

Complete construction management in one platform

Reporting & Insights

Identify opportunities and issues early with custom progress reports, project analysis and real-time insights.

Plan & BIM Model Management

Connect design and pre-construction into the build phase with the latest plans & BIM models always at your fingertips.

Document Management

Organise, update and share project documents & plans in one place.

Technology Integrations

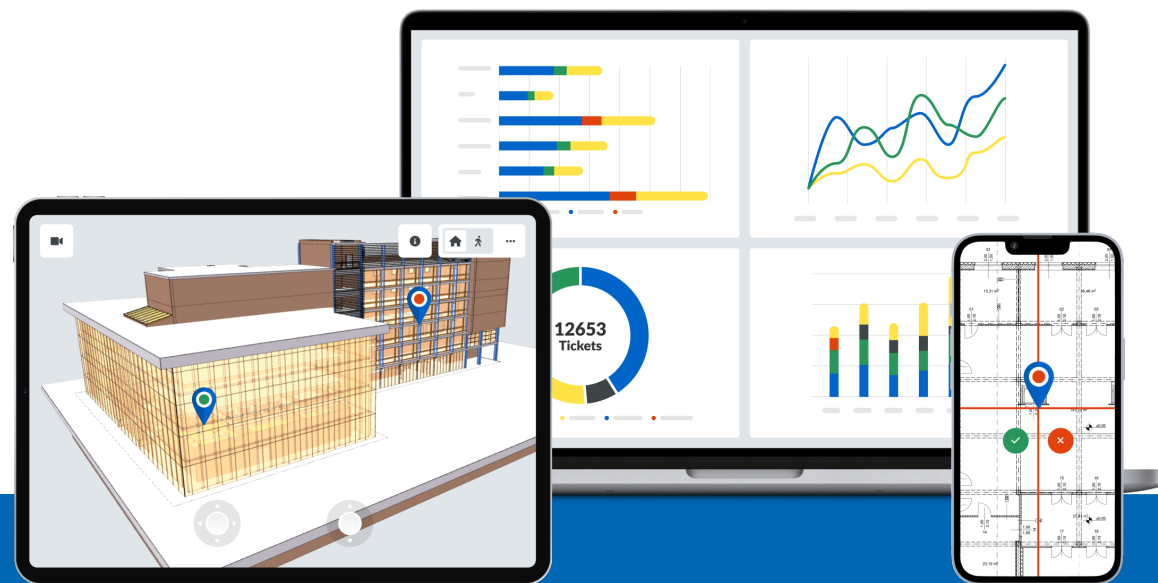

Activate PlanRadar Connect for no-code automations with software you're already using, or build custom solutions with our Open API.

Scheduling

Gain clear project oversight with a scheduling tool to visualise key milestones and task dependencies, ensuring on-time delivery.

Security & Data Protection

Peace of mind with the highest security standards.

“ We are very impressed with the ease of use on the go and the good clarity in the app. The 3D view and easy navigation within BIM models enable faster and more detailed identification and communication of facts. ”

SIEMENS

Your working day, made easy

Track information and solve issues on construction projects with quality and efficiency.

A single platform for all documentation, communication & processes

Easy to use – onboard your team in 10 minutes
