

## PRESS RELEASE

### **Tour the Sacramento Dentistry Group**

Many patients say that one reason why they are afraid to visit the dentist is that it's just too uncomfortable and unfamiliar, especially for children. To familiarize themselves with a neighborhood, many drivers or homebuyers use Internet technology to tour a neighborhood in advance by using Google Earth. With the Sacramento Dentistry Group, you can do the same!

#### **A Virtual Tour On the Home Page**

The Sacramento Dentistry Group uses Google technology to present a virtual tour of their downtown dental office via their website. Access to the tour is available on the [home page](#). Nearly every room and chair can be seen in the entire clinic by simply using the "click to navigate" controls. Anyone who has ever played an adventure game or used Street View in Google Maps is familiar with the navigation system.

By touring their [well-decorated and calming office](#), clients get a first-hand view of what to expect when they visit this modern dental clinic. And if that's still not enough to ease anxiety, their Sacramento dentists also offer various forms of sedation therapy, including the popular [sleep dentistry](#). You can literally "avoid" a dental procedure entirely while actually having it done!

For dental patients who would like more information in person about the Sacramento Dentistry Group, contact them at their downtown Sacramento office on 1105 E Street, via their website at [sacramentodentistry.com](#) or by calling 916-538-6900.
