

Center-Based ABA Program

Our center-based ABA program provides a learning environment to help your child develop successfully. The program targets specific needs of children ages 18 months - 6 years that will focus on increasing language/communication, social skills, self-care skills, and decreasing challenging behaviors that prepare your child to be successful in the classroom, home, and community. This program provides ABA services Monday through Friday. Depending on your child's assessment, they could receive 20-30 hours per week of ABA instruction.

Activities Offered

- 1:1 instruction throughout the day
- Circletime when your child is ready
- Arts & Crafts to practice a variety of skills
- Social skills
- Life skills (including toilet training)
- Motor activities to develop fine & gross motor skills
- Snack & Lunch (family provided)

Program Benefits

- Activities that promote language and communication
- Opportunities for social groups and peer interactions
- Structured routines and consistent implementation of teaching goals
- Increased/On-site BCBA supervision
- Direct and Intensive Speech Therapy (as approved by insurance)
- Occupational Therapy (as approved by insurance)
- Collaboration between all services provided (e.g., speech, occupational, and behavior therapies) for consistent goal implementation
- Pre-academic practice with daily routines and transitions

We currently offer center-based therapy at
Danvers • Middleboro • Wellesley Hills

Parent Participation

Parents will have the opportunity to participate in trainings and learn how to implement intervention techniques, to demonstrate understanding of generalization programs, and to generalize the child's skills, behaviors, and behavior plans to their home, school, and natural environment.

Puddingstone Place

Life changing

“Approaching autism and developmental disabilities in a new light”

Center Hours	Ages	
8:30a – 12:30p	18 months to 6 years	Number of ABA hours is determined by the insurance authorized assessment & treatment plan. Length of center day may increase if child receives speech and/or occupational therapy.
8:30a – 2:30p		
1:00p – 4:00p		

Motor Skill Development & Social Skills

Children have opportunities to develop gross motor skills and self-regulation, as well as social skills in our motor room. Children can engage with peers in common activities such as playing tag, swinging together, or taking turns jumping on a trampoline.

About Us

Our innovative, evidence-based instruction incorporates cutting edge technology and customized visual supports. Puddingstone Place™, LLC offers a unique center-based therapy program that integrates applied behavior analysis (ABA), speech therapy, and occupational therapy (OT) to improve overall quality of life for your child. Our clinicians work together as a team to develop individualized programming utilizing the Visual Immersion System™ (VIS) specifically licensed to Puddingstone Place™, LLC through Boston Children’s Hospital.

Insurance

Applied Behavior Analysis (ABA) is an intensive therapeutic research-based methodology proven to successfully treat children diagnosed with Autism Spectrum Disorder. We gladly accept most major insurances for all services. We encourage you to contact your insurance company to verify if you have the ABA benefit. We are happy to assist you with this process if needed.
