CHILD DETERRENT

InSyte The Gun Guardian has been designed to protect our young ones and to help reduce the injuries and fatalities caused by unintentional accidents.

18

THEFT DETERRENT

With its integrated Stealth Camera and 95 decibel double alarm system, InSyte will hinder considerably the probability of your firearm being stolen.

A WORD FROM THE INVENTOR

"InSyte - The Gun Guardian - you will never feel safer with a gun."

HELLO,

LYNNWOOD FARR MANAGING DIRECTOR

Inventor of the revolutionary InSyte 1. His extensive thirty-three year career with General Dynamics Corporation, and his commitment to security led him to design InSyte 1.

First and foremost, let me express my gratitude for showing interest in this new and groundbreaking product that we are releasing to the market.

INSYTE PROJECT

The idea of InSyte originated from the escalation of news related to accidents originating from the misuse of firearms. New channels of information such as Internet and social

media are showing that these accidents happen more frequently than ever revealed before. These unfortunate accidents have always troubled me greatly and made me wonder why there was nothing in the market that would deter such events from happening. One day, I decided that if no one was going to take action to invent a method to make firearms safer, then I would form a team that would find the solution. With the help of this

team of gun and safety enthusiasts, engineers and manufacturing specialists, we have developed a product and have named it **InSyte - The Gun Guardian.**

HELP US CHANGE THE FUTURE

No matter where one positions itself in the gun debate, I am sure you would agree that we must protect the lives of our young ones. By reading this brochure and making InSyte known to the public, you are helping improve safety for American children.

ABOUT AWS

Get to know more about the company behind InSyte The Gun Guardian.

INSYTE

THE WORLD'S FIRST FIREARM WARNING SYSTEM

➔ InSyte 1 is an inventive gun alarm that is a game changer for firearm safety. InSyte 1 can significantly limit the number of accidents resulting from the misuse of firearms. InSyte 1 may lower gun theft and the misuse of firearms by persons that may consider acts resulting in self-inflicted injury.

AWS Information Systems Team

CONTENT

AWS National Sales and Marketing Team

Advanced Warning Systems is proud to announce the introduction of InSyte The Gun Guardian - an innovative new product designed to improve the safety and protection for firearms. InSyte engineers have invented a revolutionary product addressing the safety and security needs of firearm owners. This design allows firearm owners to safely store their firearms for quick access if needed. It is the only product on the market that will notify the firearm owner of unauthorized access to their firearm. InSyte The Gun Guardian will greatly reduce the risk of accidents, self-harm and theft.

InSyte 1 may help you protect your children from misuse of your firearm.

InSyte THE GUN GUARDIAN

This innovative, family oriented product is a game changer to firearm safety. InSyte 1 can significantly limit the number of accidents resulting from the misuse of firearms. Just as automotive seat belts became a game changer in driving safety, we believe The Gun Guardian will have the same effect for saving lives. InSyte 1 may also lower gun theft and the misuse of firearms by persons that may consider acts resulting in self-inflicted injury.

WHAT IS INSYTE THE GUN GUARDIAN?

InSyte is a product primarily designed for our future, youthful generation, America's children. Today, there is more and more devastating news about accidents involving children and the inappropriate use of a firearm. The pain, anguish and grief of each and

every single new happening related to this major gun safety issue in America, made a group of Americans in Lake Havasu City, Arizona provide a step ahead and take action in this serious matter. Initially the idea was to enhance the devices that are already in the market. Soon enough it

was evident that the products available in the market are not sufficient. All of the products would render the firearm inoperative and inaccessible hindering the possibilities of self-defense, in the worst case scenarios.

INSYTE 1

InSyte 1 is a two-piece assembly device that is composed of a Main Electronic Probe Assembly and the Slide Member. InSyte 1 is made of high-grade polymer for strength and resistance. The entire assembly weighs only 3.2 ounces.

The question arose: "How can we make a device that is safe, secure and child deterrent, but at the same time allow one to have quick access to their firearm?" AWS engineers started to work hard to create the perfect blend of security and firearm accessibility. After a long time, hours and hours of investigation and development, AWS inventors and engineers began to work, create and innovate the perfect solution, the result being a unique device that has never existed before. This perfect compromise of safety and firearm accessibility gave birth to the World's First Firearm Warning System: **InSyte - The Gun Guardian**.

IS THEN INSYTE A GUN LOCK?

No, it is not. InSyte is a Firearm Warning System. It therefore, eliminates a blind spot in matters related to firearm safety and security, something that has never been accomplished before.

FACTS

CHILD DETERRENT

InSyte 1 will help reduce the accidents related to an accidental firearm misuse by the young ones.

THEFT DETERRENT

The InSyte 1 powerful alarm and InSyte 1 Stealth Camera will ensure the protection of your firearm against robbery intent.

InSyte 1 instructs all users at all times to mount and engage the InSyte 1 device only on firearms that have been verified by the user to be unloaded.

WHAT IS THE DIFFERENCE?

InSyte features a mechanism that renders the firearm inoperative while engaged. When the device is assembled on the firearm, the trigger block mechanism is designed to prevent trigger movement, and therefore an unintended firing. When properly assembled, InSyte's blocking mechanism features a strong resistance against child manipulation, making InSyte a child deterrent device. At the same time, InSyte features a stealth mechanism that allows the user to have accessibility to their firearms in 3 seconds or less. □

95 DECIBEL ALARM

InSyte 1 is equipped with a double alarm system. A 95 decibel alarm that will set off as soon as your firearm is moved or if the device is disassembled. A perfect deterrent for your kids that will understand that a firearm is not a toy.

INSYTE 1

Picture of the InSyte 1 device factory assembled

INSYTE THE GUN GUARDIAN

CARING FOR AMERICA'S YOUNG GENERATION

InSyte The Gun Guardian prioritizes the life of our future generation.

Children are the most vulnerable people in our society. Their curiosity and innocence mixed with unprotected and loaded firearms is a dangerous situation that on unfortunate occasions has proven to cause serious injury and even fatality. That is why we must protect them, care for them, and ensure their safety above everything else, even ourselves. InSyte The Gun

Guardian is designed to reach out to that empty void that renders children vulnerable

and unprotected. AWS, in its efforts to reduce accidental injuries, has equipped InSyte 1 with a

BELOW

Disassembled InSyte 1 model showing the Slide Member (left) and the Main Electronic Probe Assembly (right).

95 decibel alarm system similar to a fire alarm home system. The device when activated provides a loud alarm as soon as the firearm's position has been moved, and will alert you right away, but most importantly, will deter your children from further manipulation of the firearm.

TEST PROGRAM RESULTS

In order to ensure the reliability of the alarm system as a deterrent for children, AWS conducted a trial program to evaluate the effects of the alarm on children. In the study, as soon as the alarm sounded, all of children without exception, showed signs of being scared and left the firearm alone. They ran back to their parents ensuring them that they would not touch the firearm again.

THE ALARM EFFECT

The 95 decibel alarm sound that InSyte emits, serves as a reminder that the firearm is not a toy.

HOW IS THE ALARM STOPPED?

The alarm is designed to stop when the password has been entered.

InSyte comes with a factory set password that then must be changed by the authorized user. □

DID YOU KNOW?

According to the Bureau of Justice More than 33,000 accidental injuries are cause by firearms every year, with over 400 of those being children under the age of 14. 2013 CDC data shows that more than 500 people in the U.S. died from the accidental discharge of a firearm, with 14% of those accidental deaths occurring to children under the age of 14.

INSYTE CARES

PROTECTING YOUR LOVED ONES

THE ALARM SOUND WILL DETER YOUR CHILDREN

Our test program demonstrated that children will leave the firearm as soon as the alarm is activated.

USEFUL LINKS

- www.youtube.com/watch?v=GApE43bLOns
- www.youtube.com/watch?v=M86QxNZF3AE

Children are the future of our world and our beloved country. Taking care of them and showing them the importance of firearm security and safety will ensure a prosperous and safe future guarding our Second Amendment rights for generations to come.

Studies have shown that the initial reaction kids have when manipulating a firearm is to look into the barrel while innocently putting their finger on the trigger. This possibility is completely taken away with InSyte. Not only will the alarm deter children from manipulating the firearm, InSyte will block any access to the trigger and thereby eliminate possible injury to the child, friend or family member. □

SAFE AND SECURE

InSyte 1 is designed with a blocking system that will deter children from handling your firearm.

AWS engineers developed a unique mechanism that is both strong and resistant to be able to withstand the strength of kids 0-9 years old. Along with the blocking mechanism a stealth fast release has been designed to provide the customers instant access to their firearms. The high-grade polymer utilized in the construction of the device will ensure strength, resistance and an optimum grip.

BLOCKING MECHANISM
The InSyte blocking mechanism is composed of two sections: the probe and the slide member. The probe is

formed by a sequence of gripping teeth designed to deliver optimum adjustability and grip. The slide member is formed by two engagement pawls designed to engage with the probe's gripping teeth thus, firmly engaging both sections and providing a resulting strong resistance to removal.

STEALTH MECHANISM
InSyte's stealth mechanism, together with the motion alarm feature, is what makes InSyte 1 the unique and only warning device in the market. The slide member is equipped with two buttons that must be depressed simultaneously, with a certain amount of pressure and dexterity to enable the system to become disassembled. In addition and to enhance the stealth mechanism, the slide member is covered by a cushion grip that conceals the location of the stealth buttons. The stealth buttons ultimate purpose is to provide a child deterrent that will help prevent possible misuse of the firearm.

The InSyte stealth mechanism functions similar to pharmaceutical locking caps and therefore preventing the disassembling of the mechanism and enhancing the InSyte 1 child deterrent effect. □

CROSS SECTION OF INSYTE 1

Unveiling for the first time to the public, the InSyte 1 stealth and blocking mechanism.

1

STRONG MATERIAL

InSyte 1 is made of high-grade polymer to ensure strength, resistance and an optimum gripping. InSyte's engineers have carefully researched and chosen a material that is more than adequate for safe, secure operation and still will not damage the most expensive and favorite firearms.

2

STEALTH BUTTONS

InSyte 1 is equipped with a quick release mechanism that can be triggered only by pushing two stealth buttons that are hidden from sight by a cushion grip. If the buttons are not pushed simultaneously, the device cannot be disassembled.

3

ANTI-ALTERING

Ultimately, InSyte 1 is designed to fit most firearms in the market without altering or damaging the firearm. You will be able to assemble and disassemble your device as many times as you need without creating any damage or scratching of your firearm.

SLIDE MEMBER

The Slide Member is equipped with an elastomer to enhance the Stealth Mechanism and prevents children to disassemble InSyte.

CHILD RESISTANT

InSyte Stealth Mechanism is designed to withstand the strength of kids 0-9 years old. The high-grade polymer used in the construction of the probe and slide member, along with the powerful springs, will ensure an optimum grip resistant to your little ones.

PROTECT

Your loved ones from an accident related to the misuse of a firearm.

ASSURE

Your family can be assured they are fully protected by having immediate access to their firearm.

GUARANTEE

That InSyte 1 has been designed to bring your family security and safety.

SAFEGUARD

Your family by having your firearm fully protected and ready at all times.

SECURITY EVERYWHERE

PROTECTING YOUR GRANDCHILDREN

Enjoy the visit of your grandchildren like never before.

Many firearm accidents have occurred when the grandchildren try to find where grandpa's firearm is hidden. Some other accidents have happened when grandpa forgot to hide his safety firearm in the night table, exposing it to his grandchildren.

are visiting. There is nothing more beautiful than having the visit of your little loved ones, while knowing that they are fully protected from any threat from the outside or within the home.

SELECTED QUOTES

"Parents are the ultimate role models for children. Every word, movement and action has an effect. No other person or outside force has a greater influence on a child than the parent."

Bob Keeshan

PROTECT YOUR CHILDREN'S FRIENDS

CARING FOR OTHERS

Accidents happen when our children try to show dad's guns to their friends.

There have been cases where accidents and even fatalities were caused by children trying to impress their friends by showing them "dad's" guns. Children are often unpredictable. Even when we tell them not to do something or when we talk to them about gun safety, curiosity and showing off with their friends make them override mom and dad's advice.

your children's friends, an extra sense of protection providing gun safety for their children. The parents will know that their children can experience a great day safely. Let's help your kids build great memories with their friends without worrying that something could go wrong regarding gun safety.

HELPING YOUR KIDS AND YOUR KID'S FRIENDS

InSyte 1 may help protect not only your children, but also their friends. InSyte may provide the parents of

"InSyte cares for you, your children and your children's friends."

INSYTE ELIMINATES THE TEMPTATION

Your kids will soon identify your firearm as a measure of protection that can only be manipulated by adults.

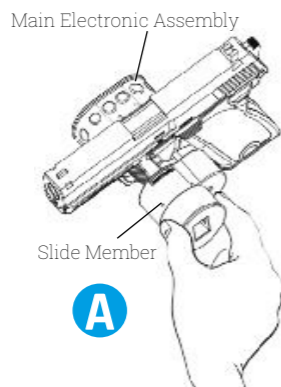

YOU WILL NEVER FEEL SAFER WITH A GUN

HOW INSYTE WORKS

Get an insight of the world's first Firearm Warning System:
InSyte - The Gun Guardian

InSyte is composed of a two piece assembly (image A) that attach to each other securing the firearm trigger mechanism. When the two pieces are properly assembled, InSyte will become a secure, solid and resistant device, blocking your firearm from an unintentional discharge.

entering the sequence of key commands, always with your personal ID. Once InSyte 1 is armed, the device will be ready to warn the customer of any unauthorized manipulation of their firearm.

HOW IT IS POWERED
InSyte works with batteries. It takes one 3.5V CR2450 Lithium battery and four 1.5V LR44 Alkaline batteries which are included in the InSyte 1 device when shipped.

🔊 InSyte speaks English and Spanish! 🗣️

ASSEMBLING INSYTE 1
The blocking assembly is produced by two components of the device: the probe, which is the component serving as a connector between the Main Electronic Assembly and the Slide Member. The Slide Member component is equipped with two pawls powered by a strong spring that generates a strong resistance and maximum grip engaged with the probe.

The Blocking Cam is the second component of the Main Electronic Assembly. It is an adjustable cam that extends through the trigger guard and behind the trigger, causing the trigger to be inoperative until the InSyte 1 device is removed.

ARMING INSYTE 1
Once InSyte 1 has been properly assembled on the firearm, the following steps will be to arm (activate) the device by

INSYTE THE GUN GUARDIAN

Picture of the InSyte 1 device assembled on a handgun. The sound waves represent the alarm sound emitted when unauthorized movement of the firearm.

The reason it was designed to take regular batteries and not rechargeable batteries is to allow the user to place the firearm wherever they wish, thereby not forcing the user to place their firearm and device next to an electrical outlet, leaving them exposed while recharging.

REMOTE CONTROL AND STEALTH CAMERA

AWS provides InSyte 1 customers with additional accessories to expand InSyte's capabilities. InSyte's signature Remote Control is designed to allow the user to remotely control the InSyte 1 device(s) via Bluetooth.

All the features of InSyte 1 can be performed with the convenience of a LED screen. It can also monitor up to 30 different InSyte 1 devices and/or InSyte Stealth Cameras.

InSyte's signature Stealth Camera assists the user for the possible prevention of theft of their firearm by video recording and capturing pictures as soon as the alarm is activated. 📷

FEATURES

INSYTE AMAZING FEATURES

InSyte 1 is designed and engineered to fit the customer's needs. Features have been designed to ensure complete customer satisfaction. Here are some of the quality features that come with InSyte 1 The Gun Guardian.

MOTION SENSOR SENSITIVITY

Using the InSyte 1's advanced software allows you to customize your warning system motion alarm sensitivity. Allowing you to choose the range of sensitivity before the motion alarm is activated.

TRAVELING

You can customize your warning system for traveling purposes. By deactivating the motion sensor alarm system, you will be able to travel with your firearm and enjoy the benefit of the protection while traveling and additional protection once you arrive. "Carry" with InSyte.

FITS MOST FIREARMS

InSyte engineers studied massive amounts of data to calculate a "one size fits all" that can fit most firearms in the market, either modern or vintage. If a customer finds a problem trying to assemble InSyte 1 on their firearm, the InSyte support team ensures that the problem can be solved within 24 hours.

REMOTE CONTROL

The Remote Control allows the user to control their device(s) and remotely access all functions that InSyte 1 offers (including arming and disarming the device), and to perform multitask operations on up to 30 combinations of InSyte 1 devices and/or InSyte 1 Stealth Cameras within their home or business.

AND MANY OTHER FEATURES AVAILABLE....

DISASSEMBLING INSYTE 1

BE READY AT ANY MOMENT

InSyte's unique mechanism has been designed to allow an authorized user to disassemble the InSyte 1 in 3 seconds or less. InSyte 1 has been designed to protect your **family** and **yourself**.

RESTING POSITION DESIGN

InSyte 1 is designed to position your firearm in a ready to be handled position, making sure the firearm's muzzle is aiming downward, which ensures normal gun safety rules.

1

USING INSYTE 1 BUILT-IN KEYPAD

Using the InSyte 1 built-in keypad allows the user to activate a personal password, as well as activate and/or deactivate both of the alarms. Once the password has been set, InSyte 1 can be ready for use in 3 seconds or less.

2

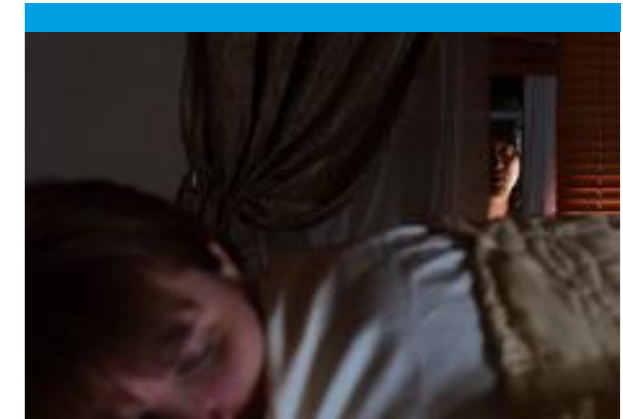

USING INSYTE 1 REMOTE CONTROL

Using the InSyte Remote Control provides the owner the option to remotely control activating and/or deactivating both of the alarms. A unique feature to activate an instant alarm with just a push of a button is also available.

3

DISASSEMBLING THE TRIGGER BLOCK REMOVAL ALARM

Studies have shown that an alarm is one of the most effective ways to deter an intruder. If the owner decides to disassemble InSyte 1 without introducing the password, the trigger block removal alarm will be activated, letting the intruder know that an alarm has been triggered, and he had better quickly flee as the noise may even alert neighbors.

PROTECT YOURSELF - PROTECT YOUR FAMILY

Our home is the place where we feel most comfortable. Home is the place where we find peace and build wonderful memories; our sanctuary.

Home is the shelter that embraces you and your family. However, there is a possibility that this shelter might be compromised and unfortunately, there are occasions in which we could have to defend ourselves against an intruder which could hurt you or your family members.

INSYTE THE GUN GUARDIAN

For most people, leaving their firearm in their night table provides them with an extra comfort if the worst-case scenario does happen. The only issue is that leaving firearms in the night table could lead to unintentional discharge generated by that stressful situation. In addition, one could also forget the next morning about the firearm and leave it exposed to the young members of the family. InSyte The Gun Guardian may be the ideal solution for both situations. InSyte may prevent unintentional discharge and alert you in case one of your little ones are manipulating your firearm. □

InSyte: Always *Caring*, always *Protecting*

INSYTE IS THEFT DETERRENT

 REC

WITH INSYTE STEALTH CAMERA

Using the InSyte Stealth Camera is the answer for theft deterrent. InSyte Stealth Camera starts video recording and capturing photos as soon as either of the two InSyte 1 alarms are activated. As the intruder flees, pictures and a video will be recorded.

Statistics show that most thieves will flee when they hear a valid alarm sound within the home or business. Now, with InSyte 1 Stealth Camera, as the intruder flees, a picture and video will be left behind to facilitate the possible recovery of any stolen firearm and the prosecution of the thief.

GUN THEFT IN NORTH AMERICA

According to the Bureau of Justice, about 1.4 million firearms were stolen during household burglaries and other property crimes over the six-year period from 2005 through 2010, according to a report released today by the Justice Department's Bureau of Justice Statistics (BJS). This number represents an estimated average of 232,400 firearms stolen each year— about 172,000 stolen during burglaries and 60,300 stolen during other property crimes.

InSyte  [®] THE GUN
GUARDIAN
STEALTH CAMERA

MOVING FORWARD

InSyte 1 is at the vanguard of gun safety and responsibility. Its design and features leave InSyte as the most innovative gun safety system in the market place.

IT ALSO FITS THE OLDIE GOLDIES

If you are a lover of old firearms, do not be concerned about InSyte 1 not fitting your firearm. AWS engineers have designed around even the oldest of firearms.

FIREARMS IN THE PICTURE

1495 Colt John Wayne Commemorative SAA revolver.

Winchester Model 94 - 44 Magnum.

The 2015 Gun of the Year: Kimber Pro Carry II 1911.

INSYTE VERSATILITY

FITS MOST FIREARMS

InSyte 1 has been designed to fit most firearms in the market, both modern and historical.

One of the most important factors when designing

InSyte The Gun Guardian was creating a versatile device that would fit as many firearms as possible. This is where InSyte 1 design gets the full spotlight and acceptance.

THINKING ABOUT OUR FUTURE CUSTOMERS

AWS research and development team, being formed by a group of gun enthusiast from all ages, thought that it would be important to create a device that will fit as many firearms as possible, not limiting its capability to the newest models, nor the best sellers. The InSyte 1 design is perfected to include old

model firearms that are important and special to a lot of gun enthusiasts.

THINKING ABOUT YOUR FIREARMS

Not only is the design focused towards fitting most of firearms, also the materials and components used in the creation of InSyte 1 were carefully selected to protect your firearm from damage. With InSyte 1 on your firearm, there are no friction, scratching or metal contacting your firearm. A perfect solution to gun owners who do not wish a friend or family member to action and snap a simulated round, thereby damaging the expensive firearm. □

INSYTE PRODUCTS

AWS

ABOUT ADVANCED WARNING SYSTEMS

Advanced Warning Systems (AWS) is an Arizona company with an aim to help America become a safer place.

OUR CUSTOMER, OUR PRIORITY

AWS is a company that prides itself to be customer oriented.

Advanced Warning Systems, LLC (AWS) is a young, energetic and enthusiastic company that has American citizens and well being solidly in its heart. From its founding until today, the reason why our team works hard everyday and the motivation that drives each and everyone of us, is the protection we provide firearm owners. Everything we do is aimed towards improving American's well being, safety and

security regarding their firearms. AWS operates out of Lake Havasu City, Arizona where we have our main distribution, support center and headquarters. We have the honor of working with representatives and collaborators around the USA. All of them driven by the same motivation: to provide America with the finest and newest technology for firearm safety and responsibility.

MISSION STATEMENT

AWS supports the constitution of the United States of America and its 2nd amendment through privacy and firearm ownership, guided by our Founding Fathers.

Support us in making America a safer place to live! ☐

HANGING OUT AT THE ORANGE COUNTY GUN SHOW
