CORAS®

The Decision Maker's Decision Maker®

www.coras.com

CORAS IL4/5 enterprise decision management system is trusted and proven: we position Navy PEOs and PMs to make precise, confident decisions with tailored data workflows and AI.

Portfolio Optimization
Enterprise visibility, balancing, and optimization up and down departments
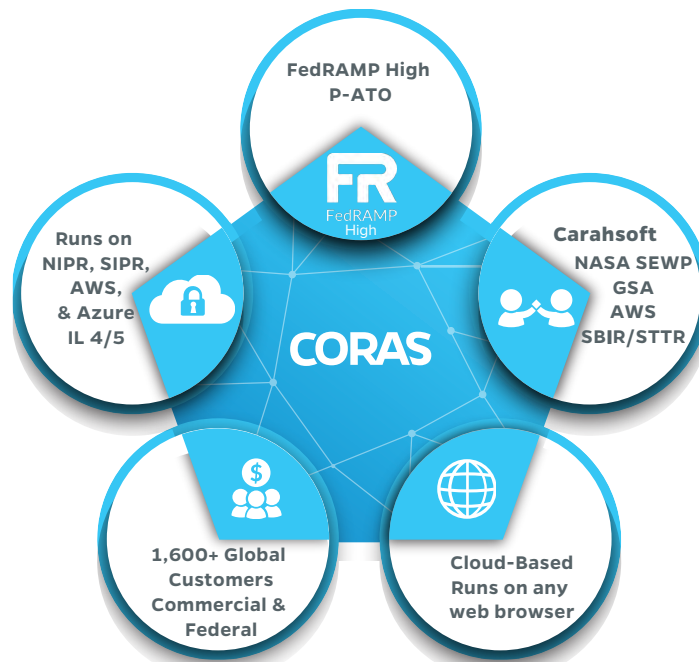

Enterprise Discovery
One-stop-shop for decision makers - real-time data at your fingertips

Product Management
Align products and prototypes with enterprise strategy

Cross-Functional Team Management
Bring teams together, align them with strategy, get more done

Budget Prioritization
Ensure the next dollar spent advances the mission

Real-Time Business Insights
Connect siloed data, derive new meaning, and use AI to predict outcomes.

Enterprise Strategic Alignment
Enterprise visibility to maximize strategy execution

Portfolio Rollup
Aggregate cost, schedule, risk, and performance data across the organization

(Central diagram)
- FedRAMP High P-ATO — FR FedRAMP High
- Runs on NIPR, SIPR, AWS, & Azure IL 4/5

- CORAS
- 1,600+ Global Customers Commercial & Federal
- Cloud-Based Runs on any web browser

Connect all your Portfolio, Program, and Project data for the decisions you need to make to inform and define readiness, agendas, budgets, and investments.

CORAS provides a commercial off-the-shelf (COTS) Enterprise Decision Management Platform (EDMP), with rapid no/low-code digital transformation providing leaders with decision support tools across applications, reducing the mean time to decisions in real-time, and adjustable to the unique mission of each DoD customer. We connect process management, work management, and business intelligence in a 360-degree view of the program office with live interactive data, AI predictions, and similarity analysis.

CORAS aggregates and orchestrates different types of data from multiple sources into centralized advanced UI visualizations, bringing data to customers to ask 'what-if/trade-off' questions and see the results in real-time. We deliver insights from spreadsheet data, as well as untapped information from unstructured sources using AI and NLP to find correlations, relationships, and outliers. CORAS maps project plans to performance indicators and offers dynamic, self-service configurations a uto-aggregation and works with current systems to create dynamic, collaborative, buildable environments. CORAS speaks your data language, and you own your data and AI models. CORAS is a cloud-based ready-to-use software that runs on any web browser, owns its entire software stack, offers FedRAMP High P-ATO security, I L 4/5, and is currently running on the NIPR and SIPR.

Science and Technology Portfolio Visualization

CORAS' Science and Technology Visualization leverages our unique AI and NLP capabilities to help customers see the interconnections across any desired data set. Leaders gain the ability to identify redundancies, relationships, dependencies, and inefficient use of funds and in turn arm them with the necessary data to reallocate funds, make accurate budget cuts, and streamline mission-critical initiatives.

Data Discovery, Transparency

The POM Tradeoffs

CORAS' platform delivers 'what-if' and snapshot visualization tools in a centralized data repository for users to assess, balance and report their budget requirement results in real-time. CORAS predictive AI capabilities compare requirement data across years to optimize funding decisions.

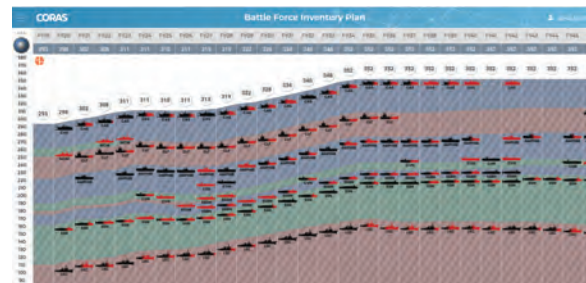

Program Requirements Management

Strategic Asset Management

Dynamically Visualize the Battle Force Inventory Plan over the next 30 fiscal years via the Sand Chart. View the data from a 360-degree perspective: Classes, Hulls, Budgets, etc. CORAS' capability also provides strategic asset inventory, tracking projects with visualizations such as Capability Evolution Plans, Sand Charts, and Chiclet Charts. Users can engage in "what-if" scenarios to see impacts made to procurement schedules and gaps across years, adjusting to compare and assess results in real-time.

Future Fleet Architecture Integration

Program and Portfolio Management

Rollup program and portfolio management data encompassing schedule, budget / spend, and resource availability to form a holistic picture for decision-making. With the CORAS platform, Leadership gets a real-time corporate view of financials across all their programs and portfolios in real-time.

Project Portfolio Management
