Hygiene Essentials

You know the value that software can bring to your industrial hygiene program. But you're struggling to find the right solution. A promising solution can quickly turn out to be too complex, too expensive or simply takes forever to get up and running.

And you can't afford to wait. You need a solution now that'll help you identify at-risk exposures early, optimize your limited resources, maintain compliance and reduce the risk of on-the-job illness. You don't need everything. So, start with the essentials.

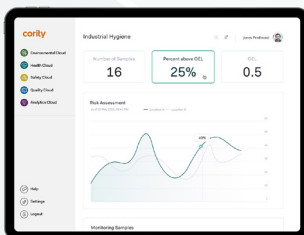

cority

Hygiene Essentials

Reduce the complexity, increase the value

Managing industrial hygiene has never been more challenging. Industrial hygiene issues are constantly de-prioritized over more “immediate” safety & health risks. Building internal support for program investment often proves difficult. And to make matters worse, responsibility for the IH program is shifting onto EHS professionals who often lack in-depth expertise. In these circumstances, organizations need solutions to take the complexity, time and cost out of their hygiene program.

Cority's Hygiene Essentials solution is purpose-built to offer organizations a powerful SaaS software platform to manage the most critical elements of their industrial hygiene program with confidence, boosting compliance and reducing the risk of occupational illness, all with a lower total cost of ownership. Our solution, packed full of best-practice features and proven workflows, is designed for rapid deployment offering a faster time-to-value and helping you quickly, and easily, regain control of your industrial hygiene program.

Key Features

Survey and Monitoring

Automate monitoring plans to speed up performance tracking, transfer data easily to external labs, and effortlessly compare results against exposure limits to determine compliance

Mobile-enabled data capture

Easily record and upload monitoring data right from the field from any mobile device, reducing secondary administration, reducing errors and helping to address issues early

Similar Exposure Group Management

Group employees together based on user-defined criteria to streamline monitoring plans and easily extrapolate results to trigger associated surveillance activities

Business Intelligence and Analytics

Track metrics and uncover key insights effortlessly to help you make the best decisions to manage hygiene risks

Key Benefits

Rapid deployment

Our purpose-built solution reduces the time needed to deploy a world-class industrial hygiene software platform, improving user adoption, reducing costs and speeding up your overall time-to-value. This fast-tracked deployment ensures you see gains in your hygiene program results immediately.

Enhanced visibility to data and insights

With intuitive dashboards and advanced data visualizations, we make it easier than ever to assess your hygiene performance at a glance, helping you drive accountability while revealing the actionable insights that help you make the most intelligent decisions on where to prioritize your time and resources.

Better accountability & follow-up

We make it easy for your team to stay atop of necessary actions to address identified hygiene risks. With simple tools to quickly monitor the status of assigned tasks, we help your business create a culture of accountability required to reduce the impact of hygiene risks on your workforce.

Simplified compliance

Automated action scheduling, alerts and workflows ensure tasks critical to your hygiene program are never missed and at-risk exposures are addressed quickly before they lead to non-compliance citations. Cority simplifies data collection enabling you to meet reporting timelines to key stakeholders, and helping to keep your business off the regulator's radar.

A program that fits your needs

With Cority, we provide best-in-class hygiene software solutions aligned to your immediate needs, but that can grow with your business. We help your business get its hygiene program on a solid footing, and provide opportunities to bolt on additional features based on your timing and unique requirements.
