Key Features and Functions

- **Radio connector available to fit handsets of all major makes and models**
- **Heavy duty strain relief on both the speaker microphone and radio connector**
- **Removable heavy-duty clothing clip**
- **Large and easily locatable push-to-talk button**
- **Omni-directional microphone**
- **Exceptionally audible built-in speaker**
- **3.5 mm audio jack for use with listen only earpieces**

EarHugger® continues to listen to feedback from long time users, and designs innovative new products based on their recommendations. The Heavy Duty Speaker Microphone has been rigorously tested and designed to meet the demands of law enforcement, military, and private security agencies. It has a gold-plated radio connector to ensure crisp and clear transmissions. It also comes equipped with an extended range premium speaker to ensure transmissions can be heard even in the noisiest environments.
