

*Transforming Knowledge into Application*

## **ABOUT ECO EARTH SCIENCES INC.**

ECO Earth Sciences Inc. is an aboriginal owned and operated Environmental Technologies Organization with offices in Burlington & Toronto, Ontario as well as New York, NY.

Innovations developed by ECO Earth Sciences Inc. have been used by the private sector, multiple branches of the military in both Canada and the USA, numerous government agencies, provinces, states, and over 200 cities and counties on four continents.

Current R&D projects include responsible alternatives to synthetic chemicals, the decontamination, and purification of drinking water in remote regions, new ground-breaking technologies for the remediation of contaminated soil and groundwater, and innovative solutions to address the infrastructure deficit for the emerging large class EV and HEV transportation sector.
