

Publications: Catalog

With clients at every link along the food chain around the world, our focus is both local and global. Whatever your concern, be it international milk power demand or US dairy farm profitability, we can help.

Research Report

Comprehensive analysis in a user-friendly package, the *Research Report* provides food industry professionals unique insights into the cheese, butter, nonfat dry milk and whey markets on a monthly basis including a look at

Forecast Update

Essential for your budgeting and planning. The *Forecast Update* includes 18 months of estimated dairy pricing on products ranging from CME cheese and butter to whey protein concentrate. Released monthly.

Flashes

Timely notice and analysis on potentially market-moving news, our Flashes present GlobalDairyTrade results and USDA Milk Production, Cold Storage and Dairy Products report data just after the information is made

Trade Trends

An essential reference and favorite publication of many, *Trade Trends* highlights monthly US dairy imports and exports, notable export destinations and pricing.

Ingredient Digest

Ingredient Digest focuses solely on dry dairy ingredient markets. It is published every other month and includes concise commentary and forecasts for commodity and high protein whey, milk powder and carbohydrate

Key Indicators

Wide-ranging but targeted to the macro-economic data points that matter, *Key Indicators* keeps executives on top of consumer sentiment, energy, currency, commodities, restaurant performance and other indicators so that nothing slips past. Published weekly.

Spot Market Updates

These brief email updates summarize each day's CME spot market activity.

Cheese Briefing

A monthly recap of all the important forces in the cheese market. Features handy pricing and market fundamentals dashboards, key statistics, "things to watch" and detailed price forecasts.

Dairy and Grain Report

With far-reaching coverage of the domestic dairy scene including statistics and anecdotal reporting, the *Dairy and Grain Report* provides weekly intelligence from the dairy spot and futures markets.

Margin Matters

Designed to be a quick, informative read, *Margin Matters* offers a detailed look at the factors impacting dairy producer margins, including regional margin projections, heifer/corn/alfalfa prices and Blimling forecasts in addition to market commentary and insight.

Freight and Power

Useful for its coverage of energy markets and US dry van, reefer and tanker truck rates, *Freight and Power* provides key fundamentals and insights into these costs to business.

Dairy Market Monitor

Succinct and instructive, the *Dairy Market Monitor* enables one to stay abreast of the day-to-day spot and futures market trade. Published daily.

Options Summary

In an easy-to-read and reference tabular format, daily settlements for put and call options on Class III milk futures enable risk managers to estimate where options might trade at the CME.
