NEWS RELEASE

February 10th, 2025

TSX-V Trading Symbol: **TTG**
OTCQB Symbol: TTGXF

TRANS CANADA GOLD CORP. AND PARTNERSHIP GROUP LEAD BY CROVERRO ENERGY, ACQUIRES ADDITIONAL LAND AND LEASE RIGHTS, WHICH WILL ALLOW FOR DRILLING UP TO THREE (3) ADDITIONAL NEW MULTILATERAL WELLS SITUATED NEAR LLOYDMINSTER, ALBERTA

VANCOUVER, B.C. – Trans Canada Gold Corp. (TSX-V: TTG, OTCQB-TTGXF) ("**Trans Canada**" or the "**Company**") is pleased to announce that the Company has acquired additional lands inside the AMI, lead by Croverro Partnership Group, which will allow the drilling of up to three (3) additional multilateral wells targeting the Sparky and GP Zones. The 320-acre parcel offset our existing lands to the south were acquired by the Croverro Energy Group. The newly acquired lands, combined with our existing lands, have the oil resource potential in both the Sparky and General Petroleum (GP) producing zones. These additional lands bring total lands controlled to 1040 acres. The company's interest in the lands is 18.75% with all wells to be drilled on a non-promoted basis (pay 18.75% to earn 18.75%).

Our operator, Croverro Energy, has acquired and processed 2 additional seismic lines, which combined together with existing well control will allow the more precise targeting in the Sparky Zone and GP, when drilling the horizontal wells in the oil resource reservoirs.

Commented Tim Coupland, "This will allow for drilling up to three (3) more additional multilateral wells targeting the prolific Sparky and GP producing zones. We will be drilling our third large multi-lateral oil well shortly, with a reliable and experienced partner, who can consistently target and discover oil reservoirs, followed by successful drilling, oil production, low operational costs and proven revenue success."

ABOUT TRANS CANADA GOLD CORP. – OIL AND GAS PRODUCTION/REVENUE PRODUCING WELLS

The Company is a discovery focused Oil & Gas Resource Development and Mineral Exploration Company that is currently focused on developing and drilling its' production of conventional heavy oil exploration properties, increasing production capabilities, and increasing future oil production revenues through
