About Spinal Singularity Inc.

Spinal Singularity is a seed stage, venture-backed, medical device company developing products to improve the lives of patients with Spinal Injury. The company has developed the Connected Catheter, the first fully internal, smart catheter system for adult males with Urinary Retention. One Connected Catheter may replace up to 200 disposable intermittent catheters.

Spinal Singularity recently commenced Clinical Studies for the Connected Catheter in the USA. For more information or to see if you may qualify for this study, please visit the Company's website at www.spinalsingularity.com or contact us at info@spinalsingularity.com.

The Connected Catheter is currently an INVESTIGATIONAL DEVICE ONLY and Limited by Federal (or United States) law to investigational use.
