BlueFletch Healthcare

BlueFletch Healthcare Overview

BlueFletch Healthcare is a HIPAA-compliant authentication platform for mobile devices and computers in clinical environments. Built on enterprise solutions trusted by Fortune 500 companies for over a decade, it delivers instant, secure access to patient information with the highest data protection standards.

Solution Components

Android
- Login, NFC, Biometrics, 2FA
- SSO Support for All Apps
- Extended Desktop Capabilities
- Password Management
- Support Agent/Device Locator
- Remote Management

Windows
- Windows SSO Login
- NFC Badge Tap
- Analytics Agent
- Support for Windows Tablets, PCs, and Rugged Tablets

iOS
- NFC Badge Tap Authentication
- Encrypted Virtual Container with all BlueFletch Android Features
- Company-Owned or BYOD Device Support

Key Differentiators

BlueFletch Healthcare is a separate offering from BlueFletch Enterprise, specifically designed for clinical settings:

- **HIPAA Compliant** – Features are HIPAA audited, ensuring regulatory compliance out-of-the-box
- **Healthcare Specific Features** – Purpose-built components for clinical use cases
- **Flexible Monthly Pricing** – Predictable pricing for healthcare budget cycles
- **iOS Per-User Model** - Per-user licensing to accommodate both BYOD and shared device scenarios

BlueFletch Healthcare

Smarter Access
Safer Devices
Empowered Employees

Example Use Cases

Shared Mobile Device Login / SSO

Eliminate password sharing and improve employee experience with secure access to shared devices while maintaining full audit trails

Workstation on Wheels Badge Tap Login

Reduce login time 75% with badge tap authentication for Windows workstations, enabling clinicians to focus on patient care

Customized Workflow Automation

Streamline clinical workflows with automated, role-based task execution and app launching based on user and location

Why Choose BlueFletch
