

8th February 2018

The Radcliffe Group announces the release of their new online eLearning platform in continuing medical education, Radcliffe-CME.

It's been a busy start to 2018 for The Radcliffe Group, who today announced the release of their new online eLearning platform for continuing medical education, **Radcliffe-CME**.

Radcliffe CME specialises in CME content created especially for cardiovascular professionals and will offer physicians access to independent and accredited medical education programmes through the provision of high quality educational content and dedicated learning outcomes.

The first release includes a brand-new course on **Utilizing NOAC's in NVAF patients with PCI** and is available now, with a choice of three languages: English, Spanish and German.

Radcliffe's Medical Director, Greg Guillory said: *'We are thrilled to support busy physicians around the world by contributing to their continuing medical education. We look forward to building our CME content catalogue further in the coming weeks and months.'*
