# Tired of spending your time looking for information versus putting it to use?

My answers are in there, but where?

Today, I"ll spend hours searching through our company's repository of **folders**, **subscriptions** and **tools**.

Lucy

Finding answers in just a few minutes. Saving time around the globe.

Knowledge workers spend up to 25% of their time every week searching for information they can't find.

Lucy can solve this problem, turning hours into minutes.

Lucy assists teams across an organization with the capability to easily access and leverage all of the valuable enterprise knowledge that has already been created and accumulated through time, money and insights.

Hiring Lucy will help uncover valuable knowledge and data
(some that you may not even have known was there).

✓ Save time and money by avoiding redundant research

✓ Efficiently share knowledge and insights

✓ Automates standardized data asset tagging

✓ Leverage valuable video (and audio) assets

✓ Reduce strain on subject-matter experts

✓ Preserve information usually lost during employee transition

Lucy Helps With
Mergers & Acquisitions:

Through the M&A process, most companies will experience times of rapid change. There can be a huge transfer of data and knowledge, as well as a huge disruption of people. Lucy is the perfect solution as she can automate a seamless transfer of information, preserve valuable historical knowledge and keep employees up to speed with answers living within the influx of new data.

Lucy Helps With
Employee Transition:

Lucy works as a virtual assistant for employee on-boarding and support. Wherever an employee is working from, Lucy can provide answers contained within HR manuals, company historical information, training videos and other support material. In addition, as people leave or change roles, Lucy ensures tribal knowledge is preserved and can be easily leveraged.

Lucy Helps With
Sales & Marketing:

A tremendous amount of information lives in customer questions and detailed responses, sales playbooks, presentations, office documents and more. The more content created, the more difficult it becomes to access, potentially leading to lost sales productivity and wasted marketing efforts. Lucy ensures everyone finds the right content at the right time.

Lucy reads, listens, watches and learns all of the data that you share with her. She never leaves, never forgets and becomes smarter every day.

Lucy Helps With
Technical Documentation:

In many large organizations, existing systems may have been designed and deployed by prior teams, contractors or vendors no longer engaged and the "know how" often lost. Lucy can use the source documentation, training manuals, FAQ's and other supporting material to provide those long lost answers.

Lucy Helps With
Research and Insights:

Many large businesses have these groups who are responsible for finding the latest insights and trends related to business challenges and strategic planning. Lucy's ability to mine prior research, subscriptions and tools can turn hours and days of digging through systems into minutes.

Lucy Helps With
Customer Success:

These team members need access to proper documentation, case notes and the most relevant, up-to-date information. Lucy unifies the knowledge living across teams and makes it easy to retrieve. She ensures consistent information will be passed on to the customer on every channel.
