

healthystart™

Beautiful Smiles Are Just the Beginning

The Healthy Start System is an all-natural, non-pharmaceutical, and non-surgical treatment option delivered exclusively by specially trained dentists. Healthy Start is a series of uniquely designed oral appliances worn a few hours a day and/or during the night while the patient sleeps. These soft comfortable appliances address the root cause of Sleep Disordered Breathing, promote nasal breathing, and discourage mouth breathing as they widen the dental arches and help develop the jaw while straightening teeth – just as nature intended.

The Healthy Start System is designed to address:

- Symptoms of Sleep Disordered Breathing
- Development of the Dentition
- Development of the Jaws and Facial Profile
- Opening up the Airway
- Straightening of the Teeth
- Facilitating Dental Arch Expansion
- Positioning and Training the Tongue for Correct Tongue Placement
- Correcting a Tongue Thrust
- Teaching Proper Swallowing
- Promoting Nasal Breathing
- Eliminating Oral Habits such as Thumb or Finger Sucking
- Correcting Overbite, Overjet, Crowding, Gummy Smile, and Cross-Bite

The Healthy Start System is best used in kids as early as age 2 to age 13. It is a great way to expand your practice and provide parents with options of how to not only straighten their child's teeth, but to create healthier children who develop properly. Our system works with the child's growth to correct malocclusions and create permanent change that does not require retention after the age of 12. We also address the symptoms of sleep disordered breathing and alleviate and eliminate those symptoms.

Sleep Disordered Breathing Symptoms:

ADD / ADHD	Nightmares
Bed Wetting	Chronic Allergies
Difficulty in School	Crowded Teeth
Mouth Breathing	Overbite/Overjet
Snoring	Dark Circles Under the Eyes
Restless Sleep	Swollen Adenoids/ Tonsils
Aggressive Behavior	Delayed Growth

SEMINAR ENROLLMENT

Comprehensive Presentation and Hands-On Clinical Training

- Classroom and hands-on training
- Course fee covers admission for 1 doctor and 4 staff members (additional fees apply for extra staff members)
- CE accredited training
- Systems and sales training for staff members that supports and reinforces the doctor training

When you attend the new provider course, participants will understand Sleep Disordered Breathing, its symptoms, the root cause, and treatment with the Healthy Start system that will address health issues while straightening the teeth. The diagnostic criteria and treatment process will be covered.
