

Trice Jewelers Announces “Diamonds in Space” with Aero Diamonds

Centennial, Colorado’s Trice Jewelers is thrilled to announce the launch of the “Diamonds in Space” from Aero Diamonds, a dynamic new collection of fashion jewelry created with the magic of unlimited imagination combined with modern technology.

As innovative as they are luxurious, the “Diamonds in Space” collection from Aero Diamonds is a new concept in fashion jewelry and features bold diamonds that are connected **without** the use of traditional prong or channel mountings. Instead, the diamonds of the “Diamonds in Space” are laser pierced and free of traditional metal mountings so they appear to be dancing in midair and sparkling with light and diamond fire.

When asked about what makes the large assortment of Aero Diamonds fashion jewelry items including necklaces and earrings so special, Trice President Justin Klomp said, “Aero Diamond’s innovative ability to integrate diamonds of any shape into unique designs, without traditional metal mountings, allows for exquisite designs tailored for our beloved customers.”
