

Bazaar Ltd. is an Israeli company, founded in 2012, that develops a design platform. Bazaar serves 1.5 monthly active users, who created over 1 billion designs. Bazaar is self-funded, profitable, and monetized with subscriptions. Its mobile apps are in the top 30 grossing of the Photo & Video category on the App Store and top 20 grossing of the Art & Design category on Google Play.

Bazaar helps people without a design background create professional looking designs easily. It combines AI-powered creative tools, fast processing times, and unparalleled simplicity. Using its powerful yet simple editor, people can remove the background from photos and videos, change existing photos or create new ones, erase unwanted objects and people, and mix photos, videos and graphics into amazing designs.

Bazaar offers thousands of beautiful templates that allow people to create a great design easily and quickly. In addition, it provides a constantly updated selection of design assets such as graphic elements, fonts, stock video, photo and music. Bazaar is used for both personal and business purposes, ranging from family collages, invitations and greeting cards to social media reels, stories, posts, flyers, logos and posters. Bazaar is available for download on the [App Store](#) and on [Google Play](#).
