

Conquer new possibilities

What could your organization do if you could spend more time focused on its growth? With Managed IT Services from ISG Technology, you could crush that time-stealing tyrant that is basic support, routine maintenance or network security. All of which frees up time to focus on taking your organization to the next level.

With ISG Managed IT Services, you get the proactive support you need to reduce downtime, mitigate security risks and keep employees working. So you can focus on helping your organization soar.

If you had a superhero utility belt, this stuff would be in it.

The latest technology, a dedicated team, and rock-solid processes. They are what keep your network up and productive – and you looking like a hero.

State-of-the-Art Tools
to always be in the know

24 X 7 Network Monitoring

Best-in-class technology products monitor your network around the clock – ensuring systems are operating and functioning as expected.

Alerts & Notifications

Our system is configured to keep you aware of potential issues that could occur as technology updates and ages – well before you ever experience failures or costly downtime.

Proactive Maintenance
to stay ahead of issues

Infrastructure Maintenance

ISG's Network Operations Center is staffed with certified engineers who are trained to provide proactive support for all your network devices including servers, SANs, routers, firewalls, switches, wireless controllers, and access points.

Patching & Updating

The integrity and security of your endpoints and network devices will always be maintained with our standardized patching procedures.

User Support
to keep your employees happy and productive

Help Desk

Don't let basic support for your users bog down your valuable IT resources. Let the ISG Help Desk help them Mon-Fri, 8 a.m. - 5 p.m.

Domain Administration

Take those account unlocks, changes, adds, deletes and password resets off your plate.

Desktop / Laptop Support

Whether it's an issue with hardware, software or the OS, we'll help figure it out.

Mobile Device Support

We'll get mobile devices connected to the network and help setup email.

Online Support

A simple, easy-to-use online portal gives users the ability to log issues and view real-time status.

Email Support

Logging issues is also as simple as shooting an email to our support desk anytime they occur.

Phone Support

Yes, real live people will help your users when a more personal touch is needed (or if the Internet is down).

It's like an entire league of defenders ready to spring into action

Need a special team or skill set that is hard to find? Call in one of our advanced managed services to help you overcome any challenge.

Cloud Backup & Replication

The ultimate in data protection and defending against downtime.

Hosted Voice

The modern phone system you need to stay connected wherever you or your employees do business.

Managed Security

The next level of protection you need from the evil forces trying to penetrate your network.

Office 365+

The tool that sets the bar for email and collaboration plus data protection and management.

Let's Join Forces and Conquer New Possibilities

With a full team of IT support professionals proactively managing your technology and supporting your users, you can get back to doing what you do best. Contact us today to learn more.
