

Automated Genome Titer Solution using the GeneSwift Reagent

Gator® Bio has developed novel solutions for genome titer, capsid titer, and empty-full ratio. Gator Bio is the only provider in the market that offers all of these assays on a single automated platform.

The GeneSwift Starter Package includes:

1	2	3	4
Gator® Instruments	Gator® GeneSwift Reagent	PrimerDigital Oligo Designer Tool	Training and Support
			
8 samples/run GatorOne for data processing 2-yr warranty	96 assays Gator Oligo Pre-Mix: CMV/GFP/SV40 Also supports customer GoI	Oligo design in under 1 minute Flexible oligo design for both positive and negative strands of the genome	BLI basics and operation GeneSwift assay Data processing and reports Troubleshooting

AAV GeneSwift Reagents

Kit name	GoI	CMV	GFP	SV40
Product number	350006	120090	120089	120096
Application	Genome titer using oligos specific to Gene of Interest	Genome titer using oligos specific to CMV	Genome titer using oligos specific to GFP	Genome titer using oligos specific to SV40
