

Welcome!

Comich is a simple tool that allows you to rapidly turn your own or favorite videos/pictures into a comic strip with your creative stories.

How it works

- 1- Start a project and choose a template
- 2- Insert video frames/images
- 3- Adjust frames, add dialogue boxes, stickers, filters, texts
- 4- Save/share or print your story!

Your projects will be saved once you close them. That way you can always access them for editing.

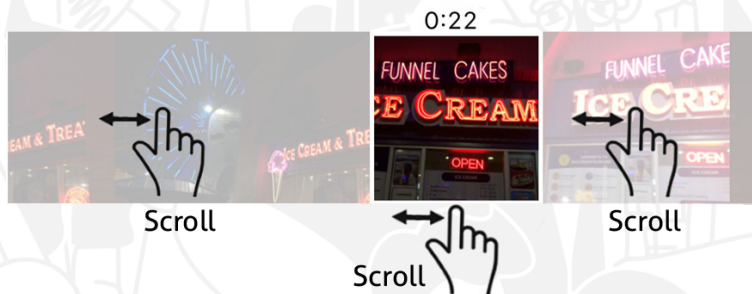

Insert Footages

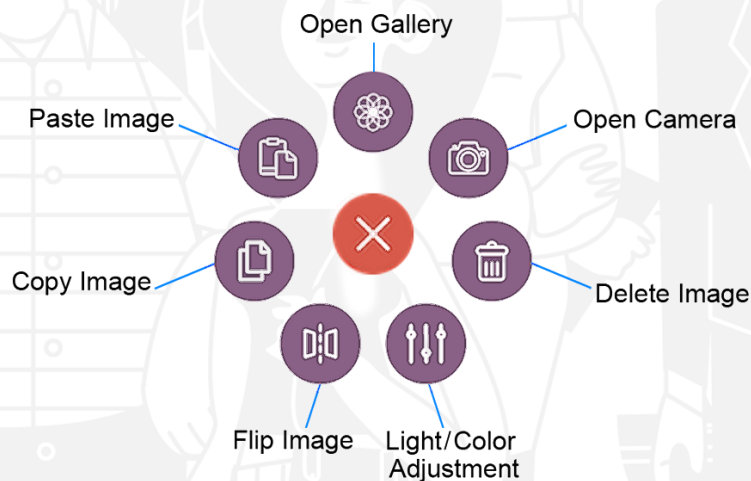

Comicish has a cool feature that allows you to extract frames out of videos. You can **Move, Resize** and **Rotate** frames too.

- Tap the + button, open the gallery and choose the video tab
- Find and choose your desired video clip
- Then you will see a scroll bar like the following:

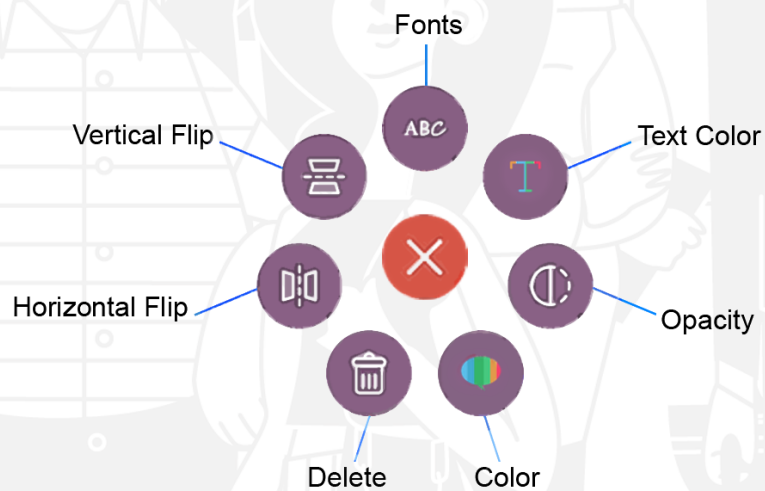

- Scroll to select a frame by using scroll areas
- Once the right frame is selected, tap the Use Frame on top
- Tap the image to access the image menu for more options:

Add Dialogue Boxes

- Select the dialogue tab and choose a dialogue box shape
- Easily move, resize and rotate shapes
- Long press on the dialogue box for the keyboard to show
- Type your scrip and adjust the font size
- Tap the Dialogue box to access the menu for more options:

Stickers, Filters & Layout

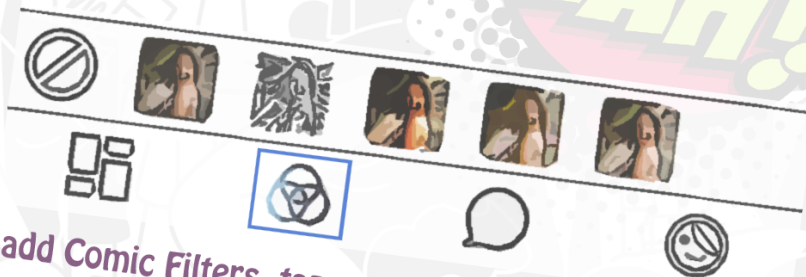

Stickers, filters, backgrounds and adjustments can make your stories truly shine:

Stickers:

- To add stickers, tap the sticker tab at the bottom
- Scroll through the stickers and choose your favorite ones

Filters:

- To add Comic Filters, tap on the picture
- Select filter tab at the bottom and choose your desired filter
- Tap again on the same filter to adjust its intensity

Layout:

- Move the slider to adjust the thickness of the frame border
- To add a Background Color, tap the Layout tab
- Tap the color wheel and choose your desired color
- Tap the last icon to add vignette effect to the canvas

Light / Color Adjustments

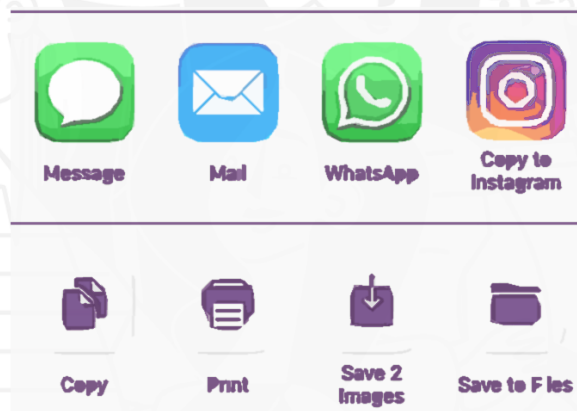

Comicish has a dedicated tool for adjusting the lights and colors of the scenes.

- Tap the image and select  from the image menu.
- Adjust the light /color by using dedicated sliders
- For a more comic effect, increase the Saturation & Sharpness

Share

After creating your great artwork, it's time to share! Comicish's powerful export engine provides you with high resolution canvases, which can be printed or shared through your social media.

- Tap  at the bottom of the project page
- Select your desired format (JPEG or PDF)
- Select the destination to export your project
