

## Blackbird ROLLING CENTER

### QUALITY ABOVE ALL ELSE

The Blackbird is an industry born, fully automated system designed specifically to tackle the quality and consistency issues with prerolls.

At the heart of the machine is the Rollpros patent pending "tru-roll" rolling technology that creates 2 perfectly rolled joints every 9.5s.

Along with significantly reducing manual labor, the Blackbird utilizes sustainably sourced bobbins of paper and filter tips, reducing raw material costs and further maximizing your profitability.

### BLACKBIRD HIGHLIGHTS

**750+**  
PREROLLS/HR

**+/- 0.03g**  
FILL ACCURACY

**45k**  
PREROLLS PER BOBBIN

**<\$0.03**  
PER PREROLL

**\$240**  
SAVINGS/HR

ROLLED FOR UNIFORM  
DENSITY & CONSISTENCY
