OPERATIONAL READINESS ACTIVATION & TRANSITION (ORAT) CONSULTING

Axis operational readiness activation and transition (ORAT) program is designed to bridge the gap between construction and live operations.

Axis is at the center of every project, connecting and engaging construction teams, owners, operators, vendors, and front-line staff, to complete projects correctly the first time. More than construction management, we breathe life into your new facility, bridging the gap between construction and operations.

Our orat processes prepare all users of your new facility so that the systems, equipment, and staff are ready to operate on day one and beyond. Our deep experience managing large-scale facility openings offers you the reassurance that issues will be addressed ahead of time, and that key details won't fall through the cracks.

Typical Activation Hurdles

- Difficultly ensuring what is being built will meet end user requirements.
- Unclear understanding of what is changing, what is high-risk, & critical to the operation.
- Failure to include the right stakeholders, keep them engaged, and collect input.
- Missed deadlines, damaged reputation, & loss of knowledge.
- Decentralized management and lack of data driven decision making.
- Insufficiently trained staff results in bad customer experience, operational difficulties and lost revenue.

ORAT Program Benefits

- Reduced compliance errors by 90%
- Reduced schedule slippage by 76%
- Reduce change orders by 88%
- Increased asset reliability by up to 95%
- Reduced response times by up to 94%
- Continuity protection improvements of 89%
- Incentive discovery increase by up to 77%
- Reduced operating expenses by 30% over the lifetime of the assets and facilities

OPERATIONAL READINESS ACTIVATION & TRANSITION (ORAT) SOFTWARE

A(X)S

Axis ORAT software provides a structured approach to activation allowing you to mitigate risk and seamlessly transition from construction to operations.

Axis will guide your projects activation activities from concept to completion. Whether its your first time activating a new facility, or you're an expert, you can trust that Axis will assist you in creating transparency across your projects, connecting your stakeholders, and ensuring critical activation activities do not slip through the cracks.

Our software combines the operational goals of airports, their stakeholders, and project teams into a single program with structured framework.

ABOUT AXIS ORAT

Project management and facility activation is complex. We exist to transform the way that airports, stadium operators, healthcare facilities, and universities bring new projects online and keep them operating successfully. Our consulting and technology services help to protect investments and mitigate risks. Axis is here to ensure your customers experience your facilities the way you have envisioned. Our team is customer-focused. We are experienced project management, construction, operational readiness, and airport management professionals. Our customer's projects have ranged from $500,000 to $15 billion. Our module-based technology and consulting services can easily be scaled to assist any size project.
