CASRA | human technology for your security

CASRA Security Screening Training Software: The Global Gold Standard of Security Screening Training & Certification

You Need Better Ways to Train Your Security Staff

__CASRA__ technology uses metrics proven by research so staff learn better, perceive threats with greater accuracy and develop skills that work across multiple units and systems. Leverage scientifically designed technology that improves staff performance, builds confidence, and builds better security screening personnel for your organization.

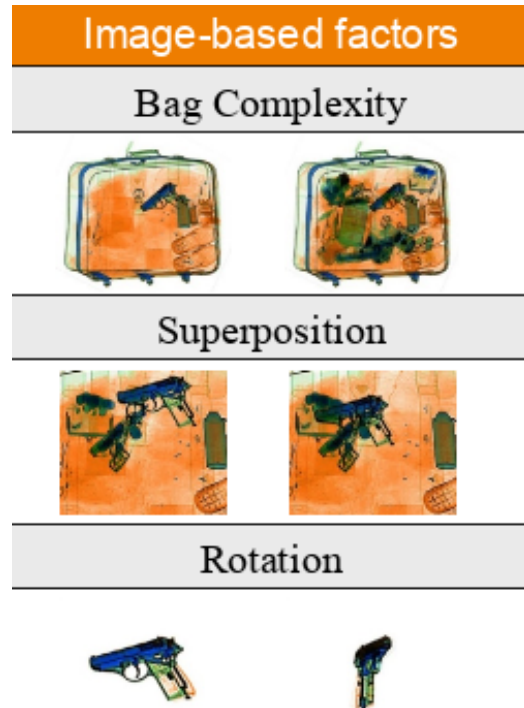

CASRA Mission:

To increase security and facilitation at airports and other environments involving people and security.

Located in Zurich, Switzerland, CASRA is the leading organization in security research and applications. CASRA Software, methods, and procedures are based on scientific research. They are continuously improved through close collaboration with government organizations, research institutes, and end users. CASRA Software applications are installed in 50+ countries and at 900+ airports around the world.

CASRA Software Training Benefits:

- Web-based, 3D screening and a large variety of angles and combination possibilities
- Aptitude tests help identify ideal candidates
- Screeners are trained to recognize threat items, not rote formulas
- Threat items are based on systematic threat assessment
- Individually adaptive training, using Image-based and knowledge-based factors
- Training applicable to multiple screening machines
- Advisory services
- Data Metrics on performance
- HR Engagement and personnel support considerations
- Uses human psychology and research to help with knowledge retention
- Courses allow for various forms of customization (ex: weapons, drugs, materials)
- Provides objective performance metrics that help employees improve and develop
- Several pricing and licensing models

HumanLink, LLC
LINKING THE HUMAN WITH THE SYSTEM

HumanLink, LLC is a small, woman-owned transportation security consulting firm, with over ten years dedicated to improving Human Capital in the industry.

HumanLink, LLC is the U.S. affiliate for the deployment of the CASRA 3-D training solution in many government and private agencies. We leverage metrics to examine human performance, operational effectiveness and efficiency.

Our Capabilities:

- Workforce training, hiring, and retention
- Needs assessment
- Requirements gathering
- User perceptions
- Human Systems Integration (HSI) assessment
- Process assessments and improvements
- Strategic planning and communication
- Evaluating and improving work culture
- Workstation design and optimization
- Technology recommendations
- IT Infrastructure and DHS compliance

How We Improve Your Staff Performance & Engagement

HumanLink, LLC focuses on improving security outcomes that are beneficial to all transportation venues and stakeholders, by providing:

- **Strategic Partnerships:** Coordinate with users to develop people, processes, and technology to maximize human capabilities using qualitative and quantitative data collection and analysis
- **Human & Automation:** Assess automation's impact on human performance to provide improvement recommendations
- **Passenger Experience:** Improve screening efficiency to make it a seamless process with added personal security
- **Threat Detection Improvements:** Increase screening accuracy through identification and validation of users competencies and skills, training effectiveness, appropriate human/system automation allocation

Our Founder and Mission:

HumanLink, LLC was founded by Bonnie Kudrick, a pioneer in integrating and advocating for the human element in security screening. Bonnie established the Human Performance Branch at the Transportation Security Administration (TSA) in 2011. Her ability to lead, listen, and identify the specific challenges within government agencies, airlines, airports, vendors experience is what led her to start her own consulting firm. As head of HumanLink, LLC, Bonnie's focus on transportation security and the strategic understanding of security challenges, including the integration of research and data collection on visual search, staff fatigue, aptitude assessment, and effectiveness/ usability of systems. Bonnie consults with transportation executives to help leverage data to the best outcome, train, and support staff and make key changes to increase security protocols and practices; key to the successful implementation of the CASRA training platform.
