Powerful application delivery, security, performance and reliability

snapt

Snapt Summary

Snapt develops high-end solutions for application delivery. We provide load balancing, web acceleration, caching and security for critical services.

Our products and services are designed to improve and protect our clients' virtual infrastructure while providing fast delivery and a stellar customer experience.

We work with some of the biggest companies in the world to ensure their websites and services are always online, lightning fast and secure.

Today, Snapt has 10,000 customers stretching across more than 50 countries.

Addressing challenges in the ADC market

Snapt is the **best solution** for your application delivery requirements

Need to **improve performance of critical services**

- **50-80% reduction** in upstream load
- SSL and compression offloading
- Caching

Need to **drive business costs down** and **reduce TCO**

- **Lowest cost per request**
- Most features of any competitor
- **All inclusive**, no addons or limitations

Need to **improve security of data and servers**

- Full Web App Firewall
- **Denial of Service protection**
- Full HTTP/S proxy
- **PCI compliance**

Need to **ensure uptime of critical business services**

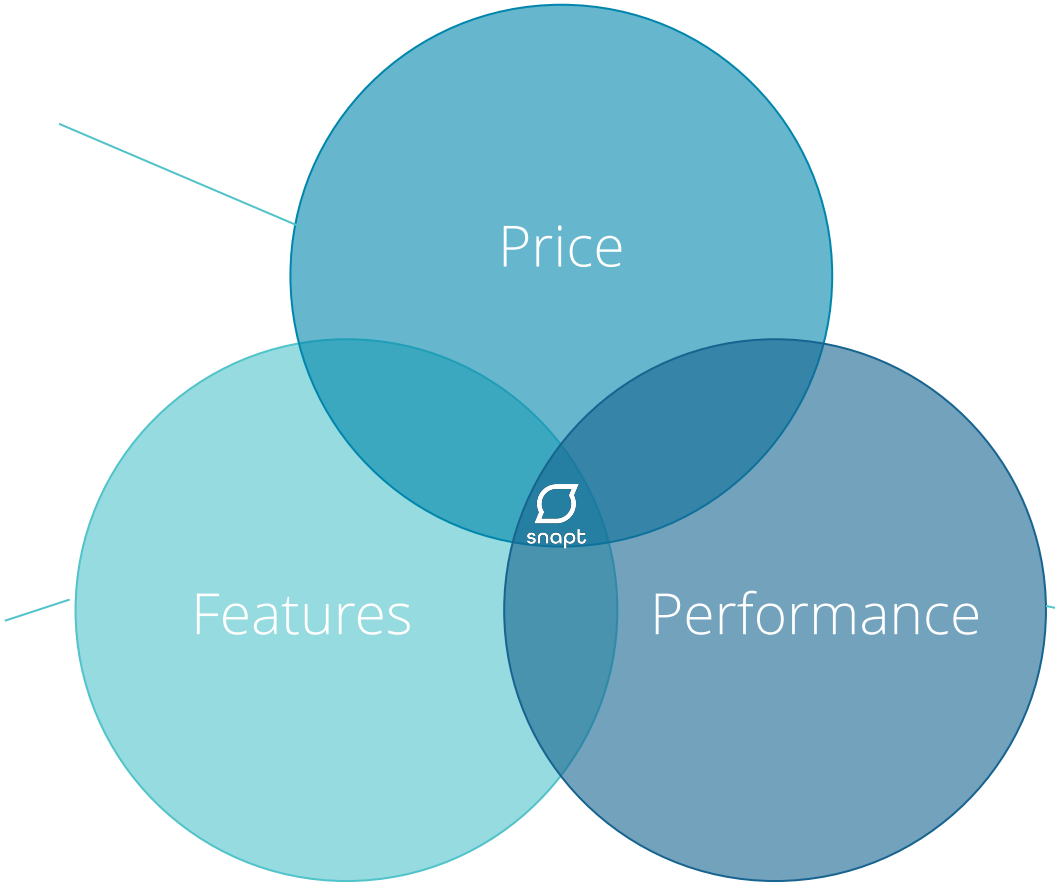
- Full Layer 7 load balancer
- **Feature-complete**
- High performance
- **Designed for VMs and cloud**

snapt

Snapt vs the ADC market

Key value differentials of Snapt

- Snapt is SAAS
- Has the lowest cost/request
- Includes all products
- Includes full 24/7 support



- Snapt is a full ADC
- No feature-locking or addons required
- Best feature-set in the market
- Easy-to-use and deploy

- Snapt is designed for VMs and Cloud
- 100,000+ Layer 7 requests
- 10,000+ SSL TPS
- Low VM/hardware requirements
- No ‘power locking’ (CPU, etc)

snapt

Snapt vs Competitors

A look at how Snapt compares to competitors in the market.

snapt

Competitive comparison

	Performance	Security	Analytics and reporting	Ease of Use	TCO
F5					
KEMP					
Citrix					
Snapt					

F5:
Comprehensive product set, brand leader, excellent application. Extremely expensive and cost prohibitive; requires training, investment and vendor lock-in; upgrades are limited – equipment is often discarded as clients grow.

Kemp:
Primary focus on hardware with more expensive product and support offerings.

Citrix:
Flexible licensing, brand awareness. Limited HTTP/S optimization and feature set, high cost, training required.

snapt

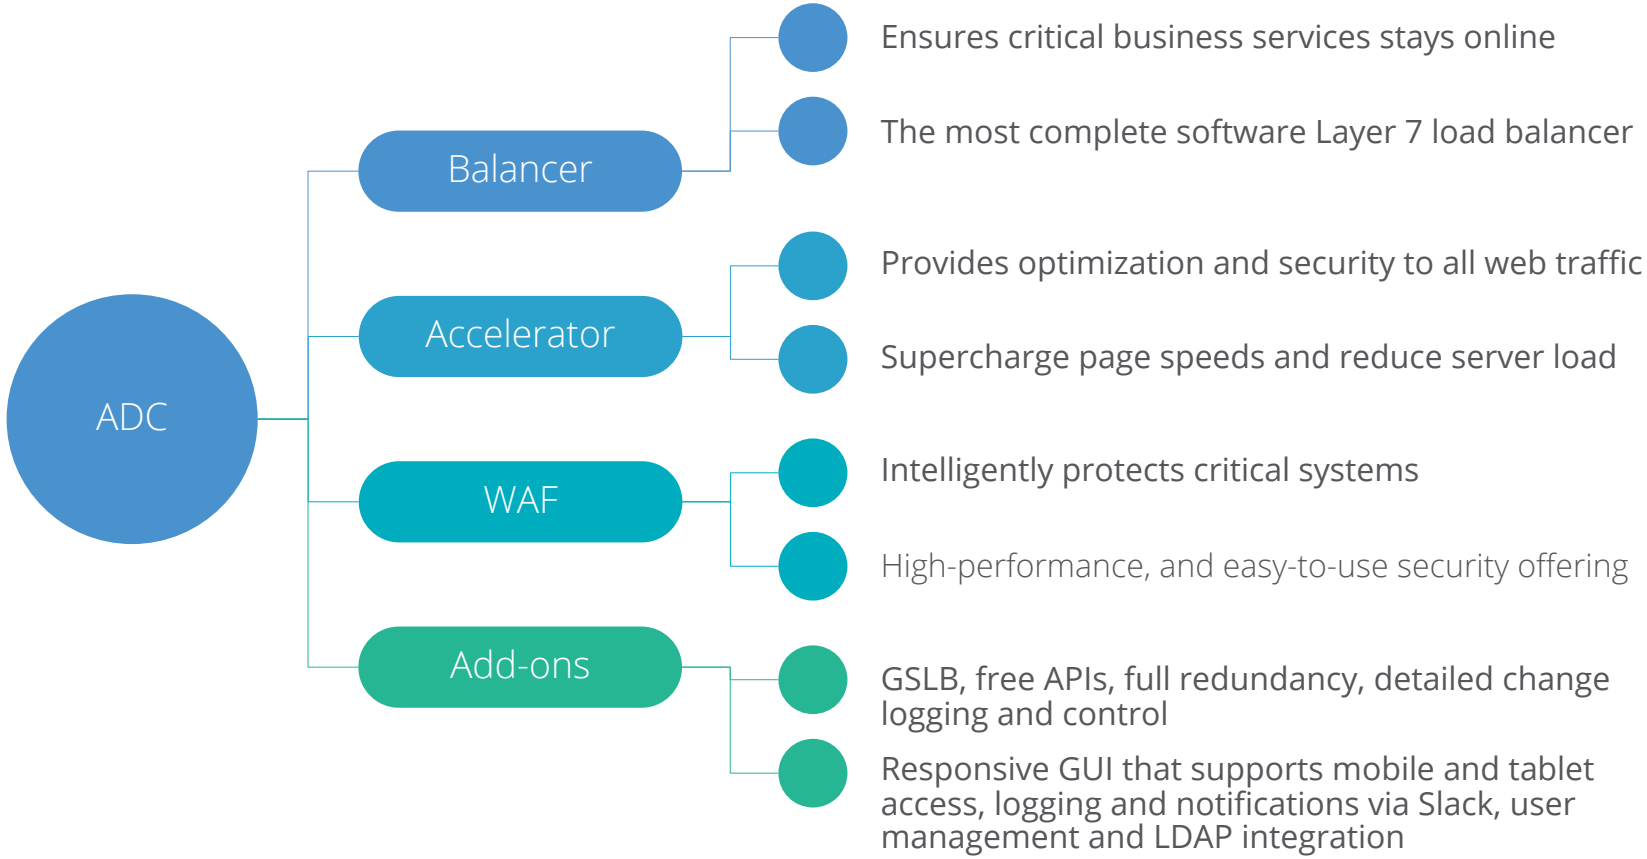
The Snapt ADC

Snapt can be deployed on any network, in any environment. Snapt is a software-only product and includes the entire product suite, making it most complete ADC available.

snapt



ADC
Balancer
Accelerator
WAF
Add-ons
Ensures critical business services stays online
The most complete software Layer 7 load balancer
Provides optimization and security to all web traffic
Supercharge page speeds and reduce server load
Intelligently protects critical systems
High-performance, and easy-to-use security offering
GSLB, free APIs, full redundancy, detailed change logging and control
Responsive GUI that supports mobile and tablet access, logging and notifications via Slack, user management and LDAP integration

Balancer

True layer 7 load balancer

- Layer 7 load balancer
- 100,000+ L7 RPS
- 10,000+ SSL TPS

Easy to deploy & manage

- 5 minute setup
- Easy to learn and control
- Full installation support

Full redundancy

- Active/passive redundancy
- Automated replication and failover
- Always online

Feature packed

- SSL termination and re-encryption
- Custom health checking
- Detailed reporting and visibility

snapt

Accelerator

HTTP/S web accelerator

- Offload webservers
- Accelerate client performance
- Decrease loading times

Burst proof

- Handle bursts easily
- Prevent DoS attacks
- Advanced warning systems

Offload services

- Cache static (and dynamic) content
- Offload SSL
- Handle HTTP/2 and A+ SSL

Content rewriting

- Automatically minify & combine JS/CSS
- Reduce images remove whitespaces
- Adjust expiry, content and compression

snapt

WAF

Layer 7 web firewall

- Inspect HTTP/S requests
- Achieve PCI compliance
- Prevent intrusion attempts

Mitigate DoS

- Prevent DoS attacks
- Limit brute force attempts
- Block bad users

Blacklists

- Automatic blacklist sharing
- Prevent known C&C and botnets
- Custom whitelists, blacklists, and more

Control performance

- Limit requests per second, throughput
- Complete HTTP/S proxying
- Prevent hotlinking and spam

Reporting and Analytics

An overview of the Snapt reporting and analytics capability.

snapt

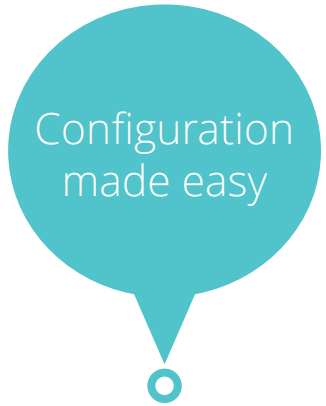
Snapt's Reporting and Analytics Features

Why Snapt? Ensure a high level configuration view, and see and manage problems before they happen thanks to Snapt's pro-active alerting.

Reports, graphing, alerts, live dashboards and more let you see incredible detail about your users.

Manage and configure the program, collect detailed reporting information.

Hundreds of visibility metrics and performance graphs, as well as a full suite of alerting and reporting capabilities.



You can create and edit frontends, backends and listen groups. You can also edit ACLs, view logs, monitor throughput, and more!

snapt

Product-wide features

Supports any Linux, VM or cloud

High availability for critical services

Prevention of intrusions and information disclosure

24/7/365 support from DoS and security specialists

snapt

Best in class support

Snapt offers the lowest response times in the industry

24/7/365

We provide 24/7 dedicated support.

Expert help

We do not outsource any of our support.

Support for all

All packages include global 24/7 support.

Enterprise

Enterprise packages have SLA guarantees.

snapt

Pricing Guide

An overview of Snapt pricing with options for Standard and Enterprise packages.

snapt

Standard pricing

Standard Snapt packages are designed to accommodate the needs of small and medium businesses, providing a balance of functionality, performance and support.

Support included with Standard Pricing:

- 24/7/365 global support with an average response time of minutes
- Knowledgeable in-house support staff
- Online, responsive system, with large knowledge base
- Full stack support, including the operating system

Name	Upstreams*	Connections	Support	$/month	$/year
Bronze	5	250	Basic	$55	$450
Silver	15	2,500	Basic	$99	$799
Gold	30	10,000	Standard	$150	$1,200
Platinum	50d	100,000	Standard	$220	$1,850

Redundancy

Gold and Platinum licenses have redundant bundles. The second license is 50% cheaper.

Includes All Products

Gold and Platinum licenses have redundant bundles. The second license is 50% cheaper.

*An upstream is a server behind the load balancer – sometimes called a backend. For example, if you are load balancing your website, the bronze package lets you have 5 webservers behind Snapt.

snapt

Enterprise pricing

Snapt Enterprise is aimed at businesses with large-scale or critical services.
This includes SLAs, consultancy and free redundancy, without sizing or scaling limits.

Support included with Enterprise Pricing:

- 24/7/365 global support with SLA-backed guarantees
- Knowledgeable in-house support staff
- Online, responsive system, with large knowledge base
- Full stack support, including the operating system

Name	Requests/second	SSL TPS	Throughput	SLA	Price
ADC-500	50,000	1000	2gbps	4 hours	$4,900
ADCX-5G	75,000	2000	5gbps	4 hours	$9,500
ADCX-10G	Unlimited	Unlimited	10gbps	4 hours	$17,900

Redundancy

Enterprise licenses include a second license for free. You pay nothing for full redundancy.

Includes All Products

All the Snapt pricing options include all our products: the load balancer, web accelerator, WAF and more!
