

SupremeRAID™ SR-1010

The World's Fastest NVMe & NVMeoF RAID Card for PCIe Gen 4

Further disrupting the global storage industry, GRAID Technology Inc. now offers the world's fastest NVMe and NVMeoF RAID card for PCIe Gen 4, designed to deliver world class data protection while increasing read and write performance—all at world record performance speeds and extremely low TCO.

THE CHALLENGE

RAID Bottleneck

As NVMe SSD quickly becomes the new standard for storage infrastructure, a challenge arises for data center storage infrastructure design: the industry requires a future-ready solution to deliver NVMe SSD performance without sacrificing data security or business continuity. Simply put: flash storage performance is evolving too fast to be fully utilized by existing storage architecture.

Implementing a basic software RAID via the CPU can only deliver 10-20% SSD performance on average, while unfortunately consuming almost all of the CPU computing power. While utilizing proprietary hardware might achieve improved performance, the architecture still can't maximize the potential of flash storage.

THE SOLUTION

SupremeRAID™ SR-1010

In today's data center world, speed and throughput are everything. GRAID Technology recognized the limitations and bottlenecks caused by traditional RAID and developed a GPU-based storage solution to launch RAID technology into the future.

GRAID Technology is proud to introduce the world's first NVMe and NVMeoF RAID card created to unlock the full potential of your SSD performance. Our innovative GPU-based solution delivers world-record performance while increasing scalability, improving flexibility, and lowering TCO. With proven performance tests and partnerships with global industry leaders, SupremeRAID™ delivers maximum SSD performance, comprehensive enterprise data protection, unmatched flexibility, and unbeatable ROI.

| | SupremeRAID™ SR-1010 | High-end Hardware RAID |
|----------------------------|----------------------|------------------------|
| 4k Random Read | 19 M IOPS | 3.5 M IOPS |
| 4k Random Write | 1.5 M IOPS | 180 k IOPS |
| 512k Sequential Read | 110 GB/s | 13.5 GB/s |
| 512k Sequential Write | 22 GB/s | 4 GB/s |
| 4k Random Read In Rebuild | 5.5 M IOPS | 36 k IOPS |
| 4k Random Write In Rebuild | 1.1 M IOPS | 18 k IOPS |

*Based on Linux RAID5 with Intel Xeon Gold 6338 CPU 32-Core with 2.0GHz x 2

Unbeatable Performance

SupremeRAID™ SR-1010 increases read performance to **19 M IOPS and 110GB/s** throughput and increases write performance to **1.1 M IOPS and 22 GB/s** throughput in RAID 5/6, while maintaining the superior level of data protection our customers and partners have come to expect.

Flexible & Future Ready

Unmatched flexibility with features like new O/S support, compression, encryption, thin provisioning, or boot drive protection easily added with software releases

World Record Performance

SupremeRAID™ SR-1010 increases read performance to 19M IOPS and 110GB/s throughput and write performance to 1.5M IOPS and 22GB/s throughput in RAID5/6

Highly Scalable

Easily manage 32 direct attached NVMe SSDs; extend data protection without sacrificing performance with Software Composable Infrastructure

Plug & Play

Effortless installation, no cabling or motherboard re-layout required; direct connect to SSD without PCIe switches

Free Up CPU Resources

Offload your entire RAID computation to SupremeRAID™ to free-up CPU computing resources for 5G, AI and AIoT applications

Easy to Use

SupremeRAID™ doesn't rely on memory caching technology, eliminating the need for battery-backup modules

GIGABYTE

KIOXIA

AMD

SEAGATE

NVIDIA

“Leveraging a speedier PCIe 4.0 interface, the SupremeRAID™ SR-1010 arrives with a substantial performance uplift...it's **light years beyond** even the most high-end hardware RAID arrays.”

SupremeRAID™ SR-1010

FOR PCIe GEN 4

The ultimate in flexibility and choice. SupremeRAID™ SR-1010 is the world's fastest NVMe/NVMeoF RAID card, designed to deliver the full potential of PCIe Gen4 systems in enterprise data centers. The SR-1010 increases performance of both reads and writes while maintaining the superior level of data protection our customers and partners have come to expect.

Unbeatable Performance

Chosen by CRN as one of the Ten Hottest Data Storage Startups of 2021 and a 2022 Emerging Vendor in the Storage & Disaster Recovery category, GRAID Technology Inc. has developed the world's fastest NVMe and NVMeoF RAID card to unlock the full potential of enterprise SSDs for high performance applications: SupremeRAID™ SR-1010 NVMe/NVMeoF PCIe Gen 4 RAID card.

| | Linux Environment | | |
|--------------------------------|-------------------|-----------|-----------|

SupremeRAID™ SR-1010

FOR PCIe GEN 4

Test Environment Specifications | **Software:** Linux Version: CentOS 8.5; Windows Version: Windows Server 2019 | **Hardware:** CPU: Intel(R) Xeon(R) Gold 6338 CPU 32-Core with 2.0GHz x 2, Memory: SK Hynix HMA82GR7CJR8N -XN DIMM DDR4 3200 MHz 16GB x 16, SSD: INTEL SSDPF2KX038TZ 3.8TB | **RAID Configuration:** Random performance based on a drive group with 12 physical drives and 1 virtual drive; sequential performance based on a drive group with 20 physical drives and 1 virtual drive

SR-1010 Software Specs

| | |
|------------------------------------|---|
| Supported RAID levels | RAID 0, 1, 5, 6, 10 |
| Max Physical Drives | 32 |
| Max Drive Groups | 4 |
| Max Virtual Drives per Drive Group | 8 |
| Max Drive Group Size | Defined by physical drive size |
| OS Support | Linux: AlmaLinux 8.5 Rocky Linux 8.5 CentOS 7.9, 8.4, 8.5 openSUSE Leap 15.2, 15.3 RHEL 7.9, 8.4, 8.5 SLES 15 SP2, SP3 Ubuntu 20.04 Windows Server 2019 x86-64 Windows Server 2022 x86-64 |

SR-1010 Card Specs

| | |
|-----------------------|------------------------------|
| Host Interface | x16 PCIe Gen 4.0 |
| Max Power Consumption | 70 W |
| Form Factor | 2.713" H x 6.6" L, Dual Slot |
| Product Weight | 306 g |

Flexible & Future Ready

Unmatched flexibility with features like new O/S support, compression, encryption, thin provisioning, or boot drive protection can be easily added with software releases

World Record Performance

SupremeRAID™ SR-1010 increases read performance to up 19M IOPS and 110GB/s throughput and write performance up to 1.5M IOPS and 22GB/s throughput in RAID5/6

Highly Scalable

Easily manage 32 direct attached NVMe SSDs; extend data protection without sacrificing performance with Software Composable Infrastructure

Plug & Play

Effortless installation, no cabling or motherboard re-layout required; direct connect to SSD without PCIe switches

Free Up CPU Resources

Offload your entire RAID computation to SupremeRAID™ to free-up CPU computing resources for 5G, AI, and AIoT applications

Easy To Use

SupremeRAID™ doesn't rely on memory caching technology, eliminating the need for battery backup modules
