with Enterprise Systems
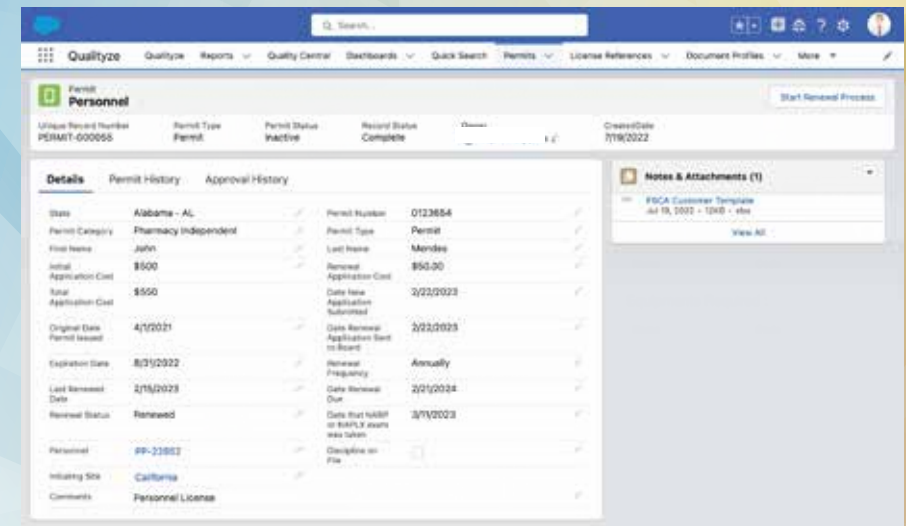

Excel spreadsheets or file cabinets can make keeping track of permits and licenses difficult, especially when juggling all the other tasks involved in a busy workday. Qualityze's Permit Management solution simplifies the process. You can control all your permits and licenses' renewals in one place, along with business documentation. Our solution will help you simplify compliance efforts while streamlining the entire permit renewal and reporting process.With Qualityze Permit Management software, business permits are kept active and valid by conforming to industry-specific standards. Furthermore, it allows approvals across multiple levels and sites.Moreover, you can track all vital information concerning permits and licenses on a centralized database and a secure platform, including information such as issuing authority, code, status, and more. Qualityze Forms Management is a fully featured solution to help enterprises efficiently create, manage, and track critical forms. It ensures that quality information is being captured and stored consistently. In addition, our next-generation solution can be configured as per evolving business and compliance needs.

Through Qualityze, you can gather valuable insights to make crucial business decisions without worrying about data security.

Material Compliance Management

Qualityze

Monitor, Manage, and Eliminate Compliance Risks Effectively

- Organize all supply-chain components in a centralized database.

- Stay up to date on changes in regulatory requirements.

- Examine your materials for compliance with different regulatory requirements.

- Establish effective communication with suppliers to manage compliance risks.

- Integrate with enterprise-level quality systems.
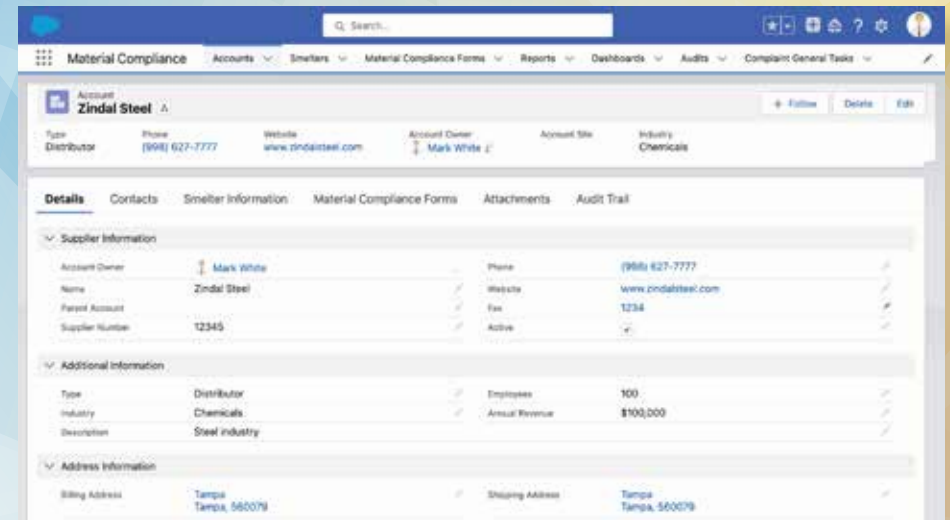

Organizations constantly look forward to developing compliance strategies to comply with regulations such as REACH (Registration, Evaluation, Authorization, and Restriction of Chemicals), RoHS (Restrictions on Hazardous Substances), and conflict minerals. They have realized that adhering to regulations and standards with the best practices and processes can help the management of both risk and supply chains. Additionally, integrating compliance and due diligence efforts leads to a better understanding of supply chain risks and helps to build robust strategies for responsible sourcing.Qualityze Material Compliance Management enables enterprises to leverage the diligence activities. The Qualityze Material Management solution helps enterprises align their supply-chain processes with mandatory regulatory standards like 2011/65/EU RoHS Recast and US Conflict Minerals, so they can use safer materials in their products without worrying. In addition, our next-generation solutions simplify compliance procedures and demonstrate your commitment to quality. Qualityze Material Compliance Management helps eliminate all of your compliance management challenges, including tracking approved smelters or vendors, reporting declarations for conflict minerals, and making critical business decisions.

Simplify Post-Market Surveillance and Regulatory Reporting

- Manage and Track All FSA Details from A Centralized Platform
- Assess Health Hazards to Identify the Need for Recall Management
- Verify and Investigate the Impacted Lot/Batch of The Product
- Improve Communication to Ensure Faster Complaint Resolution
- Maintain FSA Records and Simplify Regulatory Reporting
- Integrate with Enterprise-Level Quality Systems
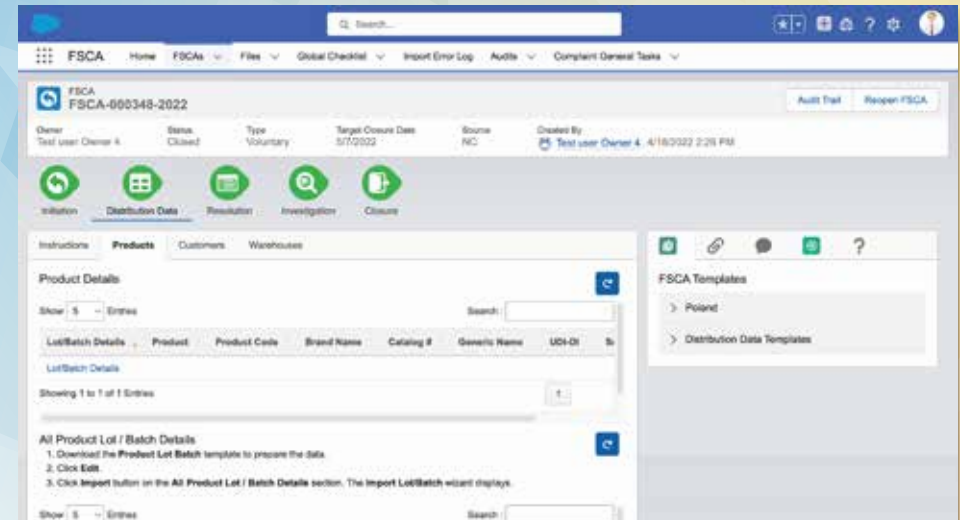

An enterprise must prioritize post-market surveillance as much as it does the improvement of internal processes to mitigate risks and achieve excellence. Post-market management is also critical for ensuring consumer safety. Some issues can even be fatal. Thus, you should have an efficient system to streamline post-market surveillance activities and regulatory reporting. The right solution provides you with all the flexibility, visibility, and traceability you need to manage product safety effectively.Qualityze Field Safety Action Management solution streamlines the post-market surveillance, regulatory reporting, and recall management. It is possible to gather all the necessary FSA details on a centralized platform that is accessible from anywhere. Furthermore, the solution includes a signature validation feature, so users know who is responsible for handling recalls. With its searchable and secure records database, the software ensures a reliable flow of information, and its advanced capabilities enhance operational efficiency. Additionally, enterprises can analyze failure trends and make intelligent business decisions by leveraging integration capabilities.The Qualityze Field Safety Action Management solution helps businesses manage recalls, failures, and incidents using best-practice workflow. It makes sure that quality information is captured and maintained consistently. The next-generation solution can also be configured and tailored to fit growing business and compliance needs. Using Qualityze advanced integration capabilities, you can manage product recalls more efficiently and effectively than ever. Get your free demo scheduled to see the software in action.

Create, Manage, and Track Forms Efficiently

- Manage different types of forms in a centralized database.
- Capture, share, and track forms more efficiently.
- Configure forms for different business and regulatory requirements.
- Improve information sharing across the organization.
- Minimize administrative costs and efforts for repetitive tasks.
- Integrate with enterprise quality systems for controlled flow of information.
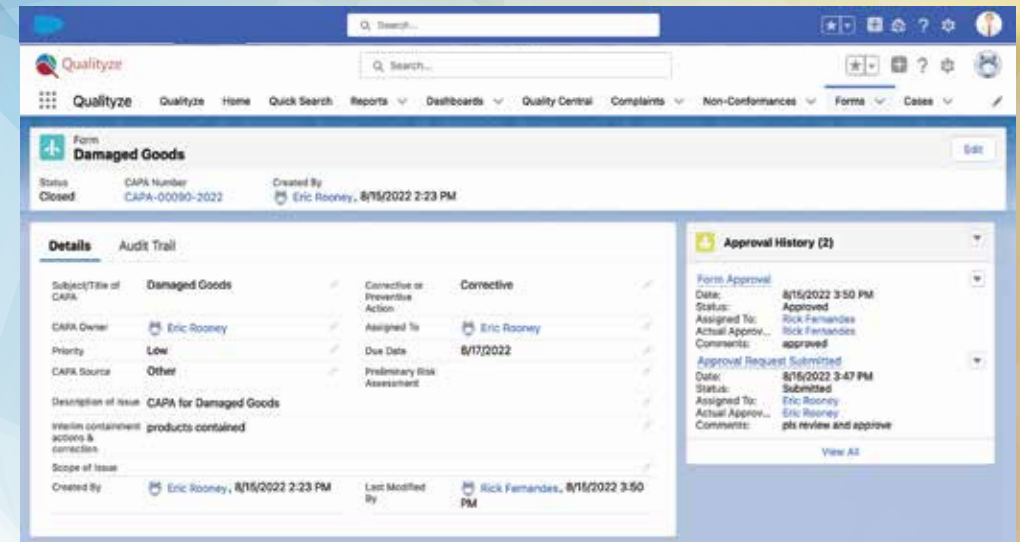

Companies require a feature-rich solution that will allow them to securely create and capture all levels of data on custom forms and records online - from the point of submission to the end of management. With the dynamic forms and records generator, you'll have choices like dropdowns, checkboxes, date controls, and the ability to add rows. In addition, you can map the forms and records to existing systems to improve input efficiency and business visibility. Qualityze Form management solution streamlines and helps ensure input accuracy and compliance with predefined business rules and validation requirements, including managing records, such as electronic medical records, device history records, permits, audits, and complaints. Its searchable and secure records database keeps information readily accessible, while its advanced capabilities ensure operational excellence. In addition, it enables enterprises to leverage the integration capabilities for improved control of data and insights.
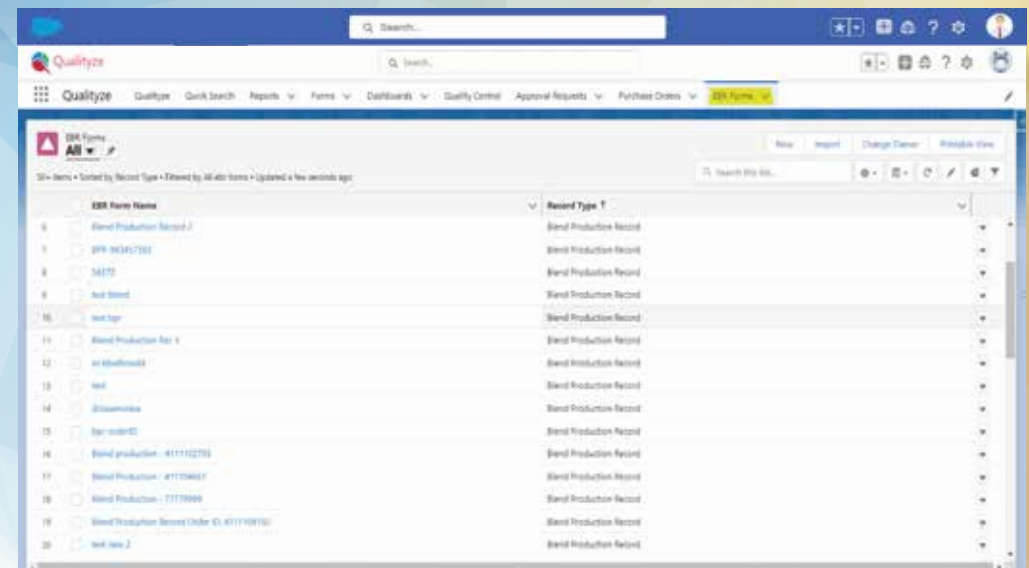

Qualityze Forms Management is a fully featured solution to help enterprises efficiently create, manage, and track critical forms. It ensures that quality information is being captured and stored consistently. In addition, our next-generation solution can be configured as per evolving business and compliance needs.

Gain Production Excellence with Efficient Batch Record Management

- ➔ Create and manage EBR forms to collect batch production data.
- ➔ Track progress of the production processes.
- ➔ Ensure equipment effectiveness.
- ➔ Ensure compliance with training requirements.
- ➔ Verify validation and reconciliation records.
- ➔ Integrate with Enterprise Quality Systems.

Qualityze Electronic Batch Record Management Software - your one-stop solution for streamlining batch record management processes and ensuring compliance with regulatory standards. Our innovative solution empowers you to manage electronic batch records in a secure and efficient manner, eliminating the need for paper-based documentation and minimizing the risk of errors or inconsistencies. With Qualityze, you can seamlessly integrate data from multiple sources and track changes throughout the entire lifecycle of a batch record.Designed to meet the specific needs of the life sciences industry, Qualityze Electronic Batch Record Management Software offers a range of features and benefits that set it apart from the competition, including Efficient Data Entry, Real-Time Collaboration, Automated Workflows, Audit Trail Tracking, and Integrations.With Qualityze Electronic Batch Record Management Software, you can streamline your batch record management process, reduce errors and inconsistencies, and ensure regulatory compliance. Contact us today to learn more about our solution and how it can benefit your organization.

Incident Management

Qualityze

Track, Manage, and Report Safety Incidents on the Cloud

- **Report and Document All the Incidents on a Centralized Database**
- **Manage Different Types of Incidents and Their Causes**
- **Track the Impacted People and Sites**
- **Manage Incident Reporting for Business and Regulatory Requirements**
- **Perform Detailed Investigation for the Reported Incident(s)**
- **Integrate with Enterprise Quality Systems**
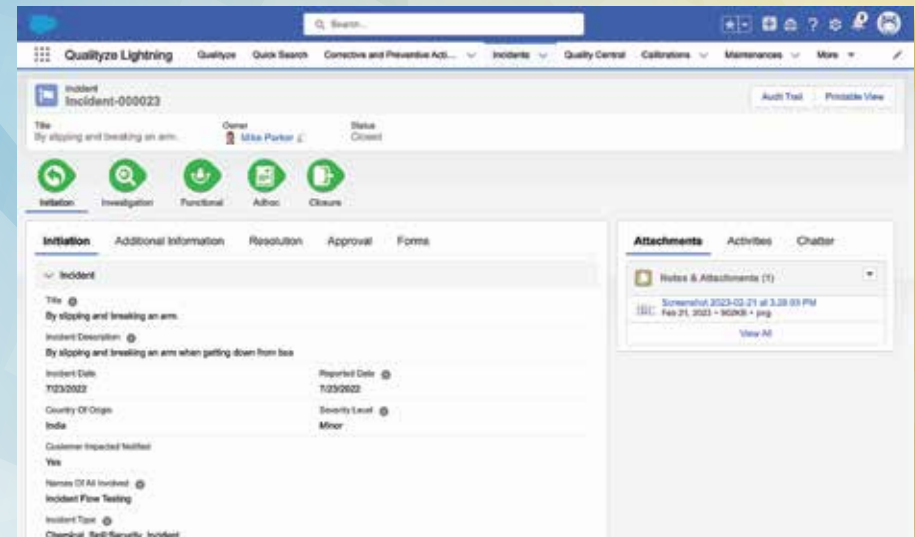

Incidents are inevitable. But how they are managed can make a world of difference for businesses. Relying on legacy systems will only cost unnecessary overhead expenses. Implementing proper controls, mitigating your company's liabilities, resolving workplace incidents on time, and maintaining ISO and OHSAS compliance will help you prevent many workplace incidents. As a result, you will gain the trust of your employees.

Customer experience is only one aspect of brand building; positive and safe work environments are equally important. However, businesses nowadays need powerful incident management software that can help

them manage incidents and their respective details in one place. Qualityze Incident Management is a fully validated system to safely manage all your incident records. It helps establish best-practices workflows to streamline incident management, reporting, and investigation activities.

In addition, our next-generation solution is made configurable to pace up with growing business needs efficiently.
Through Qualityze, you can efficiently and effectively manage incidents and near-miss events.
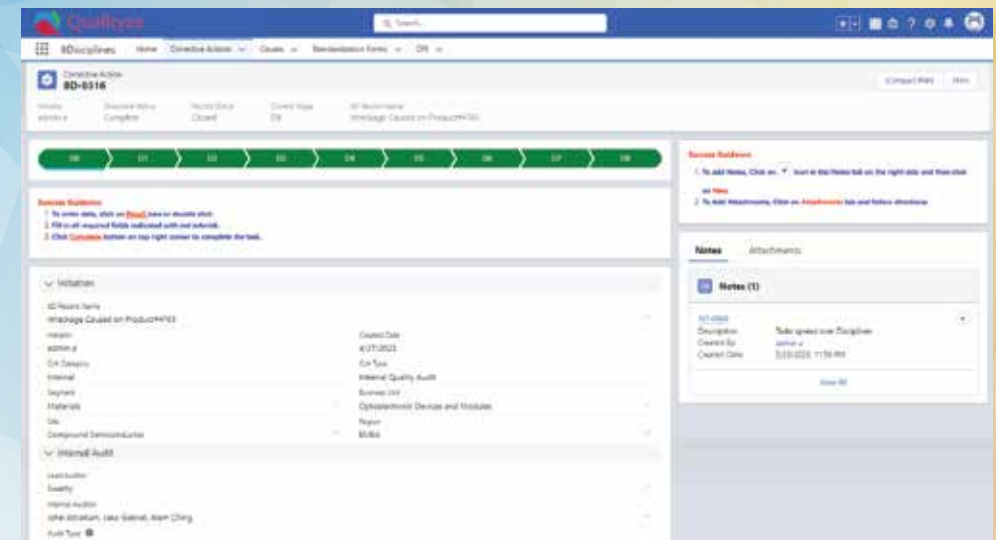

8D Management

Qualityze

Collaborate, Connect, and Conquer Inefficiencies with Proactive Problem Solving

- ➡ Streamline Approvals with Easy Routing of Any Discipline Task
- ➡ Identify Root Causes and Potential Solutions Using Powerful Investigation Tools
- ➡ Evaluate The Effectiveness of Implemented Disciplines for Improvement
- ➡ Establish Preventive Actions to Avoid Recurring Issues and Optimize Operations
- ➡ Ensure Authorized Access with Role-based Control for Discipline Tasks
- ➡ Close The Project and Recognize Team Members for Their Efforts
- ➡ Integrate With Enterprise-level Quality Systems

Qualityze 8D Management offers a cloud-based solution that streamlines your investigation workflow from start to finish. With flexible role-based access control, you can ensure that only authorized personnel can access discipline tasks. Attach supporting evidence at every stage of the 8D process to ensure a complete record of the problem-solving process.

Our solution uses investigative tools like 5Whys, 5Hows, 5Ws, and 3x5Whys to identify the root cause of any problem. You can map multiple root causes to potential solutions, provide justification if any

root cause(s) are not addressed, and reopen any discipline to address issues that may arise.

Connect and collaborate with Qualityze 8D Management for critical processes, including investigations, root cause analysis, containment actions, corrective actions, and preventive actions to prevent the recurrence of quality issues. Track each investigation through to closure with our simple user interface, and use the cloud-based solution to generate comparison reports to identify lessons learned.

Choose Qualityze 8D Management today to proactively resolve issues and avoid inefficiencies and challenges.

Risk Management

Proactively Manage Risks to Maximize Organizational Efficiency

➡ Create, Manage, and Track Risk Profiles

➡ Define Risk Evaluation Criteria

➡ Conduct Preliminary Impact Assessment of Risks Identified

➡ Identify and Plan the Risk Treatment(s)

➡ Perform Risk Treatment Effectiveness Review

➡ Integrate with Enterprise Quality Systems
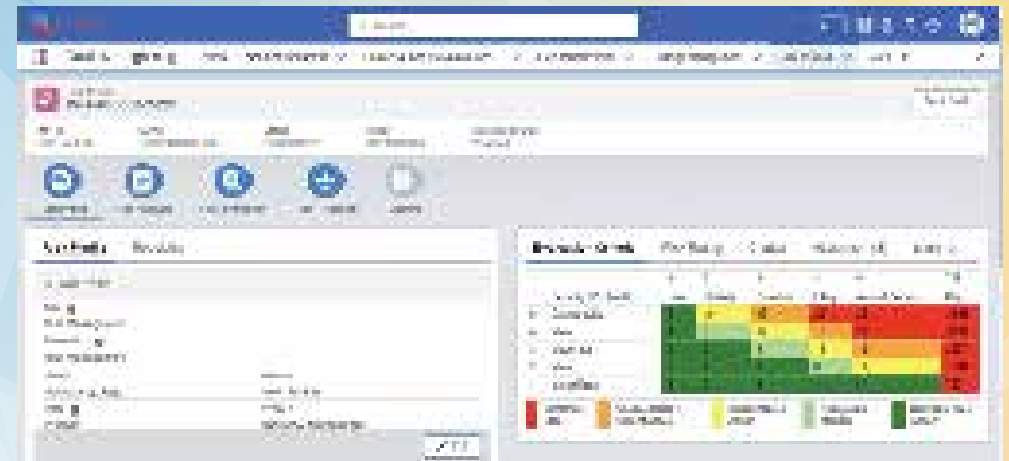

Businesses must adopt the Qualityze risk management system that brings all risk information together, analyzes it, and formats it in a way that's user-friendly and understandable for business managers. This is important because the risk landscape is constantly evolving. Moreover, the system makes data collection easier, create reports more quickly, and prevent managers from having to chase them for updates.

Risk management involves learning from experiences and improving - this year's lessons can be applied to future risk management and strengthen resilience. However, predicting the next big disruptive event may be challenging. A cloud-based risk management solution like Qualityze can minimize its impact and accelerate an adequate response from the organization.

In short, Qualityze Risk Management can transform how businesses manage their risk-related functions.

Qualityze Connect

Qualityze

Ensure Quality in Every Connection with Qualityze Connect Effortless Integration

➡ Seamlessly integrates Quality Management Systems (QMS) with third-party systems like CRM, ERP, and MES.

➡ Facilitates real-time data exchange between QMS modules and external applications.

➡ Enables effortless initiation of Non-Conformances (NCs) from MES directly within Qualityze.

➡ Provides instant updates on NC numbers and statuses for Quality holds on Work Orders, Batches, and Lot Numbers.

➡ Streamlines workflows by verifying job requirements through Qualityze Connect, minimizing errors and optimizing resource allocation.

➡ Ensures consistent compliance by maintaining synchronization between QMS and regulatory systems.

"Qualityze Connect" is an integration platform in the "Qualityze EQMS suite." This suite likely stands for "Enterprise Quality Management System." Qualityze Connect aims to enable seamless communication and data exchange between the modules within the Qualityze EQMS suite and external third-party systems.

The integration platform facilitates the process of integrating and synchronizing data. It allows the Qualityze EQMS suite modules to interact with and exchange data with various external systems. These external systems can include different types of software used by a company, such as CRM (Customer Relationship Management), ERP

(Enterprise Resource Planning), MES (Manufacturing Execution System), LIMS (Laboratory Information Management System), and more.

Therefore, Qualityze Connect is a bridge that enables the Qualityze EQMS suite to effectively communicate with other software applications the organization uses. This integration and synchronization of data can enhance efficiency, accuracy, and the overall flow of information between different parts of the business ecosystem."

Choose Qualityze Connect today to avoid the inefficiencies and challenges of disconnected systems!

Our Vision

Our vision of helping our customers create a "Culture of Quality" is not unique but the way we have built our solution from the ground up to make the application easy to use, intuitive and inclusive is unique. Meaning, by having everyone in the organization participating in quality, not just because they are required too; but because it's easy, fun and has a logical flow to record information. "Something difficult and time-consuming was made easy to document and report at the very least." Manufacturers or Providers focused on promoting a "Culture of Quality" will improve their product quality, quality analysis, and responsiveness to their customers.

There has been a quantum leap in technology in the last 10 years and having applications that look like and act like a database will no longer be acceptable by users. It is more about how your user interface compares and drives like Facebook, LinkedIn, or Twitter. With a Salesforce lighting enabled user interface, Qualityze EQMS brings together a new application environment that embraces these industry trends and looks forward to integrating AI and IoT to its core product offering.

We have a huge opportunity to elevate quality to a strategic discipline with the hands-on involvement of C-Suite executives.

If you are going to stay competitive, customer-centric, market-driven, product-focused before and after the sale oriented, then quality will be one of your major priorities.

We empower you to optimize quality!

Innovation-Driven Technology Platform

Innovative businesses are focused on customer-centric approaches to doing business in this competitive environment. Qualityze, built on the Salesforce platform is a game changer for quality systems going forward.

With its Next Generation Enterprise Quality Management Solution (EQMS), Qualityze prepares our customers for competitive changes on the horizon while enabling them to solve traditional quality issues without being concerned about technology. Salesforce.com offers a secured development platform that leverages a comprehensive portfolio of services, such as automation of sales force tasks, customer service, marketing, analytics, application development, collaborative productivity tools, IoT and professional cloud services. Harnessing Salesforce.com technology strengths like Analytics, Chatter, IoT, Community Portals, AI along with our next generation user interface, keeps our customers competitive and able to achieve greater success through quality while we stay focused on staying current with the regulatory, compliance and certification process changes; it's a great combination.

We avoided outdated technology models that are more expensive to develop, maintain and deploy. These old technologies encourage customizations that are expensive to maintain and not needed when a highly configurable alternative is available and that is aligned with global regulatory, compliance and certification bodies.

Qualityze on Salesforce Platform brings the same trust and speed at the core of all our products in building and deploying application in the cloud for our customers, faster than any on-premise application platform, hybrid platforms or any other cloud platforms.

Our professional service team will partner with your team to plan, develop and leverage the Qualityze Implementation Methodology (QIM) to help you get the Qualityze EQMS Suite up and running on time, within budget, and defined scope.

Qualityze Implementation Methodology includes:

(a) Discovery Phase

(b) Initiation Phase

(c) Planning & Analysis Phase

(d) Design & Configuration Phase

(e) Test\Validate Phase

(f) Implementation & Support Phase

At Qualityze, we firmly believe –
"Quality is remembered long after the price is forgotten." Therefore, we strive to deliver quality, excellence, and compliance through our next-generation quality management solutions.

✅ Validation Services

Managing the validation is often the most intense part of achieving compliance. But Qualityze has a proven validation methodology to help you overcome validation challenges. Our experienced team can help you with end-to-end documentation of the validation process, including authoring, executing, and reviewing the Installation Qualification (IQ), Operational Qualification (OQ), and Performance Qualification (PQ) software validation scripts. The objective of our validation service is to keep our customers' audit-ready and confident and compliant.

The Qualityze Validation Package offers a complete set of pre-configured validation ready templates :

➡ Cloud System Validation Plan

➡ Functional Requirements Specification (FRS)

➡ Validation Test Scripts

➡ Requirements to Test Traceability Matrix (RTM)

➡ Software Validation Summary Report Template

Within your specified timeline, our validation experts can assist you to validate every release with compliance-ready documentation before production use of Qualityze EQMS Suite. It enables your team to focus on the quality processes and delivering high-quality products to the customer.

When it comes to IQ/OQ/PQ software validation for Qualityze, you can count on us for a simplified validation process with every release, based on your business-specific requirements.

Technology Services

Qualityze has redefined innovation, collaboration, and efficiency with cloud-based smarter quality solutions. We help businesses like you to establish a competent quality management system through our integrated solutions. Built on Salesforce.com, Qualityze quality management solutions can be easily scaled as your business grows. Our robust cloud technology platform provides you a centralized repository to store, manage, and retrieve business-critical information while complying with applicable regulatory standards.

Qualityze helps eliminate the hassles of maintaining the hardware and software infrastructure at your company. Enterprises of all sizes can adopt the Qualityze Next-Generation Quality Management Solutions for simplicity, scalability, and reliability. Moreover, our solutions come with the latest features without constant upgrade costs.

Qualityze, on the Salesforce Platform, brings the trust and speed to the core of our products in building and deploying applications in the cloud for our customers, faster than any on-premise application platform or any other cloud platforms.

Why Salesforce?

Salesforce is the world's leading scalable, secure enterprise cloud platform. By choosing Qualityze on the Saleforce.com platform, companies can benefit from an innovative, flexible, scalable, reliable, secured and proven framework. Here are some of the reasons that customers pick the Salesforce platform.

Security you can count on: All customer data is protected with physical security, data encryption, user authentication, application security, and more.

Easy to set up: Import your existing data or upload an .XLS/CSV file, and before you know it, you're ready to go.

Click to Configure: It's that easy! If you can click a mouse, you can change workflows, add fields, and create processes. The result? Higher productivity and automation like you've never had before.

No Software Hassles: What if you don't need to invest in installation or software upgrades? With Qualityze, updates are automatic, so you always have the latest version. And better yet, all your configurations stay intact through every upgrade.

Seamless Integration: The cloud platform allows you to seamlessly integrate Qualityze quality solutions with existing business applications for improved performance and operational excellence.
